

# Probability and Statistics with Reliability, Queuing, and Computer Science Applications

**Kishor Shridharbhai Trivedi**

*Duke University*

*Durham, North Carolina*

A Wiley-Interscience Publication

**JOHN WILEY & SONS, INC.**

# Contents

<b>Preface to the Second Edition</b>	<b>ix</b>
<b>Preface to the First Edition</b>	<b>xi</b>
<b>Acronyms</b>	<b>xiii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Motivation . . . . .	1
1.2 Probability Models . . . . .	2
1.3 Sample Space . . . . .	3
1.4 Events . . . . .	6
1.5 Algebra of Events . . . . .	7
1.6 Graphical Methods of Representing Events . . . . .	11
1.7 Probability Axioms . . . . .	13
1.8 Combinatorial Problems . . . . .	19
1.9 Conditional Probability . . . . .	23
1.10 Independence of Events . . . . .	25
1.11 Bayes' Rule . . . . .	38
1.12 Bernoulli Trials . . . . .	45
<b>2 Discrete Random Variables</b>	<b>61</b>
2.1 Introduction . . . . .	61
2.2 Random Variables and Their Event Spaces . . . . .	62
2.3 The Probability Mass Function . . . . .	64
2.4 Distribution Functions . . . . .	66
2.5 Special Discrete Distributions . . . . .	68
2.6 Analysis of Program MAX . . . . .	92
2.7 The Probability Generating Function . . . . .	96
2.8 Discrete Random Vectors . . . . .	99
2.9 Independent Random Variables . . . . .	104

<b>3</b>	<b>Continuous Random Variables</b>	<b>115</b>
3.1	Introduction . . . . .	115
3.2	The Exponential Distribution . . . . .	119
3.3	The Reliability and Failure Rate . . . . .	124
3.4	Some Important Distributions . . . . .	129
3.5	Functions of a Random Variable . . . . .	148
3.6	Jointly Distributed Random Variables . . . . .	153
3.7	Order Statistics . . . . .	157
3.8	Distribution of Sums . . . . .	167
3.9	Functions of Normal Random Variables . . . . .	182
<b>4</b>	<b>Expectation</b>	<b>193</b>
4.1	Introduction . . . . .	193
4.2	Moments . . . . .	197
4.3	Expectation Based on Multiple Random Variables . . . . .	200
4.4	Transform Methods . . . . .	208
4.5	Moments and Transforms of Some Distributions . . . . .	217
4.6	Computation of Mean Time to Failure . . . . .	228
4.7	Inequalities and Limit Theorems . . . . .	237
<b>5</b>	<b>Conditional Distribution and Expectation</b>	<b>247</b>
5.1	Introduction . . . . .	247
5.2	Mixture Distributions . . . . .	255
5.3	Conditional Expectation . . . . .	262
5.4	Imperfect Fault Coverage and Reliability . . . . .	268
5.5	Random Sums . . . . .	279
<b>6</b>	<b>Stochastic Processes</b>	<b>289</b>
6.1	Introduction . . . . .	289
6.2	Classification of Stochastic Processes . . . . .	294
6.3	The Bernoulli Process . . . . .	300
6.4	The Poisson Process . . . . .	304
6.5	Renewal Processes . . . . .	314
6.6	Availability Analysis . . . . .	319
6.7	Random Incidence . . . . .	328
6.8	Renewal Model of Program Behavior . . . . .	332
<b>7</b>	<b>Discrete-Time Markov Chains</b>	<b>337</b>
7.1	Introduction . . . . .	337
7.2	Computation of $n$ -step Transition Probabilities . . . . .	341
7.3	State Classification and Limiting Probabilities . . . . .	347
7.4	Distribution of Times Between State Changes . . . . .	356
7.5	Markov Modulated Bernoulli Process . . . . .	358
7.6	Irreducible Finite Chains with Aperiodic States . . . . .	361
7.7	* The $M/G/1$ Queuing System . . . . .	377

7.8	Discrete-Time Birth–Death Processes . . . . .	385
7.9	Finite Markov Chains with Absorbing States . . . . .	392
<b>8</b>	<b>Continuous-Time Markov Chains</b>	<b>405</b>
8.1	Introduction . . . . .	405
8.2	The Birth–Death Process . . . . .	412
8.3	Other Special Cases of the Birth–Death Model . . . . .	446
8.4	Non-Birth–Death Processes . . . . .	454
8.5	Markov Chains with Absorbing States . . . . .	496
8.6	Solution Techniques . . . . .	520
8.7	Automated Generation . . . . .	530
<b>9</b>	<b>Networks of Queues</b>	<b>555</b>
9.1	Introduction . . . . .	555
9.2	Open Queuing Networks . . . . .	560
9.3	Closed Queuing Networks . . . . .	568
9.4	General Service Distribution and Multiple Job Types . . . . .	596
9.5	Non-product-form Networks . . . . .	604
9.6	Computing Response Time Distribution . . . . .	617
9.7	Summary . . . . .	630
<b>10</b>	<b>Statistical Inference</b>	<b>637</b>
10.1	Introduction . . . . .	637
10.2	Parameter Estimation . . . . .	639
10.3	Hypothesis Testing . . . . .	692
<b>11</b>	<b>Regression and Analysis of Variance</b>	<b>727</b>
11.1	Introduction . . . . .	727
11.2	Least-squares Curve Fitting . . . . .	732
11.3	The Coefficients of Determination . . . . .	735
11.4	Confidence Intervals in Linear Regression . . . . .	738
11.5	Trend Detection and Slope Estimation . . . . .	742
11.6	Correlation Analysis . . . . .	745
11.7	Simple Nonlinear Regression . . . . .	748
11.8	Higher-dimensional Least-squares Fit . . . . .	749
11.9	Analysis of Variance . . . . .	751
<b>A</b>	<b>Bibliography</b>	<b>765</b>
A.1	Theory . . . . .	765
A.2	Applications . . . . .	770
<b>B</b>	<b>Properties of Distributions</b>	<b>777</b>
<b>C</b>	<b>Statistical Tables</b>	<b>780</b>
<b>D</b>	<b>Laplace Transforms</b>	<b>801</b>

<b>E Program Performance Analysis</b>	<b>808</b>
<b>Author Index</b>	<b>811</b>
<b>Subject Index</b>	<b>819</b>
