The Ecology of Adaptive Radiation

Dolph Schluter

University of British Columbia, Canada

OXFORD
UNIVERSITY PRESS

Contents

Preface	vii
1 The origins of ecological diversity	1
1.1 Introduction	1
1.2 The issues	2
1.3 Fifty years later	6
1.4 General implications	7
1.5 The book	7
2 Detecting adaptive radiation	10
2.1 Introduction	10
2.2 Definitions	10
2.3 Examples	22
2.4 Adaptation vs adaptive radiation	31
2.5 Discussion	32
3 The progress of adaptive radiation	36
3.1 Introduction	36
3.2 Generalist ancestors, specialized descendants?	37
3.3 Repeatable rules of niche spread	49
3.4 Replicate radiations	55
3.5 Phenotypic evolution near the end of adaptive radiation	59
3.6 Discussion	64
4 The ecological theory of adaptive radiation	65
4.1 Introduction	65
4.2 The ecological theory	65
4.3 Extensions and alternatives	71
4.4 Discussion	83
5 Divergent natural selection between environments	84
5.1 Introduction	84
5.2 Natural selection and the adaptive landscape	85
5.3 Comparison with the neutral expectation	90

5.4	Reciprocal transplant experiments	95
5.5	Direct measurements of natural selection	104
5.6	Estimating adaptive landscapes from environments	111
5.7	How do adaptive peak shifts occur?	115
5.8	Discussion	121
6	Divergence and species interactions	123
6.1	Introduction	123
6.2	Divergence between competitors	124
6.3	Observational evidence	129
6.4	Evidence from prediction	147
6.5	Evidence from field experiments	150
6.6	Other interactions promoting divergence	152
6.7	Discussion	161
7	Ecological opportunity	163
7.1	Introduction	163
7.2	Ecological opportunity and morphological divergence	164
7.3	Ecological opportunity and speciation rate	175
7.4	Key evolutionary innovations	181
7.5	Discussion	186
8	The ecological basis of speciation	188
8.1	Introduction	188
8.2	Models of ecological speciation	189
8.3	Tests of ecological speciation	197
8.4	Divergent sexual selection	207
8.5	Discussion	212
9	Divergence along genetic lines of least resistance	215
9.1	Introduction	215
9.2	Quantitative genetic framework	216
9.3	Divergence along genetic lines of least resistance	224
9.4	Divergent natural selection in retrospect	231
9.5	Discussion	235
10	The ecology of adaptive radiation	236
10.1	Finale	236
10.2	General features of adaptive radiation	236
10.3	Fate of the ecological theory	238
	References	244
	Index	285
