

# **Real Sound Synthesis for Interactive Applications**

**Perry R. Cook**

**A K Peters  
Wellesley, Massachusetts**

# Contents

<b>Introduction .....</b>	<b>xi</b>
<b>1. Digital Audio Signals .....</b>	<b>1</b>
1.0 Introduction .....	1
1.1 Digital Audio Signals .....	1
1.2 Sampling and Aliasing.....	2
1.3 Quantization .....	4
1.4 Resampling and Interpolation .....	5
1.5 Digital Audio Compression .....	7
1.6 Conclusion .....	9
<b>2. Sampling (Wavetable) Synthesis .....</b>	<b>11</b>
2.0 Introduction .....	11
2.1 Wavetable Synthesis .....	11
2.2 Concatenative Speech Synthesis .....	13
2.3 Manipulating PCM .....	14
2.4 Let's Pause and Think Here .....	18
<b>3. Digital Filters .....</b>	<b>21</b>
3.0 Introduction .....	21
3.1 Linear Systems, LTI Systems, Convolution .....	21

3.2	Digital Filters .....	24
3.3	FIR Filters .....	24
3.4	IIR Filters .....	26
3.5	The General Filter Form .....	26
3.6	The Z Transform .....	27
3.7	The Transfer Function .....	28
3.8	Zeroes and Poles .....	29
3.9	First Order One-Zero and One-Pole Filters .....	29
3.10	The Second Order Pole/Zero (BiQuad) Filter .....	31
3.11	A Little on Filter Topologies .....	34
3.12	Conclusion .....	36
<b>4.</b>	<b>Modal Synthesis .....</b>	<b>39</b>
4.0	Introduction .....	39
4.1	A Simple Mechanical System .....	39
4.2	Solution of the Mass/Spring/Damper System .....	41
4.3	Boundary Conditions and Solutions .....	43
4.4	Sinusoidal Additive Synthesis .....	45
4.5	Filter-Based Modal Synthesis .....	46
4.6	Residual Extraction and Resynthesis .....	48
4.7	Conclusion .....	50
<b>5.</b>	<b>The Fourier Transform .....</b>	<b>51</b>
5.0	Introduction .....	51
5.1	The Frequency Domain Spectrum .....	52
5.2	The Fourier Series .....	52
5.3	The Discrete Fourier Transform .....	53
5.4	Orthogonality and Uniqueness of the DFT .....	55
5.5	Convolution with the DFT and the FFT .....	55
5.6	Some Fourier Transform Applications .....	57
5.7	The Short-Time Fourier Transform .....	60
5.8	Conclusions .....	61
<b>6.</b>	<b>Spectral Modeling and Additive Synthesis .....</b>	<b>63</b>
6.0	Introduction .....	63
6.1	Types of Spectra .....	63
6.2	Spectral Modeling .....	68
6.3	Sines Plus Noise Plus Transients .....	71
6.4	Spectra in Time .....	72
6.5	Conclusion .....	74
<b>7.</b>	<b>Subband Vocoders and Filterbanks .....</b>	<b>75</b>
7.0	Introduction .....	75
7.1	Subband Decomposition of Audio .....	75
7.2	The Channel Vocoder .....	78
7.3	The Cross-Synthesizing Channel Vocoder .....	80

7.4. The Phase Vocoder .....	81
7.5. Conclusions .....	82
<b>8. Subtractive Synthesis and LPC .....</b>	<b>85</b>
8.0 Introduction .....	85
8.1 Subtractive Synthesis .....	85
8.2 Resonance-Factored (Formant) Synthesis .....	87
8.3 Linear Prediction .....	88
8.4 LPC Speech Examples .....	90
8.5 LPC for Nonspeech and Real-World Sounds .....	92
8.6 LPC and Physics .....	94
8.7 Conclusions .....	94
<b>9. Strings and Bars .....</b>	<b>97</b>
9.0 Introduction .....	97
9.1 The Ideal String .....	97
9.2 Refining the Ideal String .....	101
9.3 Weak Stiffness .....	103
9.4 Really Stiff Structures: Bars .....	105
9.5 Conclusions .....	106
<b>10. Nonlinearity, Waveshaping, FM .....</b>	<b>109</b>
10.0 Introduction .....	109
10.1 Simple Physical Nonlinearity .....	109
10.2 Simulating Physical Nonlinearity .....	113
10.3 Nonlinear Wave Synthesis by Lookup Table .....	114
10.4 Conclusions .....	119
<b>11. Tubes and Air Cavities .....</b>	<b>121</b>
11.0 Introduction .....	121
11.1 The Ideal Acoustic Tube .....	121
11.2 Building a Simple Clarinet .....	122
11.3 Resonance in Air Cavities .....	124
11.4 Conclusions .....	128
<b>12. Two and Three Dimensions .....</b>	<b>131</b>
12.0 Introduction .....	131
12.1 Membranes and Plates, Mass/Spring Models .....	131
12.2 Three-Dimensional Structures .....	136
12.3 Banded Waveguides in Higher Dimensions .....	140
12.4 Spatial Modes in Complex Geometries .....	143
12.5 Conclusions .....	146
<b>13. FOFs, Wavelets, and Particles .....</b>	<b>149</b>
13.0 Introduction .....	149
13.1 Formants in the Time Domain: FOFs .....	149

