

## TABLE OF CONTENTS

|                                                                | <u>Page</u> |
|----------------------------------------------------------------|-------------|
| ACKNOWLEDGMENT . . . . .                                       | iii         |
| NOTATION . . . . .                                             | ix          |
| LIST OF TABLES . . . . .                                       | xiii        |
| LIST OF FIGURES . . . . .                                      | xiv         |
| CHAPTER 1. INTRODUCTION . . . . .                              | 1           |
| 1.1 Background . . . . .                                       | 1           |
| 1.2 Problem Under Study . . . . .                              | 2           |
| 1.3 Objective of the Study . . . . .                           | 3           |
| 1.4 Scope of the Investigation . . . . .                       | 3           |
| CHAPTER 2. DEVELOPMENT OF PRESENT STATE OF KNOWLEDGE . . . . . | 5           |
| 2.1 Culvert, Pipe, and Tunnel Contribution . . . . .           | 5           |
| 2.1.1 Talbot, Cain, Marston . . . . .                          | 5           |
| 2.1.2 Spangler . . . . .                                       | 6           |
| 2.1.3 Watkins . . . . .                                        | 7           |
| 2.1.4 Schafer, Barnard, White . . . . .                        | 8           |
| 2.1.5 Meyerhof . . . . .                                       | 9           |
| 2.1.6 Large Field Structures . . . . .                         | 9           |
| 2.2 Protective Structures Research . . . . .                   | 10          |
| 2.2.1 Dynamic Theory . . . . .                                 | 10          |
| 2.2.2 Static Theory . . . . .                                  | 11          |
| 2.2.3 Ultimate Strength Laboratory Tests . . . . .             | 11          |
| 2.2.4 Nondestructive Laboratory Tests . . . . .                | 12          |
| 2.2.5 Full Scale Tests . . . . .                               | 13          |
| 2.3 Similitude Studies . . . . .                               | 13          |
