Preface		xi		
Chapter I. Hypersurfaces and Generic Submanifolds in \mathbb{C}^N				
§1.1.	Real Hypersurfaces in \mathbb{C}^N	3		
§1.2.	Holomorphic and Antiholomorphic Vectors	6		
§1.3.	CR, Totally Real, and Generic Submanifolds	9		
§1.4.	CR Vector Fields and CR Functions	14		
§1.5.	Finite Type and Minimality Conditions	17		
§1.6.	Coordinate Representations for CR Vector Fields	21		
§1.7.	Holomorphic Extension of CR Functions	26		
§1.8.	Local Coordinates for CR Manifolds	30		
Chapter II. Abstract and Embedded CR Structures		35		
§2.1.	Formally Integrable Structures on Manifolds	35		
§2.2.	Levi Form and Levi Map of an Abstract CR Manifold	40		
§2.3.	CR Mappings	49		
§2.4.	Approximation Theorem for Continuous Solutions	52		
§2.5.	Further Approximation Results	57		
Chapter III. Vector Fields: Commutators, Orbits, and Homogeneity				
§3.1.	Nagano's Theorem	62		
§3.2.	Sussman's Theorem	68		
§3.3.	Local Orbits of Real-analytic Vector Fields	73		
§3.4.	Canonical Forms for Real Vector Fields of Finite Type	73		
§3.5.`	Canonical Forms for Real Vector Fields of Infinite Type	87		
§3.6.	Weighted Homogeneous Real Vector Fields	91		
Chapter 3	IV. Coordinates for Generic Submanifolds	94		
§4.1.	CR Orbits, Minimality, and Finite Type	94		
§4.2.	Normal Coordinates for Generic Submanifolds	95		
§4.3.	Canonical Coordinates for Generic Submanifolds	101		
§4.4.	Weighted Homogeneous Generic Submanifolds	108		
§4.5.	Normal Canonical Coordinates	112		

CONTENTS

Chapter V	V. Rings of Power Series and Polynomial Equations	119				
§5.1.	Finite Codimensional Ideals of Power Series Rings	119				
§5.2.	§5.2. Analytic Subvarieties					
§5.3.	§5.3. Weierstrass Preparation Theorem and Consequences					
§5.4.	Algebraic Functions, Manifolds, and Varieties	139				
§5.5.	Roots of Polynomial Equations with Holomorphic Coefficients	145				
Chapter V	VI. Geometry of Analytic Discs	156				
§6.1.	Hilbert and Poisson Transforms on the Unit Circle	156				
§6.2.	Analytic Discs Attached to a Generic Submanifold	162				
§6.3.	Submanifolds of a Banach Space					
§6.4.	Mappings of the Banach Space $C^{1,\alpha}$					
§6.5.	Banach Submanifolds of Analytic Discs	178				
Chapter V		184				
§7.1.	Wedges with Generic Edges in \mathbb{C}^N	184				
§7.2.	Holomorphic Functions of Slow Growth in Wedges	185				
§7.3.	Continuity of Boundary Values	192				
§7.4.	Uniqueness of Boundary Values 1					
§7.5.	Additional Smoothness up to the Edge					
§7.6.	Further Results and an "Edge-of-the-Wedge" Theorem	204				
Chapter V	VIII. Holomorphic Extension of CR Functions	205				
Chapter V §8.1.	VIII. Holomorphic Extension of CR Functions Criteria for Wedge Extendability of CR Functions	205 205				
-	-					
§8.1.	Criteria for Wedge Extendability of CR Functions	205				
§8.1. §8.2.	Criteria for Wedge Extendability of CR Functions Sufficient Conditions for Filling Open Sets with Discs	205 206				
\$8.1. \$8.2. \$8.3.	Criteria for Wedge Extendability of CR Functions Sufficient Conditions for Filling Open Sets with Discs Tangent Space to the Manifold of Discs	205 206 212				
§8.1. §8.2. §8.3. §8.4.	Criteria for Wedge Extendability of CR Functions Sufficient Conditions for Filling Open Sets with Discs Tangent Space to the Manifold of Discs Defect of an Analytic Disc Attached to a Manifold	205 206 212 218				
\$8.1. \$8.2. \$8.3. \$8.4. \$8.5.	Criteria for Wedge Extendability of CR Functions Sufficient Conditions for Filling Open Sets with Discs Tangent Space to the Manifold of Discs Defect of an Analytic Disc Attached to a Manifold Ranks of the Evaluation and Derivative Maps	205 206 212 218 224				
\$8.1. \$8.2. \$8.3. \$8.4. \$8.5. \$8.6.	Criteria for Wedge Extendability of CR Functions Sufficient Conditions for Filling Open Sets with Discs Tangent Space to the Manifold of Discs Defect of an Analytic Disc Attached to a Manifold Ranks of the Evaluation and Derivative Maps Minimality and Extension of CR Functions	205 206 212 218 224 230				
\$8.1. \$8.2. \$8.3. \$8.4. \$8.5. \$8.6. \$8.7.	Criteria for Wedge Extendability of CR Functions Sufficient Conditions for Filling Open Sets with Discs Tangent Space to the Manifold of Discs Defect of an Analytic Disc Attached to a Manifold Ranks of the Evaluation and Derivative Maps Minimality and Extension of CR Functions Necessity of Minimality for Holomorphic Extension to a Wedge Further Results on Wedge Extendability of CR Functions	205 206 212 218 224 230 231

t

	CONTENTS	1X
§9.10.	Reflection Principle for Bounded Domains	270
§9 .11.	Further Results on the Reflection Principle	277
Chapter X Segre Sets		281
§10.1.	Complexification of a Generic Real-analytic Submanifold	281
§10.2.	Definition of the Segre Manifolds and Segre Sets	283
§10.3.	Examples of Segre Sets and Segre Manifolds	289
§10.4.	Basic Properties of the Segre Sets	293
§10.5.	Segre Sets, CR Orbits, and Minimality	300
§10.6.	Homogeneous Submanifolds of CR Dimension One	305
§10.7.	Proof of Theorem 10.5.2	312
Chapter X	II. Nondegeneracy Conditions for Manifolds	315
§11.1.	Finite Nondegeneracy of Abstract CR Manifolds	315
§11.2.	Finite Nondegeneracy of Generic Submanifolds of \mathbb{C}^N	319
§11.3.	Holomorphic Nondegeneracy	322
§11.4.	Essential Finiteness for Real-analytic Submanifolds	325
§11.5.	Comparison of Nondegeneracy Conditions	329
§11.6.	Compact Real-analytic Generic Submanifolds	335
§11.7.	Nondegeneracy for Smooth Generic Submanifolds	336
§11.8.	Essential Finiteness of Smooth Generic Submanifolds	342
Chapter X	III. Holomorphic Mappings of Submanifolds	349
§12.1.	Jet Spaces and Jets of Holomorphic Mappings	349
§12.2.	Basic Identity for Holomorphic Mappings	352
§12.3.	Determination of Holomorphic Mappings by Finite Jets	358
§12.4.	Infinitesimal CR Automorphisms	361
§12.5.	Finite Dimensionality of Infinitesimal CR Automorphisms	366
§12.6.	Iterations of the Basic Identity	370
§12.7.	Analytic Dependence of Mappings on Jets	373
Chapter X	XIII. Mappings of Real-algebraic Subvarieties	379
§13.1.	Mappings between Generic Real-algebraic Submanifolds	379
§13.2.	Some Necessary Conditions for Algebraicity of Mappings	383
§13.3./	Mappings of Real-algebraic Subvarieties	387
