Gainesville, Florida*

Plenum Press • New York and London

Contents

CHAPTER 1. Classification of Solids and Crystal Structure

1.1. Introduction	1
1.2. The Bravais Lattice	2
1.3. The Crystal Structure	5
1.4. Miller Indices and the Unit Cell.....	6
1.5. The Reciprocal Lattice and Brillouin Zone	8
1.6. Types of Crystal Bindings	11
1.7. Defects in a Crystalline Solid	13
1.7.1. Vacancies and Interstitials	13
1.7.2. Line and Surface Defects	16
Problems	18
Bibliography	18

CHAPTER 2. Lattice Dynamics

2.1. Introduction	21
2.2. The One-Dimensional Linear Chain	22
2.3. Dispersion Relation for a Three-Dimensional Lattice	27
2.4. Concept of Phonons.....	29
2.5. The Density of States and Lattice Spectrum	30
2.6. Lattice Specific Heat	32
2.7. Elastic Constants and Velocity of Sound	35
Problems	37
References	39
Bibliography	39

CHAPTER 3. Semiconductor Statistics

3.1. Introduction	41
3.2. Maxwell-Boltzmann (M-B) Statistics	42
3.3. Fermi-Dirac (F-D) Statistics	45

3.4. Bose–Einstein (B–E) Statistics	50
3.5. Statistics in the Shallow-Impurity States	52
Problems	53
Bibliography	54

CHAPTER 4. Energy Band Theory

4.1. Introduction	55
4.2. The Bloch–Floquet Theorem	56
4.3. The Kronig–Penney Model	57
4.4. The Nearly-Free Electron Approximation	62
4.5. The Tight-Binding (LCAO) Approximation	68
4.5.1. The Simple Cubic Lattice	71
4.5.2. The Body-Centered Cubic Lattice (the <i>s</i> -like states)	72
4.6. Energy Band Structures for Semiconductors	73
4.7. The Effective Mass Concept	78
4.8. Energy Band Structure and Density of States in a Superlattice	80
Problems	83
References	85
Bibliography	85

CHAPTER 5. Equilibrium Properties of Semiconductors

5.1. Introduction	87
5.2. Densities of Electrons and Holes in a Semiconductor	88
5.3. Intrinsic Semiconductors	94
5.4. Extrinsic Semiconductors	96
5.5. Ionization Energy of a Shallow Impurity Level	102
5.6. Hall Effect, Hall Mobility, and Electrical Conductivity	104
5.7. Heavy Doping Effects in a Degenerate Semiconductor	107
Problems	109
Reference	111
Bibliography	111

CHAPTER 6. Excess Carrier Phenomenon in Semiconductors

6.1. Introduction	113
6.2. Nonradiative Recombination: Shockley–Read–Hall Model	114
6.3. Band-to-Band Radiative Recombination	118
6.4. Band-to-Band Auger Recombination	121
6.5. Basic Semiconductor Equations	124
6.6. Charge-Neutrality Conditions	126
6.7. The Haynes–Shockley Experiment	128
6.8. Minority Carrier Lifetimes and Photoconductivity Experiment	130
6.9. Surface States and Surface Recombination Velocity	135
6.10. Deep-Level Transient Spectroscopy (DLTS) Technique	138

6.11. Surface Photovoltage (SPV) Technique	141
Problems	143
References	145
Bibliography	145

CHAPTER 7. Transport Properties of Semiconductors

7.1. Introduction	147
7.2. Galvanomagnetic, Thermoelectric, and Thermomagnetic Effects	149
7.2.1. Electrical Conductivity σ_n	149
7.2.2. Electronic Thermal Conductivity K_n	151
7.2.3. Thermoelectric Coefficients	152
7.2.4. Galvanomagnetic and Thermomagnetic Coefficients	153
7.3. Boltzmann Transport Equation	155
7.4. Derivation of Transport Coefficients	156
7.4.1. Electrical Conductivity σ_n	158
7.4.2. Hall Coefficient R_H	161
7.4.3. Seebeck Coefficient S_n	164
7.4.4. Nernst Coefficient Q_n	164
7.4.5. Transverse Magnetoresistance	165
7.5. Transport Coefficients for the Mixed Conduction Case	169
7.5.1. Electrical Conductivity σ	169
7.5.2. Hall Coefficient R_H	169
7.5.3. Seebeck Coefficient S	170
7.5.4. Nernst Coefficient Q	171
7.6. Transport Coefficients for Some Semiconductors	171
Problems	179
References	181
Bibliography	181

CHAPTER 8. Scattering Mechanisms and Carrier Mobilities in Semiconductors

8.1. Introduction	183
8.2. Differential Scattering Cross Section	186
8.3. Ionized Impurity Scattering	189
8.4. Neutral Impurity Scattering	192
8.5. Acoustic Phonon Scattering	193
8.5.1. Deformation Potential Scattering	194
8.5.2. Piezoelectric Scattering	196
8.6. Optical Phonon Scattering	198
8.7. Scattering by Dislocations	200
8.8. Electron and Hole Mobilities in Semiconductors	201
8.9. Hot Electron Effects in a Semiconductor	204
Problems	209
References	210
Bibliography	211

CHAPTER 9. Optical Properties and Photoelectric Effects

9.1. Optical Constants of a Solid	214
9.2. Free-Carrier Absorption Process	219
9.3. Fundamental Absorption Process	222
9.3.1. Direct Transition Process	224
9.3.2. Indirect Transition Process	225
9.4. The Photoconductive Effect	228
9.4.1. Kinetics of Photoconduction	235
9.4.2. Practical Applications of Photoconductivity	237
9.5. The Photovoltaic (Dember) Effect	238
9.6. The Photomagnetolectric Effect	240
Problems	244
References	245
Bibliography	245