13.2	Wavelets .....	152
13.3	Granular Synthesis .....	155
13.4	Particle Models.....	155
13.5	Conclusions .....	167
<b>14.</b>	<b>Exciting and Controlling Sound Models .....</b>	<b>169</b>
14.0	Introduction .....	169
14.1	Plucking and Striking .....	169
14.2	Friction .....	174
14.3	Controlling Synthesis Parameters .....	183
14.4	Controllers .....	187
14.5	Conclusions .....	189
<b>15.</b>	<b>Walking Synthesis: A Complete System .....</b>	<b>191</b>
15.0	Introduction .....	191
15.1	Overall Architecture of the System .....	191
15.2	Event Analysis .....	192
15.3	Spectral Analysis .....	194
15.4	Statistical Modeling and Estimation .....	194
15.5	Testing on Real Sounds .....	197
15.6	Parametric Resynthesis.....	199
15.7	Conclusion .....	199
<b>16.</b>	<b>Examples, Systems, and Applications .....</b>	<b>201</b>
16.0	Introduction .....	201
16.1	Auditory Display: Real-Time Multimodal User Interfaces .....	201
16.2	Auditory Display: Sonification .....	202
16.3	Digital Foley Production Workstation/Stage .....	205
16.4	Virtual and Augmented Reality .....	206
16.5	Computer Music and Interactive Art .....	206
16.6	Animation and Gaming .....	207
16.7	The Future .....	209
<b>A.</b>	<b>DFT, Convolution, and Transform Properties .....</b>	<b>211</b>
A.1	Orthogonality of the Fourier Transform Kernel .....	211
A.2	Uniqueness of the Fourier Transform .....	212
A.3	Convolution .....	213
A.4	Convolution and the DFT .....	214
A.5	A Few Useful DFT Properties and Theorems .....	216
<b>B.</b>	<b>The Ideal String .....</b>	<b>221</b>
B.1	The Ideal String .....	221
<b>C.</b>	<b>Acoustic Tubes .....</b>	<b>225</b>
C.1	The Ideal Acoustic Tube .....	225
C.2	D'Alembert Solution to the Acoustic Tube Equation .....	227

C.3	Relating Pressure and Velocity in Acoustic Tubes .....	227
C.4	The Acoustic Tube With Varying Cross-Sectional Area .....	228
C.5	An Acoustic Tube Network .....	230
<b>D.</b>	<b>Sound Examples and Code on CD/CDROM .....</b>	<b>233</b>
D.1	Sound Examples .....	233
D.2	Source Code and Other Materials on CDROM Data Segment .....	236
<b>E.</b>	<b>The Synthesis Toolkit in C++ .....</b>	<b>239</b>
E.1	What is the Synthesis Toolkit? .....	239
E.2	A Brief History of the Development of The Synthesis ToolKit .....	241
E.3	Synthesizing Sound in Real Time .....	241
E.4	Non-Real-Time Soundfile Synthesis .....	243
E.5	An Example Instrument: Blown Bottle .....	244
E.6	Real-Time Synthesis Control .....	245
E.7	Classes and Instruments .....	246
E.8	The Chuck Audio/Music Programming Language .....	248
E.9	Conclusions .....	248
<b>I</b> <b>n</b> <b>d</b> <b>e</b> <b>x</b>	.....	<b>249</b>
