Correction for 'Synthesis and spectroscopic characterization of a fluorescent phenanthrene–rhodamine dyad for ratiometric measurements of acid pH values' by Priyanka Srivastava *et al.*, *New J. Chem.*, 2021, DOI: 10.1039/d1nj01573g.

The authors would like to correct Fig. 6, as the spectra of dyad **8** and compound **6** recorded at 315 nm were labelled incorrectly. The corrected Fig. 6 is shown below.

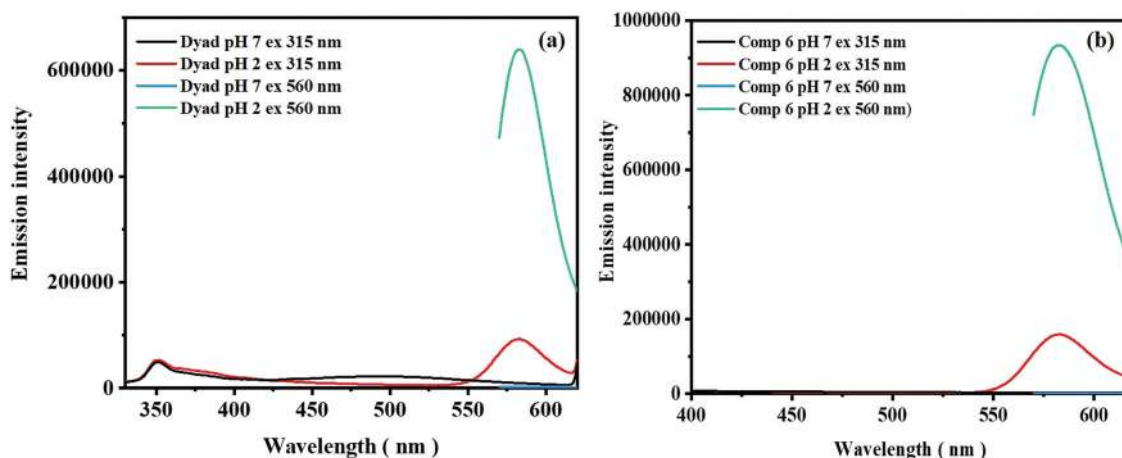

Fig. 6 Emission spectra recorded at excitation wavelength of 315 nm and 560 nm at pH 7.0 and 2.0 (3.3 μ M) of (a) dyad **8** and (b) compound **6** in a THF–H₂O mixture (1 : 1) in B–R buffer (25 mM).

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
