Preface	xiii
INTRODUCTION TO THE PHYSICS OF SPRITES, ELVES AND INTENSE LIGHTNING DISCHARGES	1
<i>Michael J. Rycroft</i>	
1.1 Basic Properties of the Atmosphere	1
1.1.1 Global Scale Variations (Horizontal Scale greater than 10^4 km)	1
1.1.2 Regional Variations (Horizontal Scale between 30 and 300 km)	3
1.2 Basic Theory of Electrical Phenomena Occurring in the Atmosphere	3
1.2.1 Introduction	3
1.2.2 The DC Global Atmospheric Electric Circuit	4
1.2.3 The AC Circuit	5
1.2.4 Thundercloud Charges and their Screening	6
1.2.5 Spatial and Temporal Variations of the Global Circuit	7
1.3 The Properties of Sprites, Elves and Intense Lightning Discharges	7
1.3.1 Observations and their Interpretation – An Overview	8
1.3.2 ELF Radiation by Sprites	10
1.3.3 Summary of Observations	11
1.4 Introduction to Theories and Numerical Modelling of Sprites	12
1.4.1 Basic Physical Concepts	12
1.4.2 Computer Modelling Results	12
1.5 Conclusions	13
Acknowledgments	13
THE METEOROLOGY OF TRANSIENT LUMINOUS EVENTS- AN INTRODUCTION AND OVERVIEW	19
<i>Walter A. Lyons</i>	
2.1 Introduction	19
2.1.1 Scales of Atmospheric Motion	19
2.1.2 Basic Concepts of Atmospheric Vertical Stability	21
2.1.3 Convective Cloud Nomenclature	22
2.2 Observations of Convective Phenomena	24
2.2.1 Conventional Convective Storm Monitoring	25
2.2.2 Lightning Observation Techniques and Terminology	26
2.3 A Brief History of TLE Observations	30
2.4 Characteristics of TLE-Parent Lightning and Storms	34
2.4.1 The Phenomenology of TLEs	34
2.4.2 Convective Storm Types and TLEs	39
2.5 Research Frontiers	41

2.5.1	Importance	42
2.5.2	Outstanding Research Questions	43
Acknowledgments		44
THE MICROPHYSICAL AND ELECTRICAL PROPERTIES OF SPRITE-PRODUCING THUNDERSTORMS		57
<i>Earle Williams and Y. Yair</i>		
3.1	Introduction	57
3.2	The Non-Inductive Charging Process in Thunderclouds	58
3.3	Cloud Scale Charge Structure Possible with the Non-Inductive Mechanism	61
3.4	The Electrical Structure Inside Sprite-Producing Storms in Summertime	64
3.5	The Electrical Structure inside Sprite-Producing Storms in Wintertime	68
3.6	Gaps in Knowledge and Future Needs	73
Acknowledgments		74
GLOBAL THUNDERSTORM ACTIVITY		85
<i>Colin Price</i>		
4.1	The Earth's Energy Balance	85
4.2	The General Circulation of the Atmosphere	87
4.3	Frontal Thunderstorms in Mid-Latitude Regions	90
4.4	Global Observations of Lightning	92
4.5	The Global Atmospheric Electric Circuit	93
4.6	Future Directions	96
IMAGING SYSTEMS IN TLE RESEARCH		101
<i>Thomas H. Allin, T. Neubert and S. Laursen</i>		
5.1	Introduction to Low Light Imaging	101
5.1.1	Optics	102
5.1.2	Electronic Imaging Sensors	102
5.1.3	Noise and Dynamic range	104
5.1.4	Intensified versus Non-intensified Imaging	105
5.1.5	Summary	106
5.2	The Spritewatch Systems	107
5.2.1	The 2003 Spritewatch System	107
5.2.2	Hardware in the 2003 system	108
5.2.3	Software in the 2003 system	112
5.2.4	Results from 2003	114
5.2.5	The 2004 Spritewatch System	115
5.2.6	Hardware in the 2004 system	115
5.2.7	The 2004 Spritewatch Software	117
	Event Detection	117
5.3	Conclusions	118
5.3.1	Summary	118
5.3.2	Future work	120
SPACECRAFT BASED STUDIES OF TRANSIENT LUMINOUS EVENTS		123
<i>Stephen B. Mende, Y. S. Chang, A. B. Chen, H. U. Frey, H. Fukunishi, S. P. Geller, S. Harris, H. Heetderks, R. R. Hsu, L. C. Lee, H. T. Su and Y. Takahashi</i>		
6.1	Introduction	124

