SPACE NUCLEAR POWER SYSTEMS 1989

IN TWO VOLUMES

Edited by

Mohamed S. El-Genk
Institute for Space Nuclear
Power Studies
University of New Mexico

Mark D. Hoover
Inhalation Toxicology
Research Institute
Albuquerque, New Mexico

VOLUME 11

OF THE SERIES *SPACE NUCLEAR POWER SYSTEMS*

ORBIT BOOK COMPANY, INC.
MALABAR, FLORIDA
1992

TABLE OF CONTENTS

VOLUME 11

<i>Preface</i>	iii
<i>Introduction</i>	v
<i>Editors</i>	vii
<i>The Symposium Logo</i>	viii

Part 11

ENERGY STORAGE

28. PERFORMANCE TESTS OF ENCAPSULATED LITHIUM HYDRIDE FOR THERMAL ENERGY STORAGE IN SPACE POWER SYSTEMS <i>Moshe Siman-Tov, David G. Morris, Mitchell Olszewski</i>	291
29. MICROENCAPSULATED PCM SLURRIES FOR HEAT TRANSFER AND ENERGY STORAGE IN SPACECRAFT SYSTEMS <i>David P. Colvin, James C. Mulligan, Yvonne G. Bryant, John L. Duncan, and Benjamin T. Gravely</i>	303

Part 12

RADIATION AND ENVIRONMENTAL EFFECTS

30. THE RESPONSE OF METAL-OXIDE-SEMICONDUCTOR DEVICE IRRADIATED AT HIGH TEMPERATURES <i>James R. Schwank, Fred W. Sexton, Daniel M. Fleetwood, M. Steven Rodgers, and Kenneth L. Hughes</i>	309
--	-----

Part 13

SIMULATION AND MODELING

31. COMMIX-1B SIMULATION OF FLOW AND HEAT TRANSFER IN A GAS CORE REACTOR VESSEL <i>James G. Zhang and Samim Anghaie</i>	317
32. COOLANT RADIOLOGIC GAS PRODUCTION IN SP-100 CLASS REACTORS <i>John M. McGhee, Mohamed S. El-Genk, and Richard B. Rothrock</i>	325

Part 14**THERMAL MANAGEMENT**

33. APPLICATION OF HIGH TEMPERATURE HEAT SINKS TO FUTURE NUCLEAR SPACE POWER SYSTEMS
Hyop S. Rhee, Joseph R. Wetch, Lester L. Begg, Mitchell Olszewski, and Roger Giellis 337
34. THE MICROTUBE-STRIP HEAT EXCHANGER—SPACE POWER APPLICATIONS FOR ULTRA-HIGH CONDUCTANCE GAS-GAS EXCHANGERS
F. David Doty, Gregory S. Hosford, and Jonathan B. Spitzmesser 347
35. THE EFFECT OF MAXIMUM ALLOWABLE PAYLOAD TEMPERATURE ON THE MASS OF A MULTIMEGAWATT SPACE BASED PLATFORM
Dean Dobranich 357

Part 15**STATIC ENERGY CONVERSION**

36. ADVANCED MATERIALS FOR HIGH-TEMPERATURE THERMOELECTRIC ENERGY CONVERSION
Cronin B. Vining, Jan W. Vandersande, and Charles Wood 367
37. AMTEC SYSTEM PERFORMANCE STUDIES USING THE DETAILED ELECTRODE KINETIC TRANSPORT MODEL
Robert K. Sievers, Roger M. Williams, Mark L. Underwood, Barbara Jeffries-Nakamura, and C. Perry Bankston 373

Part 16**REACTOR AND POWER SYSTEM CONTROL**

38. EXPERIMENTAL DEMONSTRATION OF THE MIT-SNL PERIOD-GENERATED MINIMUM TIME CONTROL LAWS FOR RAPID INCREASES OF REACTOR POWER FROM SUBCRITICAL CONDITIONS
John A. Bernard, Kwan S. Kwok, Takashi Washio, Francis J. Wyant, and Frank V. Thome 381
39. STABILITY CONSIDERATIONS CONCERNING THE IMPLEMENTATION OF THE MIT-SNL PERIOD-GENERATED MINIMUM TIME CONTROL LAWS
Takashi Washio and John A. Bernard 393

