

Journal of the IGPL

Volume 3, Number 6, October 1995

Contents

<i>Editorial</i>	826
<i>Original Articles:</i>	
A BDD-Based Simplification and Skolemization Procedure J. Goubault	827
Exploiting Equivalences in Connection Calculi S. Brüning	857
First-Order Tableaux with Sorts C. Weidenbach	887
Propositional Abduction in Modal Logic M. C. Mayer and F. Pirri	907
Regressive Merging in Model Elimination Tableau-Based Theorem Provers K. Wallace and G. Wrightson	921
Efficient Inverse Tableaux M. Mondadori	939
<i>Acknowledgements</i>	954
<i>Interest Group in Pure and Applied Logics (IGPL)</i>	955
<i>Announcements</i>	957
<i>Subscription</i>	960

Bulletin of the Interest Group in Pure and Applied Logics

ISSN 0945-9103

Administrators:

Janice Lonsdale, Jane Spurr
Imperial College, London
Regina Kraemer
Max-Planck-Institut,
Saarbrücken

Scope of the Bulletin

The *Bulletin* is the official publication of the International Interest Group in Pure and Applied Logics (IGPL), which is sponsored by The European Foundation for Logic, Language and Information (FoLLI), and currently has a membership of over 800 researchers in various aspects of logic (symbolic, computational, mathematical, philosophical, etc.) from all over the world.

The *Bulletin* is published in hardcopy and in electronic form several times per year by the Max-Planck-Institut, Saarbrücken, and by Imperial College, London. It is the first scientific journal on logic where publication is fully electronic: submission, refereeing, revising, typesetting, checking proofs, and publishing, all is done via electronic mailing and electronic publishing.

Papers are invited in all areas of pure and applied logic, including: pure logical systems, proof theory, model theory, recursion theory, type theory, nonclassical logics, nonmonotonic logic, numerical and uncertainty reasoning, logic and AI, foundations of logic programming, logic and computation, logic and language, and logic engineering.

The *Bulletin* is an attempt to solve a problem in the logic (in particular, IGPL) community:

- Long delays and large backlogs in publication of papers in current journals.
- Very tight time and page number limits on submission.

Papers in the final form should be in \LaTeX . The review process is quick, and is made by other IGPL members.

Submissions

Submissions are made by sending a submission letter to the e-mail address: igpl-request@doc.ic.ac.uk, giving the title and the abstract of the paper, and informing:

- (i) of how to obtain the file electronically, if you have the .dvi or .ps file; or
- (ii) that you have put the file (.dvi, .ps or .tex) in the public area theory.doc.ic.ac.uk (146.169.22.150), directory theory/forum/igpl/Buletin, subdirectory 'submissions';
or, by sending 5 (five) hardcopies of the paper to the Editor-in-Chief.
