Contents

<i>Preface</i>	page xi
<i>Preface to the second edition</i>	xiii
1 Superconductivity and superfluidity	1
1.1 Phenomena	1
1.1.1 <i>Thermodynamical ordered phase</i>	2
1.1.2 <i>Zero resistivity</i>	2
1.1.3 <i>Perfect diamagnetism</i>	4
1.1.4 <i>Magnetic flux quantisation</i>	5
1.2 Bose gas and macroscopic wave function	7
1.2.1 <i>Dilute Bose gas</i>	8
1.2.2 <i>Charged Bose gas</i>	9
1.3 Symmetry breaking	11
1.4 Superfluidity	13
2 Mean-field theory of pair condensation	16
2.1 Interactions and two-particle bound states	16
2.2 Cooper pairs and the BCS ground state	19
2.2.1 <i>The BCS ground state</i>	21
2.3 The mean-field theory of pair condensation	23
2.4 Representation of the mean field Δ_k	24
2.5 Bogoliubov transformation	26
3 BCS theory	31
3.1 Spin-singlet pairing and the energy gap	31
3.1.1 <i>Energy gap</i>	33
3.1.2 <i>Coherence length</i>	35
3.1.3 <i>Charge density</i>	36
3.2 Thermodynamic properties	36
3.2.1 <i>The free energy according to the BCS theory</i>	38

3.2.2	<i>States carrying supercurrent</i>	40
3.2.3	<i>Spin paramagnetism</i>	43
3.3	Response of a superconducting state to an external field	44
3.3.1	<i>Ultrasound absorption</i>	47
3.3.2	<i>Response to electromagnetic field</i>	48
3.3.3	<i>Nuclear magnetic resonance</i>	52
3.4	Tunnelling junction and Josephson effect	56
3.4.1	<i>Quasi-particle term</i>	58
3.4.2	<i>Josephson term</i>	59
3.5	Mean-field theory in the presence of spatial variation	63
3.5.1	<i>Effects of defects and boundaries</i>	66
3.6	Gor'kov equations	67
4	Superconductivity due to electron-phonon interaction	71
4.1	Electron-phonon system	71
4.2	Electron-phonon interaction in the normal state	73
4.2.1	<i>Effective mass and lifetime</i>	77
4.2.2	<i>Migdal's theorem</i>	79
4.3	Eliashberg equation	80
4.3.1	<i>Weak coupling</i>	85
4.4	Coulomb interaction	86
4.5	Strong-coupling effects and critical temperature	89
4.5.1	<i>Tunnelling effects</i>	89
4.5.2	<i>Transition temperature</i>	90
4.5.3	<i>Isotope effects</i>	92
4.5.4	<i>Strong-coupling effects at finite temperatures</i>	92
4.6	Impurity effects	94
5	Ginzburg-Landau theory	100
5.1	GL theory of superconductivity	100
5.1.1	<i>Transition in the presence of a supercurrent</i>	103
5.1.2	<i>Transition in a cylinder of a thin film in a magnetic field</i>	104
5.2	Boundary energy	104
5.3	Critical fields H_{c1} and H_{c2}	107
5.3.1	<i>Lower critical field H_{c1}</i>	107
5.3.2	<i>Upper critical field H_{c2}</i>	109
5.4	Vortex lattice states	110
5.4.1	<i>Quasi-particle excitations associated with a vortex</i>	113
5.5	Time-dependent GL equation	114
5.6	Applications of the TDGL equation	118
5.6.1	<i>Sliding of vortex lattice</i>	118
5.6.2	<i>Phase slip oscillation (PSO)</i>	119

5.7	Fluctuations in a superconductor	122
5.7.1	<i>Electrical conductivity due to fluctuations</i>	123
5.7.2	<i>Ginzburg criterion</i>	125
6	Superfluid ^3He	127
6.1	Fermi liquid ^3He	127
6.1.1	<i>Pairing interaction</i>	132
6.2	Superfluid state of ^3He pairs	133
6.2.1	<i>BW state</i>	134
6.2.2	<i>ABM state</i>	135
6.2.3	<i>A_1 state</i>	137
6.2.4	<i>Polar state and planar state</i>	137
6.2.5	<i>Other superfluid states</i>	138
6.3	Physical properties of the ^3P superfluid states	138
6.3.1	<i>Energy gap</i>	139
6.3.2	<i>Specific heat</i>	140
6.3.3	<i>Superfluid component</i>	140
6.3.4	<i>Magnetisation</i>	142
6.3.5	<i>Fermi liquid effects</i>	143
6.4	Spin dynamics and nuclear magnetic resonance	144
6.4.1	<i>Spin dynamics and NMR</i>	145
6.5	Ginzburg–Landau theory	148
6.5.1	<i>Momentum density associated with superfluidity</i>	149
6.5.2	<i>Magnetic free energy</i>	149
6.5.3	<i>Strong coupling effects and spin fluctuations</i>	150
6.6	Textures and superfluidity	152
6.6.1	<i>The London limit</i>	152
6.6.2	<i>Superfluidity in the ABM state</i>	152
6.6.3	<i>Textures</i>	155
6.6.4	<i>Rotating system</i>	156
6.6.5	<i>Vortex in B phase</i>	157
7	New superconducting materials	161
7.1	Superconducting materials	161
7.2	Copper oxide superconductors	165
7.2.1	<i>Structure</i>	165
7.2.2	<i>Electronic structure</i>	167
7.2.3	<i>Superconducting state</i>	170
7.2.4	<i>Mechanism of superconductivity</i>	174
7.2.5	<i>HTSC in a magnetic field</i>	174
7.3	Superconductivity in heavy electron systems	177
7.3.1	<i>The superconducting state</i>	179

<i>7.3.2 Symmetry of pairing in crystal</i>	182
<i>Appendix 1 Bose–Einstein condensation in polarised alkaline atoms</i>	185
<i>Appendix 2 Recent developments in research on high temperature superconductors</i>	189
<i>References and bibliography</i>	198
<i>Index</i>	207