CHAPTER 10. Metal-Semiconductor Contacts

10.1. Introduction	247
10.2. Metal Work Function and Schottky Effect	248
10.3. Thermionic Emission Theory	249
10.4. Ideal Schottky Barrier Contact	252
10.5. Current Flow in a Schottky Barrier Diode	256
10.5.1. Thermionic Emission Model	257
10.5.2. Image Lowering Effect	258
10.5.3. The Diffusion Model	259
10.6. I-V Characteristics of a Silicon and a GaAs Schottky Diode	261
10.7. Determination of Barrier Height	264
10.8. Enhancement of Effective Barrier Height	269
10.9. Applications of Schottky Diodes	275
10.9.1. Photodetectors and Solar Cells	275
10.9.2. Schottky-Clamped Transistors	277
10.9.3. Microwave Mixers	278
10.10. Ohmic Contacts	279
Problems	284
References	285
Bibliography	285

CHAPTER 11. p-n Junction Diodes

11.1. Introduction	287
11.2. Equilibrium Properties of a p-n Junction Diode	287
11.3. p-n Junction Under Bias Conditions	293
11.4. Minority Carrier Distribution and Current Flow	296
11.5. Diffusion Capacitance and Conductance	301
11.6. Minority Carrier Storage and Transient Behavior	304
11.7. Zener and Avalanche Breakdowns	307
11.8. Tunnel Diode	312
11.9. p-n Heterojunction Diodes	314

11.10. Junction Field-Effect Transistors	318
Problems	324
References	325
Bibliography	326

CHAPTER 12. Photonic Devices

12.1. Introduction	327
12.2. Photovoltaic Devices	328
12.2.1. p-n Junction Solar Cells	329
12.2.2. Schottky Barrier and MIS Solar Cells	338
12.2.3. Heterojunction Solar Cells	341
12.2.4. Thin Film Solar Cells	343
12.3. Photodetectors	344
12.3.1. p-n Junction Photodiodes	348
12.3.2. p-i-n Photodiodes	349
12.3.3. Avalanche Photodiodes	353
12.3.4. Schottky Barrier Photodiodes	357
12.3.5. Point-Contact Photodiodes	358
12.3.6. Heterojunction Photodiodes	358
12.3.7. Photomultipliers	359
12.3.8. Long-Wavelength Infrared Detectors	360
12.4. Light-Emitting Diodes (LEDs)	363
12.4.1. Injection Mechanisms	364
12.4.2. Electronic Transitions	365
12.4.3. Luminescent Efficiency and Injection Efficiency	365
12.4.4. Application of LEDs	370
12.5. Semiconductor Laser Diodes	375
12.5.1. Population Inversion	375
12.5.2. Oscillation Conditions	377
12.5.3. Threshold Current Density	378
12.5.4. GaAs Laser Diodes	380
12.5.5. Semiconductor Laser Materials	384
12.5.6. Applications of Lasers	386
Problems	387
References	388
Bibliography	389

CHAPTER 13. Bipolar Junction Transistor

13.1. Introduction	391
13.2. Basic Structures and Modes of Operation	392
13.3. Current-Voltage Characteristics	393
13.4. Current Gain, Base Transport Factor, and Emitter Injection Efficiency	401
13.5. Modeling of a Bipolar Junction Transistor	404
13.6. Switching Transistor	409
13.7. Advanced Bipolar Transistor	414

13.8. Thyristors	415
Problems	420
References	421
Bibliography	422

CHAPTER 14. Metal–Oxide–Semiconductor Field-Effect Transistors

14.1. Introduction	423
14.2. An Ideal Metal–Oxide–Semiconductor System	423
14.2.1. Surface Space-Charge Region	426
14.2.2. Capacitance–Voltage Characteristics	427
14.3. Oxide Charges and Interface Traps	430
14.3.1. Interface Trap Charges	431
14.3.2. Oxide Charges	433
14.4. The MOS Field-Effect Transistors	435
14.4.1. General Characteristics of a MOSFET	436
14.4.2. Channel Conductance	437
14.4.3. Current–Voltage Characteristics	439
14.4.4. Small-Signal Equivalent Circuit	442
14.4.5. Scaled-Down MOSFETs	444
14.5. Charge-Coupled Devices	446
14.5.1. Charge Storage and Transfer	447
14.5.2. Charge Injection and Detection	450
14.5.3. Buried-Channel CCDs	451
Problems	452
References	453
Bibliography	453

CHAPTER 15. High-Speed III–V Semiconductor Devices

15.1. Introduction	455
15.2. Metal–Semiconductor Field-Effect Transistors	456
15.2.1. Basic Device Structure and Characteristics	456
15.2.2. Current–Voltage Characteristics	460
15.2.3. Small-Signal Device Parameters	463
15.2.4. Second-Order Effects in a GaAs MESFET	467
15.3. Modulation-Doped Field-Effect Transistors (MODFETs)	468
15.3.1. Equilibrium Properties of the 2-DEG in GaAs	470
15.3.2. 2-DEG Charge Control Regime	474
15.3.3. Current–Voltage Characteristics	475
15.4. Heterojunction Bipolar Transistor	481
15.4.1. Device Structure and Fabrication Technology	481
15.4.2. Current Gain and Device Parameters	483
15.4.3. Current–Voltage Characteristics	485
15.4.4. High-Frequency Performance	486
15.5. Hot Electron Transistors	490
15.6. Resonant Tunneling Devices	493

15.7. Transferred-Electron Devices	495
Problems	499
References	501
Bibliography	501
Index	503
