Quantitative real-time polymerase chain reaction versus culture: a comparison between two methods for the detection and quantification of Actinobacillus actinomycetemcomitans, Porphyromonas gingivalis and Tannerella forsythensis in subgingival plaque samples — Source link

Laura Lau, Mariano Sanz, David Herrera, Juan Manuel Morillo ...+2 more authors

Institutions: Complutense University of Madrid

Published on: 01 Dec 2004 - Journal of Clinical Periodontology (J Clin Periodontol)

Topics: Gingivitis, Porphyromonas gingivalis, TaqMan and Periodontitis
