

PROCEEDINGS OF ESREL 2003, EUROPEAN SAFETY AND RELIABILITY
CONFERENCE 2003, 15–18 JUNE 2003, MAASTRICHT, THE NETHERLANDS

Safety and Reliability

Edited by

T. Bedford

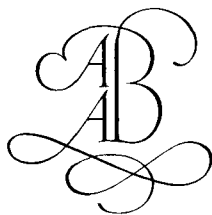

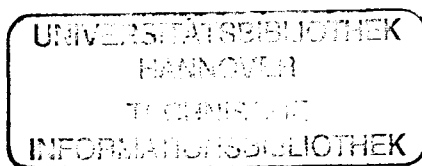

Management Science Department, University of Strathclyde, Glasgow, Scotland

P.H.A.J.M. van Gelder

Faculty of Civil Engineering and Geosciences,

Delft University of Technology, Delft, The Netherlands

Volume 2

A.A. BALKEMA PUBLISHERS LISSE / ABINGDON / EXTON (PA) / TOKYO

Using HAZOP for assessing road safety measures and new technology <i>H.M. Jagtman, T. Heijer & A.R. Hale</i>	853
Evaluation of tunnel safety and cost effectiveness of measures <i>S.N. Jonkman, J.K. Vrijling, P.H.A.J.M van Gelder & B. Arends</i>	863
Inspection and maintenance decisions based on imperfect inspections <i>M.J. Kallen & J.M. van Noortwijk</i>	873
A proposal for managing and engineering knowledge of stochastics in the quality movement <i>Ron S. Kenett, M.F. Ramalhoto & John Shade</i>	881
Comparison of data representation tools for the analysis of complex time-dependant systems <i>C. Kermisch & P.E. Labeau</i>	889
A study of an expected RAW importance measure <i>Kilyoo Kim, M.J. Hwang & D.I. Kang</i>	897
Development of a full power risk monitoring system for the UCN 3, 4 nuclear power plants <i>S.H. Kim, S.C. Jang, K.Y. Kim & S.H. Han</i>	901
Analysis of a dynamic system with the stochastics module MCDET and the deterministic code MELCOR <i>M. Kloos, E. Hofer, B. Krzykacz-Hausmann, J. Peschke & M. Sonnenkalb</i>	907
Derivation of accident sequence conditions for complex systems using global system behavior model <i>T. Kohda & K. Inoue</i>	915
A simple method to evaluate system failure occurrence probability using minimal cut sets <i>T. Kohda & K. Inoue</i>	923
Uncertainty analysis of river flood management in the Netherlands <i>M. Kok, J.W. Stijnen & W. Silva</i>	927
Reliability and availability evaluation of systems related to their operation processes <i>K. Kolowrocki</i>	937
Modelling NH ₃ -outflow out of sea-going vessels <i>F. Kootstra</i>	947
Coping with uncertainty in sewer system rehabilitation <i>H. Korving, J.M. van Noortwijk, P.H.A.J.M. van Gelder & R.S. Parkhi</i>	959
How to approach modelling in a risk analysis <i>V. Kristensen & T. Aven</i>	969
Availability modelling of the 3GPP R99 telecommunication networks <i>Dhananjay Kumar, Akiyoshi Miyabayashi & Ojala Kari</i>	977
Author index	985

Volume II

Benchmark risk analysis models used in the Netherlands <i>G.M.H. Laheij, B.J.M. Ale & J.G. Post</i>	993
Implementing a three-dimensional stochastic model of the subsurface in current geotechnical design methods <i>G. de Lange, B.B.T. Wassing & J.G. Veldkamp</i>	999