6.2	FORMOSAT-2 Satellite and the ISUAL Instrument	124
6.2.1	The FORMOSAT-2 Satellite	125
6.2.2	The ISUAL Imager	127
6.2.3	The Spectrophotometer	131
6.2.4	Data Interpretation of the Spectrophotometer	136
6.2.5	The Array Photometers	138
6.3	Initial Observations with ISUAL	140
6.4	Summary	144
	Acknowledgments	146
OBSERVATIONS OF SPRITES FROM SPACE AT THE NADIR: THE LSO (LIGHTNING AND SPRITE OBSERVATIONS) EXPERIMENT ON BOARD OF THE INTERNATIONAL SPACE STATION		151
<i>Elisabeth Blanc, T. Farges, D. Brebion, A. Labarthe and V. Melnikov</i>		
7.1	Introduction	152
7.2	Spectral Differentiation of Sprite and Lightning Emissions	153
7.3	Experiment	153
7.4	Observations	156
7.5	Perspectives	160
REMOTE SENSING OF THE UPPER ATMOSPHERE BY VLF		167
<i>Craig J. Rodger and R. J. McCormick</i>		
8.1	Ionospheric Conductivity	167
8.2	Sources of VLF Electromagnetic (EM) Waves	168
8.2.1	Thunderstorms and Lightning	168
8.2.2	Man-Made VLF Radiation	169
8.3	VLF Propagation in the Earth-Ionosphere Waveguide	169
8.3.1	Variations in Subionospheric Propagation	170
8.3.2	TLE Associated Perturbations on VLF Transmissions	172
8.4	Relaxation of High-Altitude Ionospheric Modifications	181
8.4.1	Temperature Relaxation	181
8.4.2	Ionization Relaxation	181
8.5	Summary	183
MEASUREMENTS OF LIGHTNING PARAMETERS FROM REMOTE ELECTROMAGNETIC FIELDS		191
<i>Steven A. Cummer</i>		
9.1	Background and Motivation	191
9.2	Remote Lightning Parameter Measurements	195
9.3	Data Analysis Techniques	198
9.3.1	Electromagnetic Field Modeling	200
9.3.2	Data Inversion	202
9.4	Summary	205
LOCATION AND ELECTRICAL PROPERTIES OF SPRITE-PRODUCING LIGHTNING FROM A SINGLE ELF SITE		211
<i>Yasuhide Hobara, M. Hayakawa, E. Williams, R. Boldi and E. Downes</i>		
10.1	Introduction	212
10.1.1	Lightning Activity	212
10.1.2	Terrestrial ELF Electromagnetic Signals	212
10.1.3	Sprites and Elves and Causative Lightning Properties	214
10.1.4	Contents of this Chapter	214

10.2	Locating Distant ELF Sources and Quantifying their Electrical Properties	215
10.2.1	Theory	215
10.2.2	Global Map of Lightning by Rhode Island Station	218
10.3	Winter TLEs and Associated Electromagnetic Phenomena in Japan	220
10.3.1	Winter Thunderstorm Activity and TLEs in the Hokuriku Region	220
10.3.2	ELF Radiation Associated with the Hokuriku TLEs and the Generation Condition of Winter Sprites	224
10.3.3	Atmosphere-Mesosphere-Ionosphere Coupling	227
10.4	Conclusion	228
	Acknowledgments	229
CALIBRATED RADIANCE MEASUREMENTS WITH AN AIR-FILLED GLOW DISCHARGE TUBE: APPLICATION TO SPRITES IN THE MESOSPHERE		237
<i>Earle Williams, M. Valente, E. Gerken and R. Golka</i>		
11.1	Introduction	237
11.2	Methodology	238
11.3	Optical Spectrum	240
11.4	Radiance Response to Power and Current Density	242
11.5	Estimates of Bulk Plasma Conductivity	243
11.6	Application to Current Flow in Sprites	244
11.7	Conclusion	247
	Acknowledgments	247
THEORETICAL MODELING OF SPRITES AND JETS		253
<i>Victor P. Pasko</i>		
12.1	Introduction	253
12.1.1	Phenomenology of Sprites	254
12.1.2	Phenomenology of Blue Jets, Blue Starters and Gigantic Jets	255
12.2	Classification of Breakdown Mechanisms in Air	256
12.2.1	Concept of Electrical Breakdown	256
12.2.2	Classification of Breakdown Mechanisms in Terms of pd Values	257
12.2.3	Classification of Breakdown Mechanisms in Terms of Applied Electric Field	261
12.2.4	Similarity Relations	265
12.3	Physical Mechanism and Numerical Modeling of Sprites	267
12.3.1	Large Scale Electrodynamics	267
12.3.2	Altitude Structuring of Optical Emissions	271
12.3.3	Large Scale Fractal Models of Sprites	272
12.3.4	Modeling of Small-scale Sprite Streamer Processes and Photoionization Effects	274
12.3.5	Optical Emissions Associated with Sprite Streamers	277
12.4	Physical Mechanism and Numerical Modeling of Blue Jets, Blue Starters and Gigantic Jets	279
12.4.1	Blue Jets as Streamer Coronas	280
12.4.2	Thundercloud Charge and Current Systems Supporting Blue Jets, Blue Starters and Gigantic Jets	283
12.4.3	Numerical Simulation of Blue Jets and Blue Starters	285
12.4.4	Modeling of Optical Emissions from Blue Jets and Blue Starters	286

12.5	Unsolved Problems	287
12.5.1	Relationship of Sprites and Jets to High Air Pressure Leader Processes	287
12.5.2	Initiation of Sprite Streamers in Low Applied Fields	288
12.5.3	Propagation of Sprite Streamers	289
12.5.4	Branching of Sprite Streamers	291
12.5.5	Thermal Runaway Electrons in Streamer Tips in Sprites	292
	Acknowledgments	293
ON THE MODELING OF SPRITES AND SPRITE-PRODUCING CLOUDS IN THE GLOBAL ELECTRIC CIRCUIT		313
<i>Eugene A. Mareev, A. A. Evtushenko and S. A. Yashunin</i>		
13.1	Introduction	314
13.2	Time-Dependent Electric Field in the Conducting Atmosphere	315
13.3	Modeling of the Lower Positive Charge Layer in the Stratified Region	325
13.4	Global Electric Circuit Implications	330
13.5	Conclusion and Outlook for Promising Future Work	335
	Acknowledgments	335
ACTUAL PROBLEMS OF THUNDERCLOUD ELECTRODYNAMICS		341
