Contents

	Preface	xv
	References	<i>xviii</i>
	Acknowledgments	xxi
1	Remote Sensing by Radar	1
1.1	State of the Art	1
1.1.1	Overview	1
1.1.2	Radar Capabilities at the End of World War II	6
1.1.3	Strip Maps and Side-Looking Radar	13
1.1.4	Spaceborne Radar	16
1.2	Surface Effects and Emerging Techniques	21
1.2.1	Effects of Surface Characteristics	21
1.2.2	Modern Techniques for Sensing Surface Characteristics	32
	References	39
2	Basic Concepts and Definitions	43
2.1	Radar Reflectivity	43

2.1.1	The Radar Equation for Free Space	44
2.1.2	Radar Cross Section of Targets	47
2.1.3	Normalized Radar Cross Section	48
2.1.4	Coherence and Incoherence of a Scattered Field	50
2.1.5	Rayleigh Roughness Criterion, Specular Reflection, and Scattering	51
2.1.6	Far Field of Radar Targets	56
2.1.7	Effects of Radar Frequency Changes	57
2.1.8	Echo Fluctuations	58
2.2	The Earth and Its Effects on Radar	59
2.2.1	Effects of the Earth's Curvature and Refraction	59
2.2.2	The Effect of Interference on a Target	63
2.2.3	Nature of the Sea Surface and Wind Speed Statistics	66
2.2.4	Propagation over the Horizon	70
2.2.5	Attenuation and Scattering by the Atmosphere	73
	References	75
3	Polarization, Depolarization, and Theories of Scattering	79
3.1	Polarization and Depolarization	79
3.1.1	Polarization Scattering Matrix	79
3.1.2	Relationships Between Linear and Circular Polarizations	82
3.1.3	A Randomly Oriented Dipole	85
3.1.4	A Dihedral Reflector	87
3.1.5	Depolarization Caused by an Ensemble of Randomly Oriented Dipoles	88
3.2	Theories for Radar Cross Section of Rough Surfaces	91
3.2.1	Simple Models Including the Constant Gamma Model	91
3.2.2	Classical Interference Theory	96
3.2.3	The Tangent Plane Approximation	97

3.2.4	Very Rough Surfaces	97
3.2.5	The Facet Model	98
3.2.6	The Slightly Rough Planar Surface	98
3.2.7	Ripples on Water	100
3.2.8	Vegetation Model	101
3.2.9	Composite Surfaces	103
3.2.10	Doppler Spectra of Sea Echo	104
	References	106
4	Effects of the Earth's Surface	111
4.1	Fundamental Concepts	111
4.1.1	Effects of the Earth's Curvature and Refraction	112
4.1.2	Reflections from a Rough, Spherical Earth	115
4.1.3	Reflection Coefficient for a Flat, Smooth Earth	118
4.1.4	Effect of a Flat, Smooth Earth on Target Echo	125
4.2	Echo from Targets That Are Above a Flat, Smooth Earth	129
4.2.1	Range and Depression Angle Dependencies for a Small Object Above a Smooth Earth	129
4.2.2	Vertically Extensive Objects Above a Smooth Earth	132
4.2.3	Propagation Factors for Circular, Horizontal, and Vertical Polarizations Above a Smooth Earth	135
4.2.4	Propagation Factors for a Cloud of Scatterers Above a Smooth Earth	138
4.3	Effects of Surface Roughness on Forward-Scattered Fields	140
4.3.1	Reflection Coefficient for Rough Surfaces	140
4.3.2	Shadowing	145
4.3.3	Depolarization	146
4.4	Echo from Targets That Are Above a Physically Rough Earth	147
4.4.1	Variation of Echo Power with Range	148

4.4.2	Range at Which Idealized R^{-4} and R^{-8} Curves Intersect	150
4.4.3	Relative Cross Sections for Circular Polarizations	150
4.4.4	A Cloud of Scatterers	152
4.4.5	Effects of the Diffuse Component on Target Echo	154
4.5	Multipath Effects on Echo from Land and Sea	156
4.5.1	Effects of Multipath Interference	157
4.5.2	Multipath Interference and Shadowing	158
	References	159
5	Echo Fluctuations and Spectra	163
5.1	Introduction	163
5.1.1	Spectra and Autocorrelation Functions	163
5.1.2	Amplitude Statistics	165
5.2	Ground Echo Fluctuations	172
5.2.1	Nature of Ground Echoes	172
5.2.2	Temporal Amplitude Distributions for Terrain	175
5.2.3	Spatial Amplitude Statistics	182
5.2.4	Noncoherent Spectra and Autocorrelation Functions of Land	192
5.2.5	Coherent Land Doppler Spectra	203
5.2.6	Lincoln Laboratory Spectral Model	211
5.2.7	Power in Fast and Slow Land Spectra	213
5.2.8	Bragg Spectra from Inland Water	214
5.2.9	Concluding Remarks on Ground Echo Fluctuations	216
5.3	Visual Observations of Sea Echo	219
5.3.1	Characteristics Revealed by an <i>A</i> -Scope Display	219
5.3.2	Results from Fixed Range Sampling	221