Reliability analysis of flood defence systems in the Netherlands <i>B.L. Lassing, A.C.W.M. Vrouwenvelder & P.H. Waarts</i>	1005
Application of response surfaces for reliability analysis of marine structures <i>Bernt J. Leira, Tore Holmås & Kjell Herfjord</i>	1015
Investigating effects of volume of mechanical components on structure reliability <i>Jian-Ping Li & Graham Thompson</i>	1025
An application of ARIPAR methodology to manage the risk and the environment impact in the industrial area of Gela <i>Roberto Lisi, Maria Francesca Milazzo & Giuseppe Maschio</i>	1031
Managing a new product development using the reliability and quality matrix <i>G. Loke, J. Boersma, H.T. Loh, Y. Lu & A.C. Briombacher</i>	1041
Library prototype for reliable distributed system <i>Yongyut Luansritisakul, Tiranee Achalakul & Naruemon Wattanapongsakorn</i>	1047
Quantitative flood risk assessment for polders <i>Sipke E. van Manen & Martine Brinkhuis</i>	1053
What the management of industrial risk has to say about health care risk management <i>Nathalie de Marcellis-Warin</i>	1061
Fuzzy logic: a modelling tool for transient diagnostics <i>M. Marseguerra, E. Zio & P. Baraldi</i>	1069
Sensitivity analysis in Monte Carlo simulation fo dependability analysis <i>M. Marseguerra & E. Zio</i>	1077
A fuzzy model for the estimate of the accident rate in road transport of hazardous materials <i>M. Marseguerra, E. Zio & M. Bianchi</i>	1085
An approach to aggregate public opinions and experts' judgement with application to risk perception of sources of electrical supply <i>S. Martorell, S. Carlos, A. Sánchez & D. Ginestar</i>	1093
On the need of considering the risk dimension in electrical supply capacity planning <i>S. Martorell, S. Carlos, A. Sánchez & D. Ginestar</i>	1099
Exploratory data analysis approaches to reliability: some new directions <i>Chris McCollin, Cornel Bunea & Maria Ramalhoto</i>	1105
Implementation of a reliability database within a medium sized defence and aerospace company <i>G.J. McDonald, J.G. Norstrøm, H.G. Madsen & T. Bedford</i>	1113
Application of quantitative risk assessment in various industrial sectors <i>S. Medonos</i>	1121
Improvement of rule sets for quantitative risk assessment in various industrial sectors <i>S. Medonos</i>	1129
Multi-Physics Analysis – A Method for the Design of Safe Pressurised Systems to Resist Accidental Fire <i>S. Medonos</i>	1137
Using expert-opinions, retro-analyzes and experience feedback to risk-analysis and risk-hierarchization. Application to the Lorraine ferriferous basin (France) <i>M.M. Merad, B. Roy, T. Verdel, R. Salmon & S. Kouniali</i>	1145
A model simulating combustion of solids and its use in fire analysis with the code ECART <i>S. Milanolo, L. Marmo, F. Parozzi, R. Fontana & E. Salina</i>	1153

Economic accidental risk analysis. Experience from real life projects <i>E.F. Nilsen</i>	1161
Comparison of techniques for accident scenario analysis in hazardous systems <i>Z.S. Nivolianitou & M. Konstantinidou</i>	1167
Bayesian computation of design discharges <i>J.M. van Noortwijk, H.J. Kalk & E.H. Chbab</i>	1179
Risk optimization on CAREM-25 NPP <i>J.E. Núñez McLeod & J.H. Barón</i>	1189
Experience with complex technical and organizational changes in the offshore petroleum industry <i>K. Øien, G. Guttormsen, S. Hauge, S. Sklet, T. Steiro & J. Monsen</i>	1197
Effect of a concrete wall in the limitation of thermal radiation resulting from large industrial fires <i>I.A. Papazoglou, O.N. Aneziris & G. Bonanos</i>	1205
Improving the reliability of a SMPS by HALT and ALT <i>S.J. Park, Y.R. Jo, S.D. Park & J.G. Kwon</i>	1211
Practical reliability assurance through modelling and DRACAS <i>J.J. Pearce</i>	1215
Determination of marginal reliability indices in a distribution network <i>Damir Pečvarac</i>	1219
Study of the increases of dose and of the mortality index caused by a fire due to the presence of the paving <i>A. Pelliccioni & F. Altavilla</i>	1227
A model to predict hurricanes induced losses for residential structures <i>Jean-Paul Pinelli, Chelakara. Subramanian, Liang Zhang, Kurtis Gurley, Anne Cope, Emil Simiu, Sofia Diniz & Shahid Hamid</i>	1233
A mixed integer optimisation model for preventive maintenance of production plants <i>N. Pixopoulou & L.G. Papageorgiou</i>	1241
ARAMIS project: the severity index <i>E. Planas, J. Casal, C. Delvosalle, C. Fiévez & A. Pipart</i>	1247
On the influence of passive states on the availability of mechanical systems <i>P. Pozsgai & B. Bertsche</i>	1255
Risk to old bridges due to ship impact on German inland waterways <i>D. Proske & M. Curbach</i>	1263
Integrated navigation system – safety prediction model for ship retrofit strategy <i>A. Raffetti, C. Venturino, F. Zuccarelli, E.S. Petersen, D.V. Lyridis, H.N. Psaraftis & N.P. Ventikos</i>	1271
On modelling reliability properties in descriptor form <i>U.K. Rakowsky & I. Pabst</i>	1281
A scheme for industry-academia interaction to enhance research and development issues <i>M.F. Ramalhoto, R. Göb, Antonio Pievatolo, Oystein Evandt & Jukka Salmikuukka</i>	1289
Optimal redundancy allocation for systems considering common-cause failures <i>Jose Ramirez-Marquez, David W. Coit & Naruemon Wattanapongsakorn</i>	1295
Proposal for a neural network approach and ordering heuristic for the fault tree evaluation <i>D. Renaux, J. Beugin & L. Cauffriez</i>	1301
Application of functional hazard assessment in railway signalling <i>Frank Renpenning, Jens Braband & Sten Wery</i>	1307

