Authors

Onsrud, Harlan J.
Johnson, Jeffrey
Lopez, Xavier (editors)

Publication Date

1994

**Selected Bibliography
on
Law, Information Policy, and
Spatial Databases**

Compiled by:

**Harlan J. Onsrud
Jeffrey Johnson
Xavier Lopez**

**Department of Surveying Engineering
University of Maine
Orono, Maine 04469-5711**

**National Center for Geographic Information and Analysis
Report 94-2**

Preface

This selected bibliography has been prepared as part of the preparation for an NCGIA Initiative on Law, Information Policy, and Spatial Databases. Articles have been placed within one of the following categories:

1. Freedom of Information, Open Records, and Government Charges for Information
2. Privacy
3. Copyright, Patent, and Trade Secrets
4. Computer Contracts, Licensing, Electronic Document Interchange, and Encryption
5. Liability and Admissibility
6. General Books, Articles, and Bibliographies

In order to avoid duplication, articles that address issues under more than one of the categories have been included in the bibliography under their primary theme.

Although numerous articles in some of the categories covered by this bibliography are contained in the popular and general academic literature, this bibliography has focused on inclusion of articles contained in the law literature and GIS literature. We have also avoided references to specific court cases and legislation in the bibliography.

The electronic form of the bibliography is available in formats appropriate for use with most desk top bibliographic software programs. Copies may be obtained by anonymous FTP at [grouse.umesve.maine.edu](ftp://grouse.umesve.maine.edu/pub/NCGIA/I16-Legal) under the directory `\pub\NCGIA\I16-Legal`. Gopher users should point to the above address, but look under the folders "National Center for Geographic Information and Analysis" and "I16-Legal."

Table of Contents

Chapter

1. Freedom of Information, Open Records, and Government Charges for Information
2. Privacy
3. Copyright, Patents, and Trade Secrets
4. Computer Contracts, Licensing, Electronic Document Interchange, and Encryption
5. Liability and Admissibility of Computer Evidence
6. General Books, Articles, and Bibliographies
