# Stability Analysis and Design for Nonlinear Singular Systems

 Springer

# Contents

<b>1</b>	<b>Introduction</b> .....	1
1.1	Models for Singular Systems .....	1
1.2	Singular Systems .....	5
1.2.1	Linear Singular Systems .....	6
1.2.2	Nonlinear Singular Systems .....	7
1.3	Singularly Perturbed Systems .....	8
1.4	Overview of the Monograph .....	9
<b>2</b>	<b>Practical Stability Analysis and Synthesis for Nonlinear Singular Systems</b> .....	13
2.1	Introduction .....	13
2.2	Preliminaries .....	14
2.3	Practical Stability Analysis for Nonlinear Singular Systems .....	16
2.3.1	Problem Formation .....	16
2.3.2	Main Results .....	17
2.3.3	Example .....	20
2.3.4	Concluding Remarks .....	24
2.4	Practical Stability Analysis for Nonlinear Singular Systems with Disturbance Input .....	25
2.4.1	Problem Formation .....	25
2.4.2	Main Results .....	26
2.4.3	Example .....	28
2.4.4	Concluding Remarks .....	34
2.5	Practical Stability of Singular Systems with Time Delays in Terms of Two Measurements .....	34
2.5.1	Problem Formation .....	34
2.5.2	Main Results .....	35
2.5.3	Example .....	38
2.5.4	Concluding Remark .....	40
2.6	Practical Stabilization for Nonlinear Singular Systems .....	40
2.6.1	Problem Formation .....	40
2.6.2	Comparison Principle .....	42

2.6.3	Main Results .....	43
2.6.4	Concluding Remark .....	47
<b>3</b>	<b>Strongly Absolute Stability Analysis for Lur'e Singular Systems</b> .....	<b>49</b>
3.1	Introduction .....	49
3.2	Preliminaries .....	50
3.2.1	Basic Definitions .....	50
3.2.2	Basic Lemmas .....	52
3.2.3	Positive Realness of Singular Systems .....	54
3.3	Circle Criterion: SISO Case .....	56
3.3.1	Problem Formation .....	56
3.3.2	Main Results .....	57
3.3.3	Examples .....	64
3.3.4	Concluding Remarks .....	66
3.4	Circle Criterion: MIMO Case .....	67
3.4.1	Problem Formation .....	67
3.4.2	Main Results .....	67
3.4.3	Examples .....	72
3.4.4	Concluding Remarks .....	73
3.5	Popov Criterion .....	73
3.5.1	Problem Formation .....	73
3.5.2	Main Results .....	74
3.5.3	Example .....	82
3.5.4	Concluding Remarks .....	84
3.6	Popov-Like Criterion .....	85
3.6.1	Problem Formulation .....	85
3.6.2	Generalized Lur'e Lyapunov Function .....	85
3.6.3	Main Results .....	87
3.6.4	Examples .....	96
3.6.5	Concluding Remarks .....	99
<b>4</b>	<b>Input-to-State Stability Analysis and Design for Lur'e Singular Systems</b> .....	<b>101</b>
4.1	Introduction .....	101
4.2	Preliminaries .....	102
4.3	Input-to-State Stability Analysis and Design for a Class of Lur'e Singular Systems .....	103
4.3.1	Problem Formulation .....	103
4.3.2	Main Results .....	104
4.3.3	Example .....	110
4.3.4	Concluding Remark .....	111
4.4	Input-to-State Stability for Lur'e Singular Systems with Unstable Linear Subsystems .....	112
4.4.1	Problem Formulation .....	112
4.4.2	Main Results .....	113

4.4.3	Example .....	122
4.4.4	Concluding Remark .....	123
<b>5</b>	<b>Observer Design for Nonlinear Singular Systems</b> .....	<b>125</b>
5.1	Introduction .....	125
5.2	Observer Design for a Class of Nonlinear Singular Systems .....	127
5.2.1	Preliminaries .....	127
5.2.2	Main Results .....	128
5.2.3	Example .....	135
5.2.4	Concluding Remark .....	137
5.3	$H_\infty$ Observer Design for Singular Systems with Slope-Restricted Nonlinearities .....	138
5.3.1	Preliminaries .....	138
5.3.2	Main Results .....	139
5.3.3	Examples .....	147
5.3.4	Concluding Remarks .....	153
<b>6</b>	<b>Absolute Stability of Lur'e Singularly Perturbed Systems</b> .....	<b>155</b>
6.1	Introduction .....	155
6.2	Preliminaries .....	157
6.3	Circle Criterion .....	158
6.3.1	Problem Formulation .....	158
6.3.2	Main Results .....	159
6.3.3	Example .....	161
6.4	Popov Criterion .....	163
6.4.1	Problem Formulation .....	163
6.4.2	A Lur'e Lyapunov Function for Lur'e SPSs .....	164
6.4.3	Main Results .....	167
6.4.4	Examples .....	170
6.5	Concluding Remarks .....	173
<b>7</b>	<b>Multi-objective Control for T-S Fuzzy Singularly Perturbed Systems</b> .....	<b>175</b>
7.1	Introduction .....	175
7.2	Problem Formulation .....	177
7.3	Main Results .....	180
7.4	Example .....	189
7.4.1	Case I: $\mathbf{D}$ Is the Open Left-Half Plane .....	191
7.4.2	Case II: $\mathbf{D}$ Is a Conic Sector Region .....	191
7.5	Concluding Remarks .....	195
	<b>References</b> .....	<b>197</b>
	<b>Index</b> .....	<b>209</b>
