Structural Equation Modeling with LISREL, PRELIS, and SIMPLIS: Basic Concepts, Applications, and Programming

Barbara M. Byrne
University of Ottawa

LAWRENCE ERLBAUM ASSOCIATES, PUBLISHERS
Mahwah, New Jersey London
## Contents

Preface ix

**Part I: Introduction**

1 *Structural Equation Models: The Basics* 3
   - Basic Concepts 4
   - The General LISREL Model 9
   - The LISREL Confirmatory Factor Analytic Model 17
   - The LISREL Full Structural Equation Model 37

2 *Using LISREL, PRELIS, and SIMPLIS* 43
   - Working with LISREL 8 43
   - Working with PRELIS 2 69
   - Working with SIMPLIS 81
   - Overview of Remaining Chapters 87

**Part II: Single-Group Analyses**

3 *Application 1: Testing the Factorial Validity of a Theoretical Construct (First-Order CFA Model)* 91
   - The Hypothesized Model 91
   - The LISREL Input File 94
   - The LISREL Output File 100
   - Post Hoc Analyses 125
   - From the SIMPLIS Perspective 130
   - Applications Related to Other Disciplines 134
4 Application 2: Testing the Factorial Validity of Scores from a Measuring Instrument (First-Order CFA Model)
  The Measuring Instrument Under Study
  The Hypothesized Model
  Post Hoc Analyses
  From the SIMPLIS Perspective
  Cross-Validation in Covariance Structure Modeling
  Applications Related to Other Disciplines

5 Application 3: Testing the Factorial Validity of Scores from a Measuring Instrument (Second-Order CFA Model)
  The Measuring Instrument Under Study
  Analysis of Categorical Data
  Preliminary Analyses Using PRELIS
  The Hypothesized Model
  Post Hoc Analyses
  From the SIMPLIS Perspective
  Applications Related to Other Disciplines

6 Application 4: Testing for Construct Validity: The Multitrait–Multimethod Model
  Preliminary Analyses Using PRELIS: Data Screening
  The CFA Approach to MTMM Analyses
  The General CFA MTMM Model
  Testing for Construct Validity: Comparison of Models
  Testing for Construct Validity: Examination of Parameters
  The Correlated Uniqueness MTMM Model
  From the SIMPLIS Perspective
  Applications Related to Other Disciplines

7 Application 5: Testing the Validity of a Causal Structure
  The Hypothesized Model
  Preliminary Analyses Using PRELIS
  Preliminary Analyses Using LISREL
  Testing the Hypothesized Model of Causal Structure
  Post Hoc Analyses
  From the SIMPLIS Perspective
  Applications Related to Other Disciplines

Part III: Multiple Group Analyses

8 Application 6: Testing for Invariant Factorial Structure of a Theoretical Construct (First-Order CFA Model)
  Testing for Multigroup Invariance
  Testing for Invariance Across Gender
  Hypothesis I
  Hypothesis II
  Hypothesis III
  From the SIMPLIS Perspective
  Applications Related to Other Disciplines

9 Application 7: Testing for Invariant Factorial Structure of Scores from a Measuring Instrument (First-Order CFA Model)
  Testing for Invariance Across Low and High Academic Tracks
  Testing Hypotheses Related to Multigroup Invariance
  Hypothesis I
  Hypothesis II
  Hypothesis III
  Hypothesis IV
