The topic of the paper is very interesting, especially since more and more countries are facing with the problem of sugar-sweetened beverages (SSB) consumption. The authors provided to scientific literature very interesting results for the application of an SSB tax in Indonesia. In order to improve the quality of the paper, authors should add following:

1. In the introduction - the contribution of the paper is missing.
2. In the discussion - the limitation as well as recommendation for further research are missing parts. These elements should be added.

The general conclusion is that the paper should be published.
