## Berichtigung

B. Reiser: Structural Inference for Linear Regression with Autocorrelated Errors. 16. Jahrgang, 1975, Heft 2. Formula (3.2) on page 89 should be multiplied by $\sigma^{-r}$. On page 90 the expressions for $t$ and $\underset{\sim}{\beta}$ should read:

$$
\begin{aligned}
& \underset{\sim}{t}=(\underset{\sim}{\beta}-\underset{\sim}{b}(\underset{\sim}{Y})-s(\underset{\sim}{Y}) \underset{\sim}{f}) /\left(s(\underset{\sim}{Y}) K^{1 / 2}\right) \\
& \underset{\sim}{B}=\underset{\sim}{b}(\underset{\sim}{Y})+s(\underset{\sim}{Y}) \underset{\sim}{f}+s(\underset{\sim}{Y}) K^{1 / 2} \underset{\sim}{t}
\end{aligned}
$$
