Correction to: *Nature Geoscience* <https://doi.org/10.1038/s41561-019-0326-6>, published online 19 March 2019.

In the version of this Article originally published, in the sentence “There are three identified boulders with long axes exceeding 40 m and more than 200 boulders larger than 10 m²”, the term “10 m²” should have been “10 m (ref. ²)”. This has now been corrected.