Aviation causal model using Bayesian Belief Nets to quantify management influence <i>A.L.C. Roelen, R. Wever, R.M. Cooke, R. Lopuhaä, A.R. Hale & L.H.J. Goossens</i>	1315
Causal modeling for integrated safety at airports <i>A.L.C. Roelen, R. Wever, A.R. Hale, L.H.J. Goossens, R.M. Cooke, R. Lopuhaä, M. Simons & P.J.L. Valk</i>	1321
Assessing part conformance by coordinate measuring machines <i>D. Romano & G. Vicario</i>	1329
Hazardous materials release analysis: probabilistic input for emergency response organisations <i>N. Rosmuller & P.H.A.J.M. van Gelder</i>	1337
On a Bayesian model for failures prediction in underground trains <i>Fabrizio Ruggeri, Antonio Pievatolo & Raffaele Argiento</i>	1345
Attuning the task design to “envisioned” high-demand situations <i>J.A. Rypkema, M.A. Neerinx & P.O. Passenier</i>	1351
Risk analysis of Black Sea underwater passage of Russia-Turkey trunk gas pipeline system <i>V. Safonov, G. Odisharia, A. Edigarov, E. Sheberstov, V. Suleimanov & S. Ovtcharov</i>	1357
The use of probit functions in the quantitative risk assessment of domino accidents caused by overpressure <i>E. Salzano & V. Cozzani</i>	1365
Application of sensitivity analysis for a risk analysis tool for blowouts <i>M. Sandøy, T. Aven & Ø. Arild</i>	1375
The new Dutch “Register for risk situations involving hazardous substances” <i>J.P. van 't Sant, J.G. Post, P.H. Bottelberghs & F.J. Krijnen</i>	1383
Boiler plant hazard assessment – a new requirement of the Finnish pressure equipment legislation <i>J. Sarsama, M. Reunanen & M. Maskuniitty</i>	1389
Apportionment of safety integrity levels in complex electronically controlled systems <i>Hendrik Schäbe</i>	1395
A design methodology for embedded control systems including safety assessment studies <i>R. Schoenig, J.F. Aubry, T. Hutinet & E. Guilhem</i>	1401
Criteria for safety culture assessment in German Nuclear Power Plants <i>H. Schott, H.P. Berg, H.-P. Balfanz & B. Linsenmaier</i>	1409
Replacement strategies of large numbers of similar components in hydraulic structures <i>S.P.F. Schouten, P.H.A.J.M. van Gelder & H.J. van der Graaf</i>	1415
System reliability methods using advanced sampling techniques <i>L. Schueremans & D. Van Gemert</i>	1425
Effect of soil-structure models on stochastic response of jack-up platforms <i>N. Shabakhty & M. Daghigh</i>	1433
System reliability of jack-up structures based on fatigue degradation <i>N. Shabakhty, H. Boonstra & P. Van Gelder</i>	1437
Correlation in probabilistic safety assessment uncertainty analysis <i>Z. Šimić, I. Vuković & V. Mikulić</i>	1447
Experience with the use of risk assessment in IMO <i>Rolf Skjong</i>	1453
Criteria for establishing risk acceptance <i>Rolf Skjong</i>	1461

