|------------------------------------|------------|

### 1 Introduction to Acoustics

|   |          |
|---|----------|
| <i>Thomas D. Rossing.....</i>   | <b>1</b> |
| 1.1 Acoustics: The Science of Sound .....                             | 1        |
| 1.2 Sounds We Hear .....  | 1        |
| 1.3 Sounds We Cannot Hear: Ultrasound and Infrasound .....            | 2        |
| 1.4 Sounds We Would Rather Not Hear: Environmental Noise Control..... | 2        |
| 1.5 Aesthetic Sound: Music .....                                      | 3        |
| 1.6 Sound of the Human Voice: Speech and Singing .....                | 3        |
| 1.7 How We Hear: Physiological and Psychological Acoustics .....      | 4        |
| 1.8 Architectural Acoustics .....                                     | 4        |
| 1.9 Harnessing Sound: Physical and Engineering Acoustics .....        | 5        |
| 1.10 Medical Acoustics .....  | 5        |
| 1.11 Sounds of the Sea .....  | 6        |
| <b>References .....</b>   | <b>6</b> |

## Part A Propagation of Sound

### 2 A Brief History of Acoustics

|  |           |
|--|-----------|
| <i>Thomas D. Rossing.....</i>  | <b>9</b>  |
| 2.1 Acoustics in Ancient Times .....                                   | 9         |
| 2.2 Early Experiments on Vibrating Strings, Membranes and Plates ..... | 10        |
| 2.3 Speed of Sound in Air .....  | 10        |
| 2.4 Speed of Sound in Liquids and Solids .....                         | 11        |
| 2.5 Determining Frequency .....  | 11        |
| 2.6 Acoustics in the 19th Century .....                                | 12        |
| 2.7 The 20th Century .....   | 15        |
| 2.8 Conclusion .....   | 23        |
| <b>References .....</b>  | <b>23</b> |

### 3 Basic Linear Acoustics

|   |           |
|---|-----------|
| <i>Alan D. Pierce .....</i>               | <b>25</b> |
| 3.1 Introduction .....                    | 27        |
| 3.2 Equations of Continuum Mechanics..... | 28        |
| 3.3 Equations of Linear Acoustics .....   | 35        |
| 3.4 Variational Formulations .....        | 40        |
| 3.5 Waves of Constant Frequency .....     | 45        |
| 3.6 Plane Waves.....                      | 47        |

|      |   |            |
|------|---|------------|
| 3.7  | Attenuation of Sound .....              | 49         |
| 3.8  | Acoustic Intensity and Power .....      | 58         |
| 3.9  | Impedance .....                         | 60         |
| 3.10 | Reflection and Transmission .....       | 61         |
| 3.11 | Spherical Waves .....                   | 65         |
| 3.12 | Cylindrical Waves .....                 | 75         |
| 3.13 | Simple Sources of Sound .....           | 82         |
| 3.14 | Integral Equations in Acoustics .....   | 87         |
| 3.15 | Waveguides, Ducts, and Resonators ..... | 89         |
| 3.16 | Ray Acoustics .....                     | 94         |
| 3.17 | Diffraction .....                       | 98         |
| 3.18 | Parabolic Equation Methods .....        | 107        |
|      | <b>References .....</b>                 | <b>108</b> |

#### **4 Sound Propagation in the Atmosphere**

|     |  |            |
|-----|--|------------|
|     | <i>Keith Attenborough .....</i>                              | 113        |
| 4.1 | A Short History of Outdoor Acoustics .....                   | 113        |
| 4.2 | Applications of Outdoor Acoustics .....                      | 114        |
| 4.3 | Spreading Losses .....                                       | 115        |
| 4.4 | Atmospheric Absorption .....                                 | 116        |
| 4.5 | Diffraction and Barriers .....                               | 116        |
| 4.6 | Ground Effects .....   | 120        |
| 4.7 | Attenuation Through Trees and Foliage .....                  | 129        |
| 4.8 | Wind and Temperature Gradient Effects on Outdoor Sound ..... | 131        |
| 4.9 | Concluding Remarks .....                                     | 142        |
|     | <b>References .....</b>                                      | <b>143</b> |

#### **5 Underwater Acoustics**

|     |   |            |
|-----|---|------------|
|     | <i>William A. Kuperman, Philippe Roux .....</i> | 149        |
| 5.1 | Ocean Acoustic Environment .....                | 151        |
| 5.2 | Physical Mechanisms .....                       | 155        |
| 5.3 | SONAR and the SONAR Equation .....              | 165        |
| 5.4 | Sound Propagation Models .....                  | 167        |
| 5.5 | Quantitative Description of Propagation .....   | 177        |
| 5.6 | SONAR Array Processing .....                    | 179        |
| 5.7 | Active SONAR Processing .....                   | 185        |
| 5.8 | Acoustics and Marine Animals .....              | 195        |
| 5.A | Appendix: Units .....                           | 201        |
|     | <b>References .....</b>                         | <b>201</b> |

### **Part B Physical and Nonlinear Acoustics**

#### **6 Physical Acoustics**

|     |   |     |
|-----|---|-----|
|     | <i>Mack A. Breazeale, Michael McPherson .....</i> | 207 |
| 6.1 | Theoretical Overview .....                        | 209 |
| 6.2 | Applications of Physical Acoustics .....          | 219 |

---

|                                       |   |            |
|---------------------------------------|---|------------|
| 6.3                                   | Apparatus .....   | 226        |
| 6.4                                   | Surface Acoustic Waves .....                                  | 231        |
| 6.5                                   | Nonlinear Acoustics .....                                     | 234        |
|                                       | <b>References .....</b>                                       | <b>237</b> |
| <b>7</b>                              | <b>Thermoacoustics</b>  |            |
|                                       | <i>Gregory W. Swift.....</i>                                  | 239        |
| 7.1                                   | History .....   | 239        |
| 7.2                                   | Shared Concepts .....   | 240        |
| 7.3                                   | Engines .....   | 244        |
| 7.4                                   | Dissipation .....   | 249        |
| 7.5                                   | Refrigeration .....   | 250        |
| 7.6                                   | Mixture Separation .....                                      | 253        |
|                                       | <b>References .....</b>                                       | <b>254</b> |
| <b>8</b>                              | <b>Nonlinear Acoustics in Fluids</b>                          |            |
|                                       | <i>Werner Lauterborn, Thomas Kurz, Iskander Akhatov.....</i>  | 257        |
| 8.1                                   | Origin of Nonlinearity .....                                  | 258        |
| 8.2                                   | Equation of State .....                                       | 259        |
| 8.3                                   | The Nonlinearity Parameter $B/A$ .....                        | 260        |
| 8.4                                   | The Coefficient of Nonlinearity $\beta$ .....                 | 262        |
| 8.5                                   | Simple Nonlinear Waves .....                                  | 263        |
| 8.6                                   | Lossless Finite-Amplitude Acoustic Waves .....                | 264        |
| 8.7                                   | Thermoviscous Finite-Amplitude Acoustic Waves .....           | 268        |
| 8.8                                   | Shock Waves .....   | 271        |
