## Welcome Message

*As the name suggests, Hyderabad means "lion city", derived from the Persian words and is located in the newly formed State of Telangana. Hyderabad's role in the pearl trade has given it the name "City of Pearls" and is one of the major global trading centre for large diamonds. Hyderabad is also a global centre of information technology, and is therefore, popularly known as Cyberabad (HITEC- Cyber City).*

*All Participants for WPMC 2015 and GWS 2015 are most welcome in Hyderabad.*

## Welcome Message

*On behalf of the Steering Committee of the WPMC 2015, Global Wireless Summit (GWS) 2015, and Wireless VITAE 2015, it is my great pleasure to bid you a warm welcome to these highly renowned events in the beautiful historic city of Hyderabad, India.*

*Under the theme of 'Democratizing Communications,' the 18th International Symposium on Wireless Personal Communications (WPMC) and 3rd Global Wireless Summit (GWS) are jointly organized, encompassing the 5th International Conference on Wireless Communication, Vehicular Technology, Information Theory and Aerospace & Electronics Systems (WirelessVITAE), The 12th World Wide Security and Mobility Conference (WWSMC), and the 3rd International Conference on Communications, Convergence, Content and Cooperation (IC5).*

*Wireless communications have evolved over the years to open great potential for monetizing on multimedia data and diversified user-generated content, making them a ubiquitous means of connecting people and businesses. Democratization of hardware, software and connectivity is the necessary enabler to benefit all stakeholders and provide a stable platform for creating profits out of technology disruption.*

*The setting of WPMC 2015 jointly with GWS2015 is in the heart of the City of Pearls, as Hyderabad historically been known for its blooming pearl industry. Today, Hyderabad is also a major center for the technology industry. The WPMC and GWS2015 program features an unusually distinguished group of keynote and invited speakers, as well as a strong technical program with novel research contributions from the relevant thematic areas from all over the world. In addition, an extensive list of social events have been scheduled to allow for a break from the exciting technical sessions. Please, take the advantage of the many opportunities to network and expand your technical and cultural horizons.*

*I would like to extend my appreciation to my global colleagues for their dedication and effort to put together a strong event.*

## Welcome Message

*It is my great pleasure to host the 18th International Symposium on Wireless Personal Multimedia Communications (WPMC'15) in Hyderabad, India.*

*The WPMC symposia series first commenced in 1998, as a unique international conference dedicated to wireless multimedia communications aiming for global collaboration. In cooperation with YRP, we hold the symposium in a location in Asia, Europe, America or Australia each year.*

*This year's host country, India, has shown remarkable developments in the information and communications technology (ICT) field, in particular, in mobile phones, since the 10th WPMC Symposium held in Jaipur in 2007. During that time attention to wireless technology has also increased and a broad range of R&D activities have been advanced. Against such a backdrop, it is truly gratifying that the WPMC Symposium is being held here.*

*As Japan's sole national research institute in the field of ICT, the National Institute of Information and Communications Technology (NICT), promotes research and development in fundamental technologies in the fields of networks, including wireless communication, universal communication, advanced ICT, and electromagnetic sensing. Through these technologies, we aim to contribute to improving and resolving various challenges that society faces.*

*In particular, NICT positions big data of a public nature that helps to contribute to society as "Social Big Data." We focus on R&D of such Social Big Data, with the goal of having it used throughout society as social infrastructure, and ensuring that the knowledge and information gained from it is further disseminated. Additionally, efforts leading to the Internet of Things (IoT) and Internet of Everything (IoE), where all things and all data become connected, are advancing, and NICT is actively contributing to the IoT Acceleration Consortium, which represents Japan's efforts in this area, and its technology development working group, the Smart IoT Acceleration Forum. Furthermore, learning from the response to the Great East Japan Earthquake that devastated Japan in March 2011, we are also engaging in research and development to swiftly deploy a wireless telecommunications network in the aftermath of a disaster.*

*For this symposium, NICT has set up a Wi-SUN workshop, 5G workshop, and Resilient Wireless Network Technologies workshop as themes related to such areas of research and development at this symposium. Currently, data gathering through networks using wireless technology is being conducted in various fields and industries across the globe. At the same time, the diversification of ICT had made wireless communications technology increasingly available to people. Given this situation, I believe that holding this ICT workshop here in India will be extremely effective and holds great significance.*

*Lastly, I sincerely hope that WPMC'15 will be a significant forum that promotes extensive collaborations and interchanges among those engaged in the R&D of wireless communications, towards the realization of a society where people can live with a sense of security and comfort.*

**Masao Sakauchi,**

President, National Institute of Information and Communications Technology, Japan

