

# RELAXATION IN GLASS AND COMPOSITES

GEORGE W. SCHERER

*Research and Development Division  
Corning Glass Works  
Corning, New York*

KRIEGER PUBLISHING COMPANY  
MALABAR, FLORIDA  
1992

# Contents

## **1 The Glass Transition 1**

### **PART 1 VISCOELASTICITY IN OXIDE GLASSES**

- 2 Elasticity and Viscoelasticity 19**
- 3 Linear Viscoelastic Behavior in Oxides 29**
- 4 Experimental Studies of Relaxation and Creep 41**
- 5 Thermorheological Simplicity 52**
- 6 Unstabilized Glass 66**
- 7 The Viscoelastic Analogy 75**
- 8 The Sandwich Seal 94**

### **PART 2 STRUCTURAL RELAXATION**

- 9 Fictive Temperature 113**
- 10 Phenomenological Model of Structural Relaxation 130**
- 11 The Structural Relaxation Time 146**
- 12 Universality of Glass Transition Phenomena 162**

## PART 3 RELAXATION IN COMPOSITES

- 13 Relaxation in the Sandwich Seal 177
- 14 Composite Cylinder 195
- 15 Composite Sphere 223
- 16 Split Ring Composite 238
- 17 Interrelating Setting Temperatures 258
- 18 Elastic-Clad Composites 267
- 19 Glass-to-Glass Composites 281
- 20 Approximate Methods of Viscoelastic Analysis 295

## APPENDICES

- A Laplace Transform 306
- B Numerical Evaluation of Stresses 312
- Author Index 321
- Subject Index 325
