Contents

Preface ix

Part I Fundamental Concepts 1

1 Signals and Systems 3

- 1.1 Basic Definitions 4
- 1.2 Mathematical Models 5
- 1.3 Continuous-Time and Discrete-Time Signals and Systems 7
- 1.4 Summary 12
- Key Concepts 12

2 Signal and System Characteristics and Models 13

- 2.1 Basic Operations on Signals 13
- 2.2 Signal Characteristics 22
- 2.3 System Representations and Models 27
- 2.4 System Characteristics 32
- 2.5 Summary 43
- Key Concepts 43
- Problems 44
- Problems for Computer Solution 47

Part II Continuous-Time Signals and Systems 49

3 Time-Domain Representation of Continuous-Time Signals 51

- 3.1 Sinusoidal and Complex Exponential Signals 51
- 3.2 Exponential Signals 55
- 3.3 Singularity Function Signals 58
- 3.4 Signal Energy and Power 70
- 3.5 Signal Representation by Generalized Fourier Series 76
- 3.6 Summary 85
- Key Concepts 86
- Problems 87
- Problems for Computer Solution 90

4 Time-Domain Analysis of Continuous-Time Systems 92

- 4.1 System Equation Solution 92
- 4.2 System Impulse Response 94
- 4.3 Zero-State Response of Linear, Time-Invariant Systems:
The Superposition Integral 96
- 4.4 Continuous-Convolution Evaluation and Properties 101
- 4.5 Summary 120
- Key Concepts 121
- Problems 121
- Problems for Computer Solution 125

5 Frequency-Domain Representation of Continuous-Time Signals 126

- 5.1 Spectra and Bandwidths of Continuous-Time Signals 127
- 5.2 Fourier Series Representation of Signals 132
- 5.3 Amplitude and Phase Spectra of Periodic Signals 143
- 5.4 The Fourier Transform and Spectra of Aperiodic Energy Signals 154
- 5.5 The Fourier Transform and Spectra of Nonenergy Signals 181
- 5.6 Summary 194
- Key Concepts 195
- Problems 196
- Problems for Computer Solution 200

6 Frequency-Domain Analysis of Continuous-Time Systems 202

- 6.1 System Frequency Response 202
- 6.2 Frequency-Response Determination 215
- 6.3 Frequency Response of Electric Circuits 219
- 6.4 Phase Delay and Group Delay 221
- 6.5 Bode Plots of Amplitude and Phase Responses 228
- 6.6 Summary 244
- Key Concepts 245
- Problems 246
- Problems for Computer Solution 249

7 Analysis of Continuous-Time Systems Using the Laplace Transform 250

- 7.1 The Laplace Transform 250
- 7.2 Laplace Transform Evaluations and Theorems 255
- 7.3 Evaluation of Inverse Laplace Transforms 268
- 7.4 Laplace Transform Solutions of Linear Integrodifferential Equations 281
- 7.5 Laplace Transform Solutions for Electric Circuits 285
- 7.6 System Transfer Function 292
- 7.7 Use of the Transfer Function for Determining System Stability and Frequency Response 299
- 7.8 Summary 305
- Key Concepts 305
- Problems 307
- Problems for Computer Solution 312

8 Continuous-Time Filters 313

- 8.1 Distortionless Transmission 314
- 8.2 Ideal Filters 315
- 8.3 Approximation of Ideal Filters 321
- 8.4 Butterworth and Chebyshev Filter Design 334
- 8.5 Summary 351
- Key Concepts 351
- Problems 352
- Problems for Computer Solution 354

9	Sampled Continuous-Time Signals	356
9.1	Ideal Sampling and the Sampling Theorem	356
9.2	Practical Sampling Effects	363
9.3	Summary	369
	Key Concepts	370
	Problems	370
	Problems for Computer Solution	372
Part III	Discrete-Time Signals and Systems	373
10	Time-Domain Representation of Discrete-Time Signals	375
10.1	Sinusoidal and Complex-Exponential Signals	376
10.2	Exponential Signals	379
10.3	Unit Step, Unit Ramp, and Unit Pulse Signals	381
10.4	Signal Energy and Power	386
10.5	Summary	389
	Key Concepts	389
	Problems	390
	Problems for Computer Solution	392
11	Time-Domain Analysis of Discrete-Time Systems	393
11.1	System Equation Solution	393
11.2	Recursive Solution of System Equation	394
11.3	System Unit Pulse Response	396
11.4	Zero-State Response of Linear, Time-Invariant Systems: The Superposition Sum	398
11.5	Discrete Convolution Evaluation and Properties	401
11.6	Summary	416
	Key Concepts	417
	Problems	417
	Problems for Computer Solution	420
12	Frequency-Domain Representation of Discrete-Time Signals	422
12.1	Spectra and Bandwidths of Discrete-Time Signals	422
12.2	The Discrete-Time Fourier Series and Spectra of Periodic Signals	428
12.3	The Discrete-Time Fourier Transform and Spectra of Energy Signals	444
12.4	The Discrete-Time Fourier Transform and Spectra of Nonenergy Signals	472
12.5	Summary	483
	Key Concepts	485
	Problems	486
	Problems for Computer Solution	490
13	Frequency-Domain Analysis of Discrete-Time Systems	491
13.1	System Frequency Response	491
13.2	Frequency-Response Determination	503
13.3	Summary	511

Key Concepts	512
Problems	513
Problems for Computer Solution	516

14 Analysis of Discrete-Time Systems Using the z -Transform 518

14.1 The z -Transform	518
14.2 z -Transform Evaluations and Theorems	523
14.3 Evaluation of Inverse z -Transforms	535
14.4 z -Transform Solutions of Linear Difference Equations	545
14.5 The System Transfer Function	551
14.6 Use of the Transfer Function for Determining System Stability and Frequency Response	561
14.7 Summary	565
Key Concepts	566
Problems	567
Problems for Computer Solution	570

15 Discrete-Time System Realizations and Discrete-Time Filters 572

15.1 System Types	572
15.2 System Realizations	573
15.3 IIR Filter Design	582
15.4 FIR Filter Design	612
15.5 Summary	637
Key Concepts	638
Problems	639
Problems for Computer Solution	642

16 The Discrete Fourier Transform 644

16.1 The Discrete Fourier Transform and Inverse Discrete Fourier Transform	645
16.2 Discrete Fourier Transform Characteristics and Properties	666
16.3 Use of Windows in DFT Computation	675
16.4 Discrete Fourier Transform Parameter Selection	682
16.5 Discrete Fourier Transform Theorems	684
16.6 Discrete Convolution Computation Using DFTs	688
16.7 Discrete-Time Signal Filtering Using the DFT	695
16.8 The Fast Fourier Transform	703
16.9 Summary	715
Key Concepts	716
Problems	718
Problems for Computer Solution	721

Appendixes 725

A Sum of Periodic Signals 725

B Mathematical Tables 727

- B.1 Trigonometric Identities 727
- B.2 Derivatives 728
- B.3 Indefinite Integrals 729
- B.4 Definite Integrals 730
- B.5 Series 731

C Transform Tables 732

- C.1 Fourier Transform Theorems 732
- C.2 Fourier Transform Pairs 733
- C.3 Laplace Transform Theorems 734
- C.4 Laplace Transform Pairs 735
- C.5 Discrete-Time Fourier Transform Theorems 736
- C.6 Discrete-Time Fourier Transform Pairs 737
- C.7 z-Transform Theorems 738
- C.8 z-Transform Pairs 739
- C.9 Discrete Fourier Transform (DFT) Theorems 740
