Note

This was prepared as a working paper. Because it is held by the Naval Historical Center and the U.S. Army Military History Institute and is cataloged in OCLC, it is available to scholars. It is cited in *Military Intelligence, 1870-1991: A Research Guide* by Jonathan House. The entry from the House book is included.

INTRODUCTION

Purpose

This is a working bibliography I have prepared to aid in a research project. I am distributing a few copies because no comparable bibliography on technical intelligence is available.

Definition

I define technical intelligence as the effort to collect, process, and disseminate information about the characteristics of weapons and equipment used by the armed forces of other countries. I also include other activities of technical intelligence organizations of the armed forces like preparation of sanitary surveys by medical intelligence. According to my definition, technical intelligence in the US Army began when technical intelligence sections were set up in the offices of the chiefs of the technical services just before World War II. Before that there had been some collection of technical information but there was little systematic analysis.

From early in World War II, there were seven technical services of the Army: Ordnance, Chemical, Engineer, Medical, Signal, and Transportation. Each technical Service has an intelligence branch. In 1962, most of the separate technical intelligence branches were replaced by a centralized organization. The Air Force and Navy have had centralized technical intelligence organizations from the beginning.

I DO NOT CONSIDER THE COLLECTION OF DATA BY TECHNICAL MEANS, LIKE PHOTOGRAPHY, TO BE TECHNICAL INTELLIGENCE. Of course, technical intelligence data can be collected by technical means. For example, our military attaches take pictures of Soviet equipment in each May Day parade.

Scope

Because this is working bibliography, I have included a wide variety of items:

- Manuals, orders, and directives concerning technical intelligence organizations and the technical intelligence process.
- Official publications giving the technical characteristics^s of weapons and equipment, from Aircraft Recognition Playing Cards to detailed catalogs of foreign equipment. (I have excluded commercial publications like the famous Janes guides.)
- Books and articles describing technical intelligence organizations, operations, and activities or describing military operations in which technical intelligence played an important part, like the campaign against the German V-Weapons.
- References to technical intelligence collection opportunities, such as the capture of tremendous amounts of Soviet equipment by Israel in several wars.
- Manuals and articles which aid in organizing or understanding official publications, such as indexes and correspondence manuals.

Organization

This bibliography was prepared using the FAMULUS Personal Information System developed by the US Forest Service. FAMULUS is a computer software package which allows the user to sort, search, and list bibliographic records. Different listings are produced by changing the order of the fields in each entry and then sorting the entries.

The bibliography contains ~~a~~ title ~~listing~~, ~~an~~ author ~~listing~~, and ~~an~~ acquisition number ~~listings~~. The first page of each listing is on colored paper:

<u>Listing</u>	<u>Color</u>
Title	Green
Author	Yellow
Acquisition Number	Blue

The Entries

I have tried to follow the American National Standard for Bibliographic References (American National Standards Institute Standard Z39.29-1977) in preparing this bibliography. One feature of the standard is the use of notes stating the source or location of publications. In some of the entries I have used the following brief references in that note field:

<u>Abbreviated Reference</u>	<u>Full Title*</u>
NAVTECHMISEU HISTORY	US NAVAL ADMINISTRATION IN WORLD WAR II: CNO TECHNICAL MISSION IN EUROPE
OKINAWA REPORT	REPORT OF PARTICIPATION IN OKINAWA OPERATION, 13 FEBRUARY-24 JULY 1945
ORDNANCE TECHNICAL INTELLIGENCE HISTORY	HISTORY OF ORDNANCE TECHNICAL INTELLIGENCE, WORLD WAR II
SW PACIFIC TECHNICAL INTELLIGENCE HISTORY	HISTORY OF TECHNICAL INTELLIGENCE, SOUTHWEST AND WESTERN PACIFIC AREAS, 1942.
