PREFACE TO THE SECOND EDITION	xv
FROM THE PREFACE TO THE FIRST EDITION	xix
Chapter 1. BASIC NOTIONS	1
§1.1. A problem from differential equations	1
§1.2. An examination of the results	6
§1.3. Examples of Banach spaces	9
§1.4. Fourier series	17
§1.5. Problems	24
Chapter 2. DUALITY	29
§2.1. The Riesz representation theorem	29
§2.2. The Hahn-Banach theorem	33
§2.3. Consequences of the Hahn-Banach theorem	36
§2.4. Examples of dual spaces	39
§2.5. Problems	51
Chapter 3. LINEAR OPERATORS	55
§3.1. Basic properties	55
§3.2. The adjoint operator	57
§3.3. Annihilators	59
§3.4. The inverse operator	60
§3.5. Operators with closed ranges	66
§3.6. The uniform boundedness principle	71

---

§3.7. The open mapping theorem	71
§3.8. Problems	72
Chapter 4. THE RIESZ THEORY FOR COMPACT OPERATORS	77
§4.1. A type of integral equation	77
§4.2. Operators of finite rank	85
§4.3. Compact operators	88
§4.4. The adjoint of a compact operator	95
§4.5. Problems	98
Chapter 5. FREDHOLM OPERATORS	101
§5.1. Orientation	101
§5.2. Further properties	105
§5.3. Perturbation theory	109
§5.4. The adjoint operator	112
§5.5. A special case	114
§5.6. Semi-Fredholm operators	117
§5.7. Products of operators	123
§5.8. Problems	126
Chapter 6. SPECTRAL THEORY	129
§6.1. The spectrum and resolvent sets	129
§6.2. The spectral mapping theorem	133
§6.3. Operational calculus	134
§6.4. Spectral projections	141
§6.5. Complexification	147
§6.6. The complex Hahn-Banach theorem	148
§6.7. A geometric lemma	150
§6.8. Problems	151
Chapter 7. UNBOUNDED OPERATORS	155
§7.1. Unbounded Fredholm operators	155
§7.2. Further properties	161
§7.3. Operators with closed ranges	164
§7.4. Total subsets	169
§7.5. The essential spectrum	171
§7.6. Unbounded semi-Fredholm operators	173
§7.7. The adjoint of a product of operators	177

---

§7.8. Problems	179
Chapter 8. REFLEXIVE BANACH SPACES	183
§8.1. Properties of reflexive spaces	183
§8.2. Saturated subspaces	185
§8.3. Separable spaces	188
§8.4. Weak convergence	190
§8.5. Examples	192
§8.6. Completing a normed vector space	196
§8.7. Problems	197
Chapter 9. BANACH ALGEBRAS	201
§9.1. Introduction	201
§9.2. An example	205
§9.3. Commutative algebras	206
§9.4. Properties of maximal ideals	209
§9.5. Partially ordered sets	211
§9.6. Riesz operators	213
§9.7. Fredholm perturbations	215
§9.8. Semi-Fredholm perturbations	216
§9.9. Remarks	222
§9.10. Problems	222
Chapter 10. SEMIGROUPS	225
§10.1. A differential equation	225
§10.2. Uniqueness	228
§10.3. Unbounded operators	229
§10.4. The infinitesimal generator	235
§10.5. An approximation theorem	238
§10.6. Problems	240
Chapter 11. HILBERT SPACE	243
§11.1. When is a Banach space a Hilbert space?	243
§11.2. Normal operators	246
§11.3. Approximation by operators of finite rank	252
§11.4. Integral operators	253
§11.5. Hyponormal operators	257
§11.6. Problems	262

---

Chapter 12. BILINEAR FORMS	265
§12.1. The numerical range	265
§12.2. The associated operator	266
§12.3. Symmetric forms	268
§12.4. Closed forms	270
§12.5. Closed extensions	274
§12.6. Closable operators	278
§12.7. Some proofs	281
§12.8. Some representation theorems	284
§12.9. Dissipative operators	285
§12.10. The case of a line or a strip	290
§12.11. Selfadjoint extensions	294
§12.12. Problems	295
Chapter 13. SELFADJOINT OPERATORS	297
§13.1. Orthogonal projections	297
§13.2. Square roots of operators	299
§13.3. A decomposition of operators	304
§13.4. Spectral resolution	306
§13.5. Some consequences	311
§13.6. Unbounded selfadjoint operators	314
§13.7. Problems	322
Chapter 14. MEASURES OF OPERATORS	325
§14.1. A seminorm	325
§14.2. Perturbation classes	329
§14.3. Related measures	332
§14.4. Measures of noncompactness	339
§14.5. The quotient space	341
§14.6. Strictly singular operators	342
§14.7. Norm perturbations	345
§14.8. Perturbation functions	350
§14.9. Factored perturbation functions	354
§14.10. Problems	357
Chapter 15. EXAMPLES AND APPLICATIONS	359
§15.1. A few remarks	359

---

§15.2. A differential operator	360
§15.3. Does $A$ have a closed extension?	363
§15.4. The closure of $A$	364
§15.5. Another approach	369
§15.6. The Fourier transform	372
§15.7. Multiplication by a function	374
§15.8. More general operators	378
§15.9. $B$ -Compactness	381
§15.10. The adjoint of $\bar{A}$	383
§15.11. An integral operator	384
§15.12. Problems	390
Appendix A. Glossary	393
Appendix B. Major Theorems	405
Bibliography	419
Index	423
