In the ‘Projections to the future’ Methods section of this Article, owing to an error during the production process, the exponent in ‘2 trillion (10^{12})’ was incorrectly formatted as a reference citation (ref. 15), instead of being the correct exponent. The correct sentence is: “Thus, for a 9×4 matrix, four multiplexed input vectors and a modulation speed of 14 GHz, a processing speed of 2 trillion (10^{12}) of MAC operations per second (9×4 MACs \times 4 input vectors \times 14 GHz) can be obtained.”. The original Article has been corrected online.
