ELSEVIER APPLIED SCIENCE
LONDON and NEW YORK

Contents

<i>Preface</i>	v
<i>List of Contributors</i>	xi
Structure and mechanical properties of model composite foods <i>M. L. Green, R. J. Marshall and K. R. Langley</i>	1
A feasibility study on the injection moulding of fruit gums at 85% solids <i>A. A. Collyer, M. J. Bennett, D. W. Clegg, C. R. Elson and S. A. Jones</i>	13
Expansion, colour and textural properties of extrusion-cooked fish/corn grit mixtures <i>A. J. Shah, G. E. Warburton, A. E. J. Morris, A. J. Rosenthal and J. Lamb</i>	27
Influence of a filler on the rheological and fracture properties of food materials <i>H. Luyten and T. van Vliet</i>	43
The rheology of food 'melts' and its application to extrusion processing <i>R. Parker, A.-L. Ollett, R. A. Lai-Fook and A. C. Smith</i>	57
Flow behaviour of commercial brewing yeast suspensions <i>R. A. Speers, T. D. Durance and M. A. Tung</i>	74
Blood viscosity characteristics and red cell aggregation <i>M. W. Rampling</i>	101
Developments in biopolymer gel rheology <i>J. R. Mitchell, S. E. Hill and R. O. Mannion</i>	113
Rheological behaviour of scleroglucan aqueous systems in the solution and gel domains <i>R. Lapasin, S. Pricl and P. Esposito</i>	122

The use of the TA.XT2 Texture Analyzer to quantify the staling effect of various bakery products	133
<i>T. Raven and B. T. Johnson</i>	
The ups and downs of baking bread (<i>Abstract</i>).	144
<i>H. R. Kerr</i>	
The rheological character of gluten	145
<i>T. R. Noel and G. J. Brownsey</i>	
Interrelation between the dynamic moduli and the relaxation modulus of rennet-induced skimmilk gels	155
<i>P. Zoon, B. De Cindio and T. van Vliet</i>	
The redispersibility of flocculated w/o emulsions.	163
<i>F. van Voorst Vader and M. Bak</i>	
Rheology of milk concentrations produced by ultrafiltration and the search for a model fluid	177
<i>S. H. Jones and W. M. Jones</i>	
Preliminary investigations into sugar replacement in cake batters	186
<i>I. M. C. Pateras, A. J. Rosenthal, K. F. Howells and V. M. M. Marshall</i>	
The rheology of yogurt.	196
<i>A. J. Steventon, C. J. Parkinson, P. J. Fryer and R. C. Bottomley</i>	
The surface shear rheology of aqueous solutions of gum acacia senegal in the presence of various second components	211
<i>C. A. Moules and B. Warburton</i>	
New aspects of die design for paste extrusion	219
<i>J. J. Benbow</i>	
Dynamic mechanical thermal analysis (DMTA) of food materials	231
<i>R. E. Wetton and R. D. L. Marsh</i>	
Extrusion of microcrystalline cellulose formulations	248
<i>C. L. Raines, J. M. Newton and R. C. Rowe</i>	
The influence of moisture content and particle size of barium sulphate on the extrusion properties of mixtures with microcrystalline cellulose	258
<i>A. H. Andersen and J. M. Newton</i>	

Surface shear rheological properties of hyaluronic acid solutions—metal ion effects (<i>Abstract</i>)	268
<i>H. R. Kerr</i>	
The rheological properties of bread dough and their relation to baking . . .	269
<i>D. W. de Bruijne, J. de Looff and A. van Eulen</i>	
Effects of rheological properties of simulated fermentation broths on flows in stirred bioreactors: a laser anemometry study	284
<i>E. Koutsakos and A. W. Nienow</i>	
The application of the Strathclyde Rheometer to a variety of curing systems	304
<i>S. Affrossman, D. Hayward, A. McKee, A. MacKinnon, D. Lairez, R. A. Pethrick, A. Vatalis, F. S. Baker and R. E. Carter</i>	
Use of a potential energy model to describe the stress relaxation process . .	315
<i>G. Atkin</i>	
Results obtained using controlled stress oscillation on some difficult pastes (<i>Abstract</i>)	330
<i>H. Schimanski</i>	
The application of oscillatory testing to bovine and caprine yoghurt gel systems	331
<i>I. Vlahopoulou and A. E. Bell</i>	
<i>Index</i>	335