Risk assessment of passenger vessels <i>H. Soma, S. Haugen & B. Øygarden</i>	1469
Measuring the safety standard of organizations <i>T. Soma</i>	1477
Application of a Bayesian approach to sequential life testing with an underlying Weibull model <i>D.I. De Souza Jr.</i>	1487
Establishing steel rail reliability by combining fatigue tests, factorial experiments and data transformations <i>D.J. Stewardson, M.F. Ramalhoto, L.F.M. da Silva & L. Drewett</i>	1497
Improved methods of power systems availability indices determination <i>M. Stojkov, S. Nikolovski & I. Mravak</i>	1503
The safety of risk or the risk of safety? <i>S.I. Suddle & P.H. Waarts</i>	1511
Safety assessment of third parties during construction in multiple use of space using Bayesian Networks <i>S.I. Suddle</i>	1519
A logarithmic approach for individual risk: the safety-index <i>S.I. Suddle</i>	1527
Reduced vertical separation minimum (RVSM): pre- and post-implementation safety cases <i>Bernd Tiemeyer</i>	1535
Assessment of the environment vulnerability in the surroundings of an industrial site <i>J. Tixier, A. Dandrieux, G. Dusserre, R. Bubbico, L.G. Luccone, B. Silveti, R. Carta, B. Mazzarotta, S. Di Cave, E. Hubert, N. Rodrigues, O. Salvi & D. Gaston</i>	1543
Increasing of the electric safety in HV systems by means of the ground resistance of the body <i>R. Tommasini & R. Pertusio</i>	1553
A Safety Program Framework and its application on a Weapon Control System <i>Arild Tomter</i>	1561
Cognitive analysis in human reliability: the case of a high-risk plant <i>M. Tucci, A. Bellucci, I. Cappelli & L. Giagnoni</i>	1567
Draft european standard on safety risk assessment for space missions <i>R. Tuominen, C. Preyssl, I. Jenkins, P. Pearson, J. Lenic, G. Canepa, G. Morelli & T. Bedford</i>	1575
Extended stochastic petri nets in power systems maintenance models <i>A.P. Ulmeanu, D.C. Ionescu & A.C. Constantinescu</i>	1581
An implementation of a life-cycle risk-based design for safety methodology <i>D. Vassalos & D. Konovessis</i>	1587
Availability and failure intensity under imperfect repair virtual age model <i>J.K. Vaurio</i>	1595
Quantification and uncertainties of common cause failure rates and probabilities <i>J.K. Vaurio</i>	1601
Risk assessment for offshore installations in the operational phase <i>J.E. Vinnem, T. Aven, H. Hundseid, K-A. Vassmyr, F. Vollen & K. Øien</i>	1607
Structured approach to risk indicators for major hazards <i>J.E. Vinnem, T. Aven, M. Sørum & K. Øien</i>	1615
A contribution to vehicle life cycle cost modelling <i>Z. Vintr & R. Holub</i>	1623

Method for correlation of failure data from durability tests and field of automotive engine parts with spontaneous failure mode <i>M. Vogt & H.R. Neu</i>	1629
Time-dependent reliability analysis of coastal flood defence systems <i>H.G. Voortman & J.K. Vrijling</i>	1637
Adding a new perspective to the existing results by baseline NPP PSA model: parameters uncertainty implementation <i>Ivan Vrbanić & Romana Jordan Cizelj</i>	1645
Impact of river morphology on extreme flood level prediction: a probabilistic approach <i>S. van Vuren, M. Kok & S.J. Ouwerkerk</i>	1653
Efficiency and accuracy of Monte Carlo (importance) sampling <i>P.H. Waarts</i>	1663
Optimizing software system design with recovery blocks considering reliability estimation uncertainty <i>N. Wattanapongsakorn, D.W. Coit</i>	1671
The fireworks disaster in Enschede: overview, reconstruction, safety and pyrotechnics <i>J. Weerheijm, R.M.M. van Wees, L.H.J. Absil, P.C.A.M. de Bruyn & J.W. Karelse</i>	1679
Consequence modelling of gas explosion scenarios in traffic tunnels <i>J. Weerheijm, A.C. van den Berg & N.H.A. Versloot</i>	1691
Scenario analysis for road tunnels <i>D. de Weger</i>	1699
Risk based maintenance of civil structures <i>G.H. Wijnants</i>	1707
Modelling a probabilistic safety management system for the Eastern-Scheldt storm-surge barrier, the basin and the surrounding dikes <i>A. Willems & P.B. Webbers</i>	1713
Reliability of vibration predictions in civil engineering applications <i>M.S. de Wit, P.H. Waarts, P. Holscher, H.G. Stuit</i>	1721
The development of software tools for chemical process quantitative risk assessment over two decades <i>DRE Worthington & NJ Cavanagh</i>	1729
Introduction of an easy-to-use risk assessment tool for natural gas transmission pipelines <i>Jeroen Zanting, Johan Duinkerken, Robert Kuik, Rein Bolt & Eric Jager</i>	1737
Towards a qualitative predictive model of violation in transportation industry <i>Z. Zhang, P. Polet & F. Vanderhaegen</i>	1743
Measuring the reliability importance of components in multi-state systems <i>E. Zio & L. Podofillini</i>	1753
Probabilistic aspects of maritime transport of tunnel elements <i>T.J. Zitman</i>	1761
Foundations of the UPM common cause method <i>Athena Zitrou & Tim Bedford</i>	1769
Author index	1777
