# Contents

<i>Preface</i>	vii
1. Introduction	1
2. Automatic theorem proving	5
2.1 History . . . . .	5
2.2 Basic notions from algebra . . . . .	6
2.3 Automatic theorem proving . . . . .	11
2.4 Automatic derivation . . . . .	19
2.5 Automatic discovery . . . . .	23
3. Generalization of the formula of Heron	33
3.1 Area of a polygon . . . . .	34
3.1.1 Formula of Staudt . . . . .	35
3.1.2 Area of a pentagon and hexagon . . . . .	38
3.2 Area of a cyclic polygon . . . . .	40
3.2.1 Formula of Ptolemy . . . . .	41
3.2.2 Formula of Heron . . . . .	47
3.2.3 Formula of Brahmagupta . . . . .	48
3.2.4 Area of a cyclic pentagon . . . . .	54
3.2.5 Radius of a cyclic pentagon . . . . .	59
3.2.6 Area of a cyclic hexagon . . . . .	61
3.3 Final remarks . . . . .	63
4. Simson–Wallace theorem	65
4.1 Gergonne’s generalization . . . . .	69

4.2	Generalization of Guzmán . . . . .	72
4.3	Generalization to three dimensions . . . . .	78
4.3.1	Generalization on a tetrahedron . . . . .	78
4.3.2	Generalization on a skew quadrilateral . . . . .	84
5.	Transversals in a polygon . . . . .	91
5.1	Theorem of Ceva . . . . .	92
5.1.1	Generalization of the theorem of Ceva . . . . .	98
5.2	Menelaus' theorem . . . . .	103
5.2.1	Generalization of Menelaus' theorem . . . . .	105
5.2.2	Generalization of Menelaus' theorem in space . . . . .	109
5.3	Theorem of Euler . . . . .	112
5.3.1	Spatial analogue of Euler's theorem . . . . .	118
5.4	Routh's theorem . . . . .	121
6.	Petr–Douglas–Neumann theorem . . . . .	127
6.1	Napoleon's theorem . . . . .	127
6.1.1	Topics related to Napoleon's theorem . . . . .	136
6.1.2	Kiepert hyperbola . . . . .	139
6.1.3	Generalization of Napoleon's theorem . . . . .	142
6.2	PDN theorem for a quadrilateral . . . . .	148
6.2.1	Theorem of Finney . . . . .	148
6.2.2	Thébault's theorem . . . . .	150
6.2.3	Theorem of Van Aubel . . . . .	152
6.3	PDN theorem in space . . . . .	159
6.3.1	Douglas' pentagon . . . . .	159
7.	Geometric inequalities . . . . .	163
7.1	Inequality between the diagonals of an $n$ -gon . . . . .	164
7.1.1	Parallelogram law . . . . .	164
7.1.2	Case of a quadrilateral . . . . .	169
7.1.3	General case . . . . .	173
7.2	Neuberg–Pedoe inequality . . . . .	174
7.3	Wirtinger's inequality . . . . .	175
7.4	Sum of squares inequality . . . . .	178
7.5	Isoperimetric inequality . . . . .	181
7.6	Euler's inequality . . . . .	183

8.	Regular polygons	187
8.1	Planarity of a regular pentagon . . . . .	189
8.2	Regular heptagon . . . . .	195
9.	Miscellaneous	203
9.1	Non-elementary constructions . . . . .	203
9.2	Loci of points of given properties . . . . .	211
9.3	Theorem of Viviani . . . . .	214
9.4	Gauss' line . . . . .	218
9.5	Most common problems . . . . .	221
	<i>Conclusion</i>	225
	<i>Bibliography</i>	227
	<i>Index</i>	235