## Welcome Message

*On behalf of YRP R&D Promotion Committee, one of the co-organizers of the 18th International Symposium on Wireless Personal Multimedia Communications (WPMC 2015), it is my great pleasure to welcome you in Hyderabad, India.*

*Since the first WPMC was held in our Yokosuka Research Park (YRP), Japan, in 1998, this symposium had been held in various cities in the world every year providing researchers of wireless communications with opportunities to gain new knowledge and information and also to exchange with each other. We are excited that this year the WPMC is held in India for the second time after the WPMC 2007 held in Jaipur owing to the great cooperation of Global ICT Standardization Forum in India (GISFI), Indian Institute of Technology Bhubaneswar and Kharagpur, Jawaharlal Nehru Technological University Hyderabad, and other Indian colleagues, and we truly appreciate hard work and great efforts of all people concerned.*

*YRP has developed as an international R&D hub for radio and telecommunications technologies since its establishment in 1997. Currently, about 58 organizations with 5,200 researchers and engineers gather in YRP, and the member of our Committee, one of the promoting bodies of YRP, has reached to around 150. We have also concluded memorandums of understanding for research exchange with research parks and ICT institutions, totaling 51 organizations in 15 countries and one region.*

*Now, in YRP, in addition to the R&D of the 4th generation mobile communication systems, discussions and studies on the 5th generation mobile communication systems that are to be introduced in 2020 are under way. In Broadband Wireless Forum, which was established in our Committee in 2009, discussions on practical application of wireless power transmission technologies are going on, and last year in May, we also established a new Committee to promote application of Wireless Smart Utility Network, Wi-SUN.*

*YRP intends to use the fruits of these activities as a foothold to lead the world's R&D in ICT and further enhance YRP's function. We also would like to further strengthen wide-ranging international collaboration encompassing Europe, America, Asia and Oceania, and other regions, and we expect WPMC to be the very important platform for international exchange.*

*I hope that this WPMC2015 will be fruitful and enjoyable to all participants.*

**Mitsutoshi Hatori,**

Chairman, YRP R&D Promotion Committee, Japan

## Welcome Message

At the outset, as the Executive Chairman of the Technical Program Committee (TPC) of the third Global Wireless Summit (GWS-2015), it gives me an immense pleasure to heartily welcome you to this Summit being held in the City of Hyderabad, India during December 13-16, 2015.

The Global Wireless Summit (GWS) has been conceptualized in bringing together wireless media communication/personal communication, etc. The First GWS was successfully held in Princeton (USA), in 2013, followed by the Second one in Aalborg (Denmark), in 2014. Under the theme “Democratizing Communications”, the GWS-15 brings together academia, industry and standardization bodies working on green and secure communication. The conference will explore activities, trends and future challenges towards ICT globalization including energy and security issues in existing and future wireless technologies.

Global Wireless Summit 2015 is hosting 18th International Symposium on Wireless Personal Multimedia Communications (WPMC); 5th International Conference on Wireless Communications, Vehicular Technology, Information Theory Aerospace & Electronics Systems (WirelessVITAE) 2015, IC5 and World Wide Security & Mobility Conference (WWSMC). The WPMC-15 and WirelessVITAE 2015 are the major events and both are held second time in India. The 1st International Symposium on WPMC was held in 1998, and since then it is held every year with an objective of providing a ‘global platform’ for discussions on the latest trends in the wireless multimedia communications. In the year 2007, this event was held in Jaipur (India). Wireless VITAE is the only international conference broadly addressing the wireless developments in the world by merging the communities from four different IEEE societies. The 1st Conference was held in 2009 in Aalborg (Denmark) followed by 2nd in 2011 in Chennai (India).

The Global Wireless Summit-15 will present high-level technical sessions; tutorials, and special sessions on advance topics; workshops; and panel discussions. All the submitted contributions received for technical and special sessions have been thoroughly reviewed by the TPC including other leading experts and only the best quality of papers have been accepted for presentations. It may be mentioned that each paper was reviewed by at least three experts. TPC of GWS-15 has 15 Co-chairs and over 70 members, from a wide variety of academic, industrial, and research organizations around the globe.

As has been the tradition for this Summit, it continues to feature a high-quality technical program across a wide range of research in the wireless communications and related areas.

I would like to take this opportunity to profoundly thanks the TPC Co-chairs; TPC members; Chairpersons of Special Sessions, Workshops; reviewers; and authors.

I request you all to take the advantage of this grand Summit and have thought provoking 4 days in the City of Hyderabad.

### **Ashok Chandra**

Technical Program Committee (TPC) Executive Chair, WPMC 2015 and GWS 2015

Former Wireless Adviser to the Government of India
