

# Contents

<b>1</b>	<b>Basic Notions</b>	1
1.1	Linear Frames and Tetrads	1
1.1.1	Trivial Frames	2
1.1.2	Nontrivial Frames	5
1.2	Lorentz Connections	6
1.3	Curvature and Torsion	8
1.4	Local Lorentz Transformations	11
1.5	Bianchi Identities	12
1.6	Levi-Civita Symbol	13
1.7	Torsion Decomposition	14
	References	15
<b>2</b>	<b>Lorentz Connections and Inertia</b>	17
2.1	Purely Inertial Connection	17
2.2	Particle Equation of Motion	18
2.3	Four-Acceleration and Parallel Transport	21
2.4	Inertial Effects	22
	References	23
<b>3</b>	<b>Gauge Theories and Gravitation</b>	25
3.1	The Gauge Tenets	25
3.1.1	Gauge Transformations	27
3.1.2	Gauge Potential and Field Strength	27
3.1.3	Field Equations	29
3.1.4	Classical Equations of Motion	31
3.1.5	Duality Symmetry and Beyond	32
3.2	General Relativity	33
3.3	Gravitation and the Gauge Paradigm	37
	References	38
<b>4</b>	<b>Fundamentals of Teleparallel Gravity</b>	39
4.1	Some Historical Remarks	39

4.2	Geometrical Setting . . . . .	41
4.3	Gauge Transformations of Source Fields . . . . .	42
4.4	Gauge Coupling Prescription . . . . .	43
4.4.1	The Electromagnetic Case as an Example . . . . .	43
4.4.2	Translational Coupling Prescription . . . . .	44
4.4.3	Translational Coupling in a General Frame . . . . .	45
4.5	Translational Field Strength . . . . .	46
4.6	Fundamental Fields . . . . .	47
	References . . . . .	49
<b>5</b>	<b>Gravitational Coupling Prescription . . . . .</b>	<b>51</b>
5.1	Translational Coupling Revisited . . . . .	51
5.2	Lorentz Coupling Prescription . . . . .	51
5.2.1	General Covariance Principle . . . . .	52
5.2.2	Passage to an Anholonomic Frame . . . . .	53
5.2.3	Identifying Inertia with Gravitation . . . . .	54
5.3	Full Gravitational Coupling Prescription . . . . .	55
5.4	Possible Connections . . . . .	56
	References . . . . .	57
<b>6</b>	<b>Particle Mechanics . . . . .</b>	<b>59</b>
6.1	Free Particles Revisited . . . . .	59
6.1.1	Basic Notions . . . . .	59
6.1.2	Equation of Motion of Free Particles . . . . .	60
6.2	Gravitationally Coupled Particles . . . . .	61
6.2.1	Coupling Prescription . . . . .	62
6.2.2	Gravitationally Coupled Equation of Motion . . . . .	62
6.2.3	Equivalence with the Geodesic Equation . . . . .	65
6.3	Newtonian Limit . . . . .	66
6.4	Gravitomagnetic Field . . . . .	67
6.5	Separating Inertial Effects from Gravitation . . . . .	69
6.6	A Genuine Gravitational Connection . . . . .	71
	References . . . . .	71
<b>7</b>	<b>Global Formulation for Gravity . . . . .</b>	<b>73</b>
7.1	Phase Factor Approach . . . . .	73
7.2	Colella-Overhauser-Werner Experiment . . . . .	74
7.3	Gravitational Aharonov-Bohm Effect . . . . .	76
7.4	Quantum Versus Classical Approaches . . . . .	78
	References . . . . .	81
<b>8</b>	<b>Hodge Dual for Soldered Bundles . . . . .</b>	<b>83</b>
8.1	Why a New Dual . . . . .	83
8.2	Dual Torsion . . . . .	84
8.3	Dual Curvature . . . . .	86
	References . . . . .	87
