In Section 3.2 (p. 547), the sentence “In agreement with observation...” should read “Contrary to observations made on other spin-crossover compounds [10,28], the angular distortion of the  $\text{FeN}_6$  octahedron, as probed by the  $\Sigma$  parameter [28], is nearly the same for the LS and HS states:  $\Sigma_{\text{HS}} = 14.84^\circ$ ,  $\Sigma_{\text{LS}} = 14.92^\circ$  ( $\Sigma = \sum_{i=1}^{12} |90 - \theta_i|$  with  $\theta_i$  the *cis* angles of the  $\text{FeN}_6$  coordination sphere).”
