CONTENTS

CHAPTER 1. HISTORICAL REVIEW OF THE DEVELOPMENT OF THE QUADRUPOLE ION TRAP	
<i>J. F. J. Todd</i>	1
Introduction	1
1.I. Principles of Operation	2
1.II. Utilization of the Quadrupole Ion Trap	6
(i) Mass-Selective Modes of Operation	6
(a) <i>Mass-Selective Detection</i> , 6	
(b) <i>Mass-Selective Storage</i> , 13	
(ii) Ion Loss Processes	16
(a) <i>Unstable Trajectories</i> , 17	
(b) <i>Interactions</i> , 17	
(c) <i>Nonlinear Resonances</i> , 21	
(d) <i>Self-Emptying</i> , 22	
1.III. The QUISTOR-Quadrupole Combination	22
1.IV. Theoretical Aspects of Ion Trap Operation	25
1.V. Research Activities with the Quadrupole Ion Trap	28
1.VI. Mass-Selective Ejection	30
CHAPTER 2. THEORY OF QUADRUPOLE MASS SPECTROMETRY	31
Introduction	31
2.I. Introduction to the Mathieu Equation	31
2.II. Stability Diagrams	37
2.III. The Complete Solution to the Mathieu Equation	39
2.IV. The Quadrupole Mass Filter	41
(i) Development of the Field Equations	42

(ii)	Quadrupole Mass Filter Stability Diagram	44
	(a) <i>Mass Scanning</i> , 47	
	(b) <i>Resolution</i> , 49	
2.V.	The Quadrupole Ion Trap (QUISTOR)	52
(i)	Development of the Field Equations	52
(ii)	Quadrupole Ion Trap Stability Diagrams	56
	(a) <i>Operating Modes</i> , 57	
	(b) <i>Derivation of the Parameters for Modes I, II, and III</i> , 59	
	(c) <i>Summary</i> , 62	
2.VI.	Ion Motion in Quadrupole Fields	63
(i)	Numerical Methods	63
(ii)	Initial Value Problems	65
(iii)	Boundary Value Problems	66
(iv)	Matrix Methods	70
(v)	Calculation of A , B , C_{2n} , and β	71
2.VII.	Ion Velocities and Kinetic Energies	74
(i)	Introduction	74
(ii)	Averaging of Trajectories	74
(iii)	Pseudo-Potential Well Method	76
(iv)	Phase-Space Dynamics	78
2.VIII.	Matrix Methods and Phase-Space Dynamics for Modeling the Quadrupole Ion Trap	88
(i)	Introduction	88
(ii)	Matrix Methods	89
(iii)	Phase-Space Dynamics	94
	(a) <i>Elliptical Boundaries in Phase-Space</i> , 97	
	(b) <i>Application to Quadrupole Device Modeling</i> , 104	
(iv)	Examples of Practical Calculations	105
	(a) <i>Ion Transmission Efficiencies</i> , 105	
	(b) <i>Ion Energetics</i> , 107	
(v)	Conclusion	110
CHAPTER 3.	THE PHYSICS OF THE ION TRAP	111
	Introduction	111

3.I. Operational Modes of the Ion Trap	111
(i) Total Storage with In Situ Detection	112
(ii) Total Storage with Pulse-Out Analysis	114
(iii) Mass-Selective Storage with Pulse-Out Detection	117
(iv) Total Storage with Mass-Selective (Axial) Injection	123
3.II. Ion Trajectory Studies	126
(i) Trajectories in Two-Dimensional Quadrupole Fields	126
(ii) Trajectories in Three-Dimensional Quadrupole Fields	137
(iii) A Simulation Study	145
(a) <i>Introduction, 145</i>	
(b) <i>Description of the Program, 145</i>	
(c) <i>Results of the Simulation, 147</i>	
3.III. The Ionic Environment	161
(i) Introduction	161
(ii) An Introduction to Temporal Invariance	164
(iii) Space-Charge Effects	166
(iv) Temporal Invariance Formalism	168
(a) <i>The Evolution of Statistical Properties in the Presence of Space Charge for a Specific Working Condition, 171</i>	
(b) <i>Influence of the Drive Frequency on Space-Charge Phenomena, 175</i>	
(c) <i>Influence of the Working Point, 175</i>	
(d) <i>Influence of the Parameter q, 176</i>	
(e) <i>Influence of the Parameters β_x, β_z, 176</i>	
(f) <i>Summary, 179</i>	
3.IV. QUISTOR Resonant Excitation (QRE)	183
(i) Ionic Oscillations in the Ion Trap	183
(ii) QRE and the Argon System	186
(iii) Resonant Excitation and the Ion Chemistry of 2-Propanol	188
(iv) The Investigation of Space Charge within the Trap	191
3.V. Sample Calculations	196

