

## Author Rights

### Permissions Guidelines

If you are an American Institute of Physics recognized author or contributing author of this content, the following permissions apply:

- The right, after publication by AIP, to grant permission to third parties to republish the Article or a translation thereof, or excerpts there from, without obtaining permission from AIP, provided the AIP formatted version is not used for this purpose and provided that the Article is not to be published in another journal. Full credit to the original source must be given. e.g., "Reproduced [translated/excerpted] from J. Chem. Phys. 113(3), 895-898, Copyright 2000, American Institute of Physics." For publication in another journal, or for use of the AIP-formatted version, permission from AIP must be obtained.
- To use all or part of the article without revision or modification in personal compilations or other publications of the author's own works, including the author's personal web home page, and make copies of all or part of the article for the author's use for lecture or classroom purposes. Full credit to the original source must be given. e.g., "Reproduced [translated/excerpted] from J. Chem. Phys. 113(3), 895-898, Copyright 2000, American Institute of Physics."
- If the Article has been prepared by an employee within the scope of employment, the employer shall have the right to make copies of the Article for its own internal use. If the Article was prepared under a U.S. Government contract, the government shall have the rights under the copyright to the extent required by the contract.
- An author may use his/her own article, or portions thereof, in his/her thesis or dissertation provided that the appropriate copyright credit line is included. Upon request, official permission is sent for the candidate's file.

### Web Posting Guidelines

If you are an American Institute of Physics recognized author or contributing author of this content, you are permitted to post it on your own intranet, your institution's Web site(s), or in the ArXiv preprint server pursuant to the following conditions:

- In addition to the copyright notice, any posted material must state "This article may be downloaded for personal use only. Any other use requires prior permission of the author and the American Institute of Physics."
- To post and update the Article on e-print servers with AIP's copyright notice. Files prepared and/or formatted by AIP or its vendors must not be used for that purpose. Any such posting made or updated after acceptance of the Article for publication must include a link to the online abstract in the AIP journal.
- Online use requires specific copyright notices and links spelled out in the AIP Web-Posting Guidelines. In particular, all online use must have a web link to AIP's online version of the abstract or article.
- Online use is limited uses that are essentially equivalent to or substitutes for the print version, and embedded material (or a specific link to it) remains in situ; it does not include use as part of a database or other uses that might conflict with or prejudice the exploitation of the material by AIP.
