Preface	xxiii
Acknowledgments	xxv
Introduction	xxvii
Part One Short-Term Scheduling in Supply Chains	1
1. Scheduling of Flexible Flow Shops	3
<hr/>	
1.1 Introduction	3
1.2 Mixed Integer Programs for Scheduling Flow Shops	4
1.3 Constructive Heuristics for Scheduling Flexible Flow Shops	19
1.4 Scheduling Flow Shops with Limited Machine Availability	30
1.5 Computational Examples	32
1.6 Comments	37
Exercises	40
2. Scheduling of Surface Mount Technology Lines	41
<hr/>	
2.1 Introduction	41
2.2 SMT Line Configurations	42
2.3 General Scheduling of SMT Lines	45
2.4 Batch Scheduling of SMT Lines	51
2.5 An Improvement Heuristic for Scheduling SMT Lines	54

2.6 Computational Examples 60
2.7 Comments 69
Exercises 70

3. Balancing and Scheduling of Flexible Assembly Lines 71

3.1 Introduction 71
3.2 Balancing and Scheduling of Flexible Assembly Lines with Infinite
In-Process Buffers 72
3.3 Balancing and Scheduling of SMT Lines 83
3.4 Comments 97
Exercises 97

4. Loading and Scheduling of Flexible Assembly Systems 99

4.1 Introduction 99
4.2 Loading and Scheduling of Flexible Assembly Systems with Single
Stations and Infinite In-Process Buffers 100
4.3 Loading and Scheduling of Flexible Assembly Systems with Parallel
Stations and Finite In-Process Buffers 110
4.4 Comments 125
Exercises 130

Part Two Medium-Term Scheduling in Supply Chains 131

**5. Customer Order Acceptance and Due Date Setting in Make-to-Order
Manufacturing 133**

5.1 Introduction 133
5.2 Problem Description 134
5.3 Bi-Objective Order Acceptance and Due Date Setting 137
5.4 Lexicographic Approach 141
5.5 Scheduling of Customer Orders 144
5.6 Computational Examples 148
5.7 Comments 158
Exercises 159

**6. Aggregate Production Scheduling in Make-to-Order
Manufacturing 161**

6.1 Introduction 161
6.2 Problem Description 163
6.3 Bi-Objective Scheduling of Customer Orders 165
6.4 Multi-Objective Scheduling of Customer Orders 171
6.5 Scheduling of Single-Period Customer Orders 187

6.6	Comments	212
	Exercises	216

7. Reactive Aggregate Production Scheduling in Make-to-Order Manufacturing **219**

7.1	Introduction	219
7.2	Problem Description	220
7.3	Mixed Integer Programs for Reactive Scheduling	221
7.4	Rescheduling Algorithms	224
7.5	Input and Output Inventory	227
7.6	Computational Examples	229
7.7	Comments	236
	Exercises	236

8. Scheduling of Material Supplies in Make-to-Order Manufacturing **239**

8.1	Introduction	239
8.2	Flexible vs. Cyclic Material Supplies	241
8.3	Model Enhancements	244
8.4	Computational Examples	248
8.5	Comments	256
	Exercises	257

9. Selection of Static Supply Portfolio in Supply Chains with Risks **259**

9.1	Introduction	259
9.2	Selection of a Supply Portfolio without Discount under Operational Risks	261
9.3	Selection of Supply Portfolio with Discount under Operational Risks	266
9.4	Computational Examples	269
9.5	Selection of Supply Portfolio under Disruption Risks	272
9.6	Single-Objective Supply Portfolio under Disruption Risks	274
9.7	Bi-Objective Supply Portfolio under Disruption Risks	279
9.8	Computational Examples	280
9.9	Comments	289
	Exercises	291

10. Selection of a Dynamic Supply Portfolio in Supply Chains with Risks **293**

10.1	Introduction	293
10.2	Multiperiod Supplier Selection and Order Allocation	294
10.3	Selection of a Dynamic Supply Portfolio to Minimize Expected Costs	297

10.4	Selection of a Dynamic Supply Portfolio to Minimize Expected Worst-Case Costs	301
10.5	Supply Portfolio for Best-Case and Worst-Case TDN Supplies	302
10.6	Computational Examples	306
10.7	Comments	315
	Exercises	316

Part Three Coordinated Scheduling in Supply Chains 319

11. Hierarchical Integration of Medium- and Short-Term Scheduling 321

11.1	Introduction	321
11.2	Problem Description	322
11.3	Medium-Term Production Scheduling	325
11.4	Short-Term Machine Assignment and Scheduling	330
11.5	Computational Examples	335
11.6	Comments	348
	Exercises	349

12. Coordinated Scheduling in Supply Chains with a Single Supplier 351

12.1	Introduction	351
12.2	Problem Description	352
12.3	Supply Chain Inventory	354
12.4	Coordinated Supply Chain Scheduling: An Integrated Approach	359
12.5	Coordinated Supply Chain Scheduling: A Hierarchical Approach	362
12.6	Computational Examples	366
12.7	Comments	375
	Exercises	376

**13. Coordinated Scheduling in Supply Chains with
Assignment of Orders to Suppliers 379**

13.1	Introduction	379
13.2	Problem Description	380
13.3	Conditions for Feasibility of Customer Due Dates	383
13.4	Coordinated Supply Chain Scheduling: An Integrated Approach	385
13.5	Selected Multi-Objective Solution Approaches	392
13.6	Coordinated Supply Chain Scheduling: A Hierarchical Approach	393
13.7	Computational Examples	401
13.8	Comments	408
	Exercises	409

14. Coordinated Scheduling in Supply Chains without Assignment of Orders to Suppliers	411
14.1 Introduction	411
14.2 Problem Description	412
14.3 Coordinated Supply Chain Scheduling: An Integrated Approach	413
14.4 Selected Bi-Objective Solution Approaches	418
14.5 Coordinated Supply Chain Scheduling: A Hierarchical Approach	419
14.6 Computational Examples	425
14.7 Comments	433
Exercises	434
References	437
Index	449