CHAPTER 4. CHEMISTRY IN THE QUADRUPOLE ION TRAP	209
Introduction	209
4.I. Bimolecular Processes	209
4.II. Proton Affinity Determination	217
(i) Experimental	218
(ii) Ketene	219
(iii) Diacetone Alcohol	220
(iv) Mesityl Oxide	221
(v) Isopropyl Acetate	222
4.III. Spectroscopy of Gaseous Ions	222
4.IV. Photochemistry of Gaseous Ions	224
(i) QUISTOR Photodissociation Studies	224
(ii) 2-Propanol	227
(a) <i>Verification of Reaction Pathways</i> , 232	
(b) <i>Isotopic Analogues of 2-Propanol</i> , 234	
(c) <i>Structure of m/z 79:</i> $(\text{CH}_3)_2\text{CHOH} \cdot \text{H}^+ \cdot \text{OH}_2$, 235	
(d) <i>Ion Relaxation</i> , 236	
(iii) Mixed Associative Ions	239
(iv) IRMPD of Sulfur-Containing Ions	239
(a) <i>Ethanethiol</i> , 239	
(b) <i>1-Propanethiol and 2-Propanethiol</i> , 240	
(c) <i>2-Hydroxyethanethiol</i> , 241	
(v) Isomer Differentiation by Multiphoton Dissociation	241
(vi) Photodissociation Rates	245
(vii) Wavelength Dependence of IRMPD	255
4.V. Photodissociation Using a Fiber-Optic Interface	257
4.VI. Confinement of Ions Injected into a Quadrupole Ion Trap	258
(i) Ion Injection with Delayed Trapping Potential under Collision-Free Conditions	260
(a) <i>Pulsed Ion Injection</i> , 260	
(b) <i>Concentric Ion Beam Injection</i> , 264	
(c) <i>Pulsed Ion Injection with Interparticle Interactions</i> , 265	

(ii)	Ion Injection with Continuous Trapping Potential under Collision-Free Conditions	265
(iii)	Ion Injection with Continuous Trapping Potential and Collisional Conditions	266
4.VII.	Ejection of Ions Stored in a Quadrupole Ion Trap	269
CHAPTER 5.	THE CYLINDRICAL ION TRAP	271
	Introduction	271
5.I.	Theoretical Treatments	272
5.II.	Numerical Analysis	276
(i)	Successive Displacement	278
(ii)	Overrelaxation	278
(iii)	Potential Distributions	279
5.III.	Experimental Ion Storage Traps of Cylindrical Geometry	281
(i)	Ion Storage Mass Spectra	282
(ii)	Stability Diagram Determination	283
5.IV.	Experimental Stability Diagrams and Mass-Selective Storage Mass Spectra	288
(i)	Stability Diagrams	288
(ii)	Mass-Selective Storage Mass Spectra	297
	(a) <i>Effect of Δm Bias, 299</i>	
	(b) <i>Effect of Storage Time, 299</i>	
5.V.	Secular Frequency of Ion Motion	303
5.VI.	Influence of Space Charge on the Maximum Density of Stored Ions	305
5.VII.	Applications of Cylindrical Ion Traps	305
(i)	Mechanistic Studies	305
(ii)	Metastable Ion Decay Processes	308
	(a) <i>Time-Resolved Photoionization Mass Spectrometry, 308</i>	
	(b) <i>Time-Resolved Cluster Ion Dissociation, 312</i>	
(iii)	Laser Probing of Trapped Ions	313
5.VIII.	Alternative Geometries for the Radio Frequency Quadrupole Ion Store	315