Part 17**DYNAMIC ENERGY CONVERSION**

40. REVIEW OF TWO-PHASE FLOW LIQUID METAL MHD AND TURBINE ENERGY CONVERSION CONCEPTS FOR SPACE APPLICATIONS
Gracio Fabris 407

Part 18**RELIABILITY AND SURVIVABILITY**

41. TRANSIENT AND PARAMETRIC ANALYSIS OF SP-100 TYPE SYSTEMS
William J. Rider and Mohamed S. El-Genk 419

Part 19

SOVIET UNION SPACE NUCLEAR POWER PROGRAMS

42.	NUCLEAR ENERGY IN SPACE <i>Nikolai N. Ponomarev-Stepnoi</i>	437
43.	THERMIONIC REACTORS FOR SPACE NUCLEAR POWER <i>Georgy M. Gryaznov, Evgeny E. Zhabotinsky, Victor I. Serbin, Nikolai N. Ponomarev-Stepnoi, V. A. Usov, Anatoly V. Zrodnikov, Victor Y. Pupko, and J. V. Nikolaev</i>	441
44.	THE NUCLEAR AND RADIATION SAFETY CONCEPT FOR THERMIONIC SPACE NUCLEAR POWER SYSTEMS <i>Georgy M. Gryaznov, Evgeny E. Zhabotinsky, Vadim S. Nikolaev, Victor I. Serbin, and Vladimir M. Tyugin</i>	447
45.	RADIATION SAFETY OF THE SPACE NUCLEAR POWER SYSTEMS AND ITS REALIZATION ON THE SATELLITE COSMOS-1900 <i>Georgy M. Gryaznov, Vadim S. Nikolaev, Victor I. Serbin, and Vladimir M. Tyugin</i>	453
46.	THE MAIN PURPOSES AND RESULTS OF FLIGHT TESTS OF SNPSs WITHIN THE "TOPAZ" PROGRAM <i>Igor P. Bogush, Georgy M. Gryaznov, Evgeny E. Zhabotinsky, Albert N. Makarov, Victor I. Serbin, Yuri L. Truhanov, Anatoly V. Vizgalov, Anatoly V. Zrodnikov, and Victor Y. Pupko</i>	457
47.	MODELLING OF THERMIONIC FUEL ELEMENTS GAS SWELLING BASED ON DIFFUSION APPROACH FOR THEIR LIFETIME PREDICTION <i>Valentine F. Kuznetsov, Yuri G. Degaltev, and Nikolai N. Ponomarev-Stepnoi</i>	461
48.	TEMPERATURE FEATURES OF POLYMORPHIC OXYGEN STATE IN STEEL-Na-K ALLOY CIRCULATION SYSTEM <i>Michael N. Ivanovsky, Valentine A. Morosov, Alexander L. Shimkevich, and Nikolai N. Ponomarev-Stepnoi</i>	465
49.	ELECTRIC PROPULSION FOR SPACE RESEARCH <i>Vladimir I. Brukhly, Anatoly S. Koroteev, Irina G. Pulkhrova, Yuri A. Utkin, and Marina N. Vatel</i>	471
50.	NUCLEAR POWER PROPULSION SYSTEM CONCEPT FOR A MANNED MARTIAN MISSION <i>A. A. Ivanov, Viacheslav D. Kolganov, Vladimir A. Pavshoock, and Vitaly P. Semjonov</i>	475

Part 20

KEY ISSUES IN SPACE NUCLEAR POWER

51.	THE ROLE OF THE UNIVERSITIES IN SUPPORTING THE SPACE NUCLEAR POWER TECHNOLOGY DEVELOPMENT <i>Mohamed S. El-Genk and Mark D. Hoover</i>	481
52.	NUCLEAR POWER IN SPACE: BALANCING THE RISKS AND BENEFITS <i>George E. Brown, Jr.</i>	489
	<i>List of Peer Reviewers</i>	A1
	<i>Author Index</i>	A5
	<i>Corporate Index</i>	A7
	<i>Key Word List</i>	A9
