

Real-Time Rendering

Second Edition

Tomas Akenine-Möller

Eric Haines

A K Peters
Natick, Massachusetts

Contents

Preface	xi
1 Introduction	1
1.1 Contents Overview	2
1.2 Notation and Definitions	3
2 The Graphics Rendering Pipeline	9
2.1 Architecture	10
2.2 The Application Stage	12
2.3 The Geometry Stage	13
2.4 The Rasterizer Stage	20
2.5 Through the Pipeline	22
3 Transforms	25
3.1 Basic Transforms	27
3.2 Special Matrix Transforms and Operations	37
3.3 Quaternions	44
3.4 Vertex Blending	53
3.5 Projections	57
4 Visual Appearance	67
4.1 Light Sources	67
4.2 Material	69
4.3 Lighting and Shading	70
4.4 Aliasing and Antialiasing	84
4.5 Transparency, Alpha, and Compositing	101
4.6 Fog	106
4.7 Gamma Correction	109
5 Texturing	117
5.1 Generalized Texturing	118
5.2 Image Texturing	129
5.3 Texture Caching and Compression	141

5.4	Multipass Texture Rendering	144
5.5	Multitexturing	146
5.6	Texture Animation	147
5.7	Texturing Methods	148
6	Advanced Lighting and Shading	181
6.1	Radiometry and Photometry	182
6.2	Colorimetry	188
6.3	BRDF Theory	194
6.4	Implementing BRDFs	202
6.5	Vertex Shaders	213
6.6	Pixel Shading	220
6.7	Shading Languages	232
6.8	Motion Blur	236
6.9	Depth of Field	237
6.10	Reflections	238
6.11	Refractions	245
6.12	Shadows	248
6.13	Global Illumination	276
7	Non-Photorealistic Rendering	289
7.1	Toon Shading	290
7.2	Silhouette Edge Rendering	291
7.3	Other Styles	304
7.4	Lines	308
8	Image-Based Rendering	313
8.1	The Rendering Spectrum	313
8.2	Overview of Algorithms	314
8.3	Billboarding	318
8.4	Lens Flare and Bloom	329
8.5	Particle Systems	331
8.6	Depth Sprites	332
8.7	Hierarchical Image Caching	334
8.8	Full-Screen Billboarding	337
8.9	Skyboxes	338
8.10	Fixed-View Effects	339
8.11	Image Processing	340
8.12	Volume Rendering	342

9	Acceleration Algorithms	345
9.1	Spatial Data Structures	346
9.2	Culling Techniques	357
9.3	Backface and Clustered Backface Culling	359
9.4	Hierarchical View Frustum Culling	363
9.5	Portal Culling	365
9.6	Detail Culling	368
9.7	Occlusion Culling	368
9.8	Level of Detail	389
9.9	Large Model Rendering	401
9.10	Point Rendering	401
10	Pipeline Optimization	405
10.1	Locating the Bottleneck	406
10.2	Performance Measurements	409
10.3	Optimization	410
10.4	Balancing the Graphics Pipeline	426
10.5	Multiprocessing	429
11	Polygonal Techniques	437
11.1	Sources of Three-Dimensional Data	438
11.2	Tessellation and Triangulation	440
11.3	Consolidation	447
11.4	Triangle Strips, Fans, and Meshes	454
11.5	Simplification	468
12	Curves and Curved Surfaces	481
12.1	Parametric Curves	482
12.2	Parametric Curved Surfaces	496
12.3	Efficient Tessellation	512
12.4	Implicit Surfaces	526
12.5	Subdivision Curves	527
12.6	Subdivision Surfaces	531
13	Intersection Test Methods	557
13.1	Hardware-Accelerated Picking	558
13.2	Definitions and Tools	559
13.3	Bounding Volume Creation	564
13.4	Rules of Thumb	567
13.5	Ray/Sphere Intersection	568
13.6	Ray/Box Intersection	572
13.7	Ray/Triangle Intersection	578

13.8	Ray/Polygon Intersection	582
13.9	Plane/Box Intersection Detection	586
13.10	Triangle/Triangle Intersection	590
13.11	Triangle/Box Overlap	596
13.12	BV/BV Intersection Tests	598
13.13	View Frustrum Intersection	606
13.14	Shaft/Box and Shaft/Sphere Intersection	614
13.15	Line/Line Intersection Tests	616
13.16	Intersection Between Three Planes	619
13.17	Dynamic Intersection Testing	620
14	Collision Detection	631
14.1	Collision Detection with Rays	633
14.2	Dynamic CD using BSP Trees	634
14.3	General Hierarchical Collision Detection	640
14.4	OBBTree	645
14.5	<i>k</i> -DOPTree	649
14.6	A Multiple Objects CD System	653
14.7	Miscellaneous Topics	657
15	Graphics Hardware	669
15.1	Buffers and Buffering	669
15.2	Perspective-Correct Interpolation	680
15.3	Architecture	682
16	The Future	709
16.1	Everything Else	709
16.2	You	711
A	Some Linear Algebra	715
A.1	The Euclidean Space	715
A.2	Geometrical Interpretation	718
A.3	Matrices	723
A.4	Homogeneous Notation	731
A.5	Geometry	732
B	Trigonometry	739
B.1	Definitions	739
B.2	Trigonometric Laws and Formulae	741
	References	747
	Index	809