5.IX. Ion Trapping Methods	318
5.X. Conclusion	319
CHAPTER 6. THE FINNIGAN MAT ION TRAP DETECTOR (ITD™)	321
Introduction	321
6.I. Ion Trajectory Control	321
6.II. Ion Trap Detector	323
(i) Gas Chromatography	323
(ii) Gas Chromatography/Mass Spectrometry	323
6.III. Review of Ion Trap Containment Theory	324
(i) Introduction	324
(ii) Description of the Instrument	325
(iii) Mathieu Equation and Stability Diagram	325
6.IV. Mass Analysis by Mass-Selective Instability	329
(i) Mass-Selective Instability; Mode of Operation	329
(ii) Effects of Low Molecular Weight Background Gas	331
(iii) Dynamic Range and Detection Limit	334
6.V. Operating Modes	336
(i) Chemical Ionization Mass Spectral Mode	336
(ii) Tandem Mass Spectrometry	339
(iii) The Ion Trap as a Tandem Mass Spectrometer	341
6.VI. Automatic Gain Control	344
(i) Mode of Operation	345
(ii) Dynamic Range with Automatic Gain Control	346
6.VII. Comparisons of the Performance of the Ion Trap Detector	350
(i) Methane Reagent Ion Population	350
(ii) Measurements of Urinary Organic Acids	350
(a) <i>Quantitative Limits, 352</i>	
(b) <i>Quantitative Metabolic Profiles, 352</i>	

(c) <i>Procedure for Small Sample Volumes</i> , 354	
(d) <i>Conclusion</i> , 357	
(iii) Toxicological Application	357
(a) <i>Sensitivity Limits</i> , 357	
(b) <i>Sensitivity Comparison</i> , 359	
6.VIII. Miscellaneous Applications	359
(i) Direct Equilibrium Head-Space Analysis with an Ion Trap Detector	359
(ii) Gas Chromatograph-Fourier Transform Infrared Spectrometer-Ion Trap Detector System	360
(iii) Dications in the Ion Trap Detector	361
(iv) Isomer Distinction by Ion/Molecule Reactions	362
(v) Supercritical Fluid Chromatography and Mass Spectrometry with an Ion Trap Detector	362
6.IX. Conclusion	364
CHAPTER 7. ION TRAP MASS SPECTROMETER (ITMS™)	365
Introduction	365
7.I. Tandem Mass Spectrometric Mode	365
(i) Repetitive Tandem Mass Spectrometry	371
(ii) Chemical Ionization Tandem Mass Spectrometry	372
(iii) Isolation of a Single Ion Species in the Ion Trap	373
(iv) Removal of a Single Ion Species from the Ion Trap	378
(v) Internal Energy Control	378
7.II. Automatic Reaction Control	382
7.III. Comparison of Performance	383
(i) Comparisons of the Ion Trap Mass Spectrometer with the Triple Quadrupole Mass Spectrometer	383
(a) <i>Collision-Induced Dissociation of Protonated Species</i> , 383	
(b) <i>Energy-Resolved Mass Spectra</i> , 384	

(c) <i>Daughter Ion Mass Spectra</i> , 386	
(ii) Comparison of the Ion Trap Mass Spectrometer with a Sector Instrument of Reverse Geometry	388
7.IV. Combined Application of DC and RF Voltages	389
(i) Specific Ion Reactor Mode	390
(ii) Ion Isolation from a Known Environment	391
(iii) Extension of the Mass Range of the Ion Trap Mass Spectrometer	394
7.V. Fourier Transform Ion Trap Mass Spectrometer	396
7.VI. Negative Ion Studies in the Ion Trap Mass Spectrometer	398
(i) Introduction	398
(ii) Early Negative Ion Trapping Studies	401
(iii) Negative Ion Storage Studies with an Ion Trap Mass Spectrometer	406
(a) <i>Negative Ion Chemical Ionization Mass Spectrometry</i> , 408	
(b) <i>Negative Ion Chemical Ionization Tandem Mass Spectrometry</i> , 410	
7.VII. Conclusion	414
