Good text, it brings a lot of information, but it is small, since this text corresponds to a review. Also, it should be more detailed and organized. The author has gathered all the information and approaches it together. My suggestion would be to include more topics, for example, explain the importance of coffee to Ethiopia, highlight and emphasize the problem to be solved with technology, and better support how to promote this change and improvement. Overall, I see a good text with potential, but for a review, I believe it lacks more information and organization through topics.
