PRINCIPLES OF FORECASTING:
A Handbook for Researchers and Practitioners

edited by

J. Scott Armstrong
University of Pennsylvania
The Wharton School
Philadelphia, Pennsylvania
USA

KLUWER ACADEMIC PUBLISHERS
Boston/Dordrecht/London

CONTENTS

Preface v

Dedication vii

1. Introduction 1
J. Scott Armstrong, The Wharton School, University of Pennsylvania

2. Role Playing 13

Role Playing: A Method to Forecast Decisions 15
J. Scott Armstrong, The Wharton School, University of Pennsylvania

3. Intentions 31

Methods for Forecasting from Intentions Data 33
Vicki G. Morwitz, Stern School, New York University

4. Expert Opinions 57

Improving Judgment in Forecasting 59
Nigel Harvey, Department of Psychology, University College London

Improving Reliability of Judgmental Forecasts 81
Thomas R. Stewart, Center for Policy Research, State University of New York at Albany

Decomposition for Judgmental Forecasting and Estimation 107
Donald G. MacGregor, Decision Research, Eugene, Oregon

Expert Opinions in Forecasting: The Role of the Delphi Technique 125
Gene Rowe, Institute of Food Research, and George Wright, University of Strathclyde

5. Conjoint Analysis 145

Forecasting with Conjoint Analysis 147
Dick R. Wittink, Yale University and Trond Bergestuen, American Express

6. Judgmental Bootstrapping 169

Judgmental Bootstrapping: Inferring Experts' Rules for Forecasting 171
J. Scott Armstrong, The Wharton School, University of Pennsylvania

7. Analogies 193

Forecasting Analogous Time Series 195

George T. Duncan, Wilpen L. Gorr, and Janusz Szczypula, School of Public Policy, Carnegie Mellon University

8. Extrapolation 215

Extrapolation of Time-Series and Cross-Sectional Data 217

J. Scott Armstrong, The Wharton School, University of Pennsylvania

Neural Networks For Time-Series Forecasting 245

William Remus, College of Business Administration, University of Hawaii, and Marcus O'Connor, University of New South Wales

9. Rule-Based Forecasting 257

Rule-Based Forecasting: Using Judgment in Time-Series Extrapolation 259

J. Scott Armstrong, The Wharton School, University of Pennsylvania, Monica Adya, Department of Management, DePaul University, and Fred Collopy, The Weatherhead School, Case Western Reserve University

10. Expert Systems 283

Expert Systems for Forecasting 285

Fred Collopy, The Weatherhead School, Case Western Reserve University, Monica Adya, Department of Management, DePaul University, and J. Scott Armstrong, The Wharton School, University of Pennsylvania

11. Econometric Methods 301

Econometric Forecasting 303

P. Geoffrey Allen, Department of Resource Economics, University of Massachusetts, and Robert Fildes, The Management School, Lancaster University

12. Selecting Methods 363

Selecting Forecasting Methods 365

J. Scott Armstrong, The Wharton School, University of Pennsylvania

13. Integrating, Adjusting, and Combining 387

Judgmental Time-Series Forecasting Using Domain Knowledge 389

Richard Webby, Marcus O'Connor, and Michael Lawrence, School of Information Systems, University of New South Wales

Judgmental Adjustment of Statistical Forecasts 405

Nada R. Sanders, Department of Management Science, Wright State University, and Larry P. Ritzman, Operations and Strategic Management, Boston College

Combining Forecasts 417

J. Scott Armstrong, The Wharton School, University of Pennsylvania

14. Evaluating Methods **441**

Evaluating Forecasting Methods 443
J. Scott Armstrong, The Wharton School, University of Pennsylvania

15. Assessing Uncertainly **473**

Prediction Intervals for Time-Series Forecasting 475
Chris Chatfield, Department of Mathematical Sciences, University of Bath

Overconfidence in Judgmental Forecasting 495
Hal R. Arkes, Department of Psychology, Ohio State University

16. Gaining Acceptance **517**

Scenarios and Acceptance of Forecasts 519
W. Larry Gregory and Anne Duran, Department of Psychology, New Mexico State University

17. Monitoring Forecasts **541**

Learning from Experience: Coping with Hindsight Bias and Ambiguity 543
Baruch Fischhoff, Department of Social and Decision Sciences, Carnegie-Mellon University

18. Applications of Principles **555**

Population Forecasting 557
Dennis A. Ahlburg, Carlson School of Management, University of Minnesota

Forecasting the Diffusion of Innovations: Implications for Time-Series Extrapolation 577
Nigel Meade, The Management School, Imperial College, London and Towhidul Islam, Faculty of Management, University of Northern British Columbia

Econometric Models for Forecasting Market Share 597
Roderick J. Brodie and Peter J. Danaher, Department of Marketing, University of Auckland, V. Kumar, University of Houston, and Peter S. H. Leeflang, Gröningen University

Forecasting Trial Sales of New Consumer Packaged Goods 613
Peter S. Fader, Wharton School, University of Pennsylvania, and Bruce G. S. Hardie, London Business School

19. Diffusion of Principles **631**

Diffusion of Forecasting Principles through Books 633
James E. Cox, Jr. and David G. Loomis, Illinois State University

Diffusion of Forecasting Principles through Software 651
Leonard J. Tashman, University of Vermont, and Jim Hoover, U.S. Navy

20. Summary **677**

Standards and Practices for Forecasting 679
J. Scott Armstrong, The Wharton School, University of Pennsylvania

Forecasting Standards Checklist 733

External Reviewers **739**

About the Authors **745**

The Forecasting Dictionary **761**

Author Index **825**

Subject Index **843**
