<b>Preface The ecological city: Reality and mystification</b>	<b>1</b>
<b>1 A strategy for the modern city: Research lines aimed at the identification of 'optimal centrality'</b>	<b>9</b>
1 The definition of the current urban problem	9
2 Two situation typologies in western urban geography	13
3 The potential alternative solutions	15
4 The dossier of parameters to be transferred in terms of reference	18
5 The suggested approach: searching for the optimal centrality	19
6 The search for optimal centrality and the abstract 'theories' of urban economics	20
7 The imperative research approach	29
8 The definition of optimal centrality and its constituent parameters	30
9 The components of centrality as found in the current western urban situation	34
10 Configuring an articulation of optimal centralities	35
11 Conclusion	35

<b>2</b>	<b>The degradation of the urban environment: The planological approach</b>	<b>46</b>
1	General considerations on the degradation of the urban environment	47
2	The degradation of the urban environment in relation to its factors (or causes)	48
3	Urban degradation in relation to any city typology	53
4	Urban degradation in relation to the stages of urbanisation	54
5	The degradation of the urban environment from the point of view of the goals of 'environmental well-being'	56
6	The urban eco-system evaluation	57
7	The planological approach: programme structure and urban indicators	61
<b>3</b>	<b>Centralities and peripheries: A new strategy for the recovery of the urban environment</b>	<b>91</b>
1	The city and its public spaces	91
2	The decline of public spaces and the disequilibrium of loads	92
3	Two typical, inadequate responses: zoning and traffic engineering	92
4	The loss of centrality in small and medium-sized towns	93
5	Outlines of a new policy of recovery of the urban environment	94
6	The question of 'modernity' in urban planning	96
<b>4</b>	<b>Urban planning and ecology: What relationship?</b>	<b>101</b>
1	Urban planning and ecology: a promised marriage never consummated, or a case of hermaphroditism	101
2	Planning and ecology: some postulates	104
3	The methodological prerequisites in the planning of the ecological city	107
4	Application to the case of a policy of urban 'sustainability'	113
<b>5</b>	<b>The 'urban mobility integrated basin': A prerequisite of rational planning</b>	<b>122</b>
1	The 'urban mobility integrated basin' (UMIB)	122

2	The policy-oriented demand for urban transport	123
3	General approach to the definition of urban planning objectives	124
4	The UMIB accessibility system	125
5	Operational specification of objectives: the use of multi-criteria decision-making analysis	130
6	Concluding remarks	131
<b>6</b>	<b>The urban labour basin: Misleading formulations</b>	<b>137</b>
1	An interpretative definition of the labour market basin	137
2	An operational definition of the labour market basin	140
3	A definition of the labour basin on the basis of an integrated approach	141
4	The measurement of the integrated objective-function	142
5	The optimal dimension of the labour basin	145
6	The 'urban' labour basin functional to labour management	147
<b>7</b>	<b>The land-use/resources matrix: An instrument for environmental planning</b>	<b>151</b>
1	Why a land-use/resources matrix (LURM)?	151
2	Nature and characteristics of the land-use/resources matrix	152
3	The territory balance	154
4	The 'economic' evaluation of territory	157
5	The utilisation of the LURM	159
6	Other instruments of evaluation interlinked with the LURM	160
<b>8</b>	<b>Ecological equilibrium and territorial planning: The Italian case</b>	<b>163</b>
1	The foundations of ecological equilibrium between anthropic activities and territory	164
2	The urban system as a more appropriate place of eco-systemic measurement, evaluation and management	166
3	A reorganisation by 'urban eco-systems' of the Italian territory: the 'Quadroter' research project	170
4	The nature and limits of the Quadroter project as an instrument of territorial and environmental policy	172

<b>9 The 'Urban Environment Programme' of the Italian Government Ten-Year Plan for the Environment (Decamb)</b>	<b>177</b>
1 The Ten-Year Plan for the Environment (Decamb) of the Italian Ministry of the Environment (1992)	177
2 The cultural and scientific premises of the Decamb 'Urban Environment Programme'	180
3 The Decamb 'Urban Environment Programme'	184
4 A short description of the action programmes	190
5 Conclusions	202
