Contents

Preface ix

Part I: Introduction

1 *Structural Equation Models: The Basics* 3
Basic Concepts 4
The General LISREL Model 9
The LISREL Confirmatory Factor Analytic Model 17
The LISREL Full Structural Equation Model 37

2 *Using LISREL, PRELIS, and SIMPLIS* 43
Working with LISREL 8 43
Working with PRELIS 2 69
Working with SIMPLIS 81
Overview of Remaining Chapters 87

Part II: Single-Group Analyses

3 *Application 1: Testing the Factorial Validity of a Theoretical Construct (First-Order CFA Model)* 91
The Hypothesized Model 91
The LISREL Input File 94
The LISREL Output File 100
Post Hoc Analyses 125
From the SIMPLIS Perspective 130
Applications Related to Other Disciplines 134

4 *Application 2: Testing the Factorial Validity of Scores from a Measuring Instrument (First-Order CFA Model)* 135

The Measuring Instrument Under Study 136

The Hypothesized Model 137

Post Hoc Analyses 147

From the SIMPLIS Perspective 156

Cross-Validation in Covariance Structure Modeling 157

Applications Related to Other Disciplines 161

5 *Application 3: Testing the Factorial Validity of Scores from a Measuring Instrument (Second-Order CFA Model)* 163

The Measuring Instrument Under Study 164

Analysis of Categorical Data 165

Preliminary Analyses Using PRELIS 166

The Hypothesized Model 170

Post Hoc Analyses 181

From the SIMPLIS Perspective 189

Applications Related to Other Disciplines 191

6 *Application 4: Testing for Construct Validity: The Multitrait–Multimethod Model* 193

Preliminary Analyses Using PRELIS: Data Screening 194

The CFA Approach to MTMM Analyses 199

The General CFA MTMM Model 200

Testing for Construct Validity: Comparison of Models 213

Testing for Construct Validity: Examination of Parameters 215

The Correlated Uniqueness MTMM Model 218

From the SIMPLIS Perspective 227

Applications Related to Other Disciplines 229

7 *Application 5: Testing the Validity of a Causal Structure* 231

The Hypothesized Model 231

Preliminary Analyses Using PRELIS 233

Preliminary Analyses Using LISREL 234

Testing the Hypothesized Model of Causal Structure 238

Post Hoc Analyses 244

From the SIMPLIS Perspective 253

Applications Related to Other Disciplines 255

Part III: Multiple Group Analyses

8 *Application 6: Testing for Invariant Factorial Structure of a Theoretical Construct (First-Order CFA Model)* 259

Testing for Multigroup Invariance 260

Testing for Invariance Across Gender 263

Hypothesis I 266

Hypothesis II 272

Hypothesis III 274

From the SIMPLIS Perspective 281

Applications Related to Other Disciplines 286

9 *Application 7: Testing for Invariant Factorial Structure of Scores from a Measuring Instrument (First-Order CFA Model)* 287

Testing for Invariance Across Low and High Academic Tracks 288

Testing Hypotheses Related to Multigroup Invariance 291

Hypothesis I 291

Hypothesis II 294

Hypothesis III 294

Hypothesis IV 296

From the SIMPLIS Perspective 300
Applications Related to Other Disciplines 302

10 *Application 8: Testing for Invariant Latent Mean Structures* 303

Basic Concepts Underlying Tests of Latent Mean Structures 304
The Hypothesized Model 309
From the SIMPLIS Perspective 322
Applications Related to Other Disciplines 324

11 *Application 9: Testing for Invariant Pattern of Causal Structure* 327

The Hypothesized Model 328
Testing for Invariance Across Calibration/Validation Samples 330
From the SIMPLIS Perspective 338
Applications Related to Other Disciplines 341

Part IV: LISREL, PRELIS, and SIMPLIS Through Windows

12 *Application 10: Testing for Causal Predominance Using a Two-Wave Panel Model* 345

Using the Windows Versions of LISREL 8 and PRELIS 2 346
Running LISREL 8 and PRELIS 2 349
The Hypothesized Model 351
From the SIMPLIS Perspective 381
Applications Related to Other Disciplines 385
