

# **Structure in Protein Chemistry**

**Jack Kyte**

Professor of Chemistry  
University of California at San Diego

**Garland Publishing, Inc.  
New York & London  
1995**

# Contents

<i>Preface</i>	<i>vii</i>
<i>List of Stereo Drawings</i>	<i>ix</i>
<b>Chapter 1 — Purification</b>	
Adsorption to Stationary Phases and Chromatography	2
Assay	12
Purification of a Protein	16
Net Molecular Charge	25
Electrophoresis	27
Criteria of Purity	35
Heterogeneity	36
Crystallization	37
<b>Chapter 2 — Electronic Structure</b>	
$\pi$ and $\sigma$	41
Acids and Bases	47
Tautomers	54
Amino Acids	58
<b>Chapter 3 — Sequences of Polymers</b>	
Sequencing of Polypeptides	71
Sequencing of Nucleic Acids	80
Posttranslational Modification	93
Oligosaccharides of Glycoproteins	102
<b>Chapter 4 — Crystallographic Molecular Models</b>	
Maps of Electron Density	117
The Molecular Model	129
Refinement	139
<b>Chapter 5 — Noncovalent Forces</b>	
Water	147
Ionic Interactions	155
The Hydrogen Bond	159
Intramolecular and Intermolecular Processes:	
Molecularity and Approximation	172
The Hydrophobic Effect	179
Hydropathy	189

<b>Chapter 6 — Atomic Details</b>	197
Secondary Structure of the Polypeptide Backbone	197
Prediction of Secondary Structure	209
Stereochemistry of the Side Chains	210
Hydropathy of the Side Chains	214
Packing of the Side Chains	220
Water	228
Ionic Interactions and Hydrogen Bonds	233
<b>Chapter 7 — Evolution</b>	243
Molecular Phylogeny from Amino Acid Sequence	244
Molecular Phylogeny from Tertiary Structure	256
Domains	264
Molecular Taxonomy	274
<b>Chapter 8 — Counting Polypeptides</b>	281
Molar Mass	282
Electrophoresis on Gels of Polyacrylamide Cast in Solutions of Dodecyl Sulfate	291
Sieving	293
Cataloguing Polypeptides	300
Cross-Linking	308
<b>Chapter 9 — Symmetry</b>	317
Rotational and Screw Axes of Symmetry	317
Space Groups	322
Oligomeric Proteins	327
Isometric Oligomeric Proteins	335
Helical Polymeric Proteins	345
<b>Chapter 10 — Chemical Probes of Structure</b>	357
<b>Chapter 11 — Immunochemical Probes of Structure</b>	379
<b>Chapter 12 — Physical Measurements of Structure</b>	393
Shape	393
Absorption and Emission of Light	404
Nuclear Magnetic Resonance and Proton Exchange	418
<b>Chapter 13 — Folding and Assembly</b>	445
Thermodynamics of Folding	445
Kinetics of Folding and Unfolding	470
Assembly of Oligomeric Proteins	474
Assembly of Helical Polymeric Proteins	481
<b>Chapter 14 — Membranes</b>	501
The Bilayer	503
The Proteins	520
The Fluid Mosaic	547
<i>Index</i>	569
