

Robert E. O'Malley, Jr.

Singular Perturbation Methods for Ordinary Differential Equations

With 64 Illustrations

Springer-Verlag
New York Berlin Heidelberg London Paris
Tokyo Hong Kong Barcelona Budapest

Contents

Preface	v
---------------	---

Chapter 1: Examples Illustrating Regular and Singular Perturbation Concepts

A. The Harmonic Oscillator: Low Frequency Situation	1
B. Introductory Definitions and Remarks	4
C. A Simple First-Order Linear Initial Value Problem	5
D. Some Second-Order Two-Point Problems	10
E. Regular Perturbation Theory for Initial Value Problems ..	17

Chapter 2: Singularly Perturbed Initial Value Problems

A. A Nonlinear Problem from Enzyme Kinetics	22
B. The Solution of Linear Systems Using Transformation Methods	29
C. Inner and Outer Solutions of Model Problems	39
D. The Nonlinear Vector Problem (Tikhonov–Levinson Theory)	46
E. An Outline of a Proof of Asymptotic Correctness	56
F. Numerical Methods for Stiff Equations	58
G. Relaxation Oscillations	62
H. A Combustion Model	69
I. Linear and Nonlinear Examples of Conditionally Stable Systems	72
J. Singular Problems	83

Chapter 3: Singularly Perturbed Boundary Value Problems

A. Second Order Linear Equations (without Turning Points)	92
B. Linear Scalar Equations of Higher Order	100
C. First-Order Linear Systems	109
D. An Application in Control Theory	119
E. Some Linear Turning Point Problems	126
F. Quasilinear Second-Order Problems	135

G.	Existence, Uniqueness, and Numerical Computation of Solutions	138
H.	Quasilinear Vector Problems	140
I.	An Example with an Angular Solution	149
J.	Nonlinear Systems	152
K.	A Nonlinear Control Problem	153
L.	Semiconductor Modeling	161
M.	Shocks and Transition Layers	164
N.	Phase-Plane Solutions for Conservative Systems	172
O.	A Geometric Analysis for Some Autonomous Equations	181
P.	Semilinear Problems	189
Appendix: The Historical Development of Singular Perturbations		201
References		205
Index		223
