<i>List of figures</i>	ix
<i>Preface</i>	xi
<b>1 Introduction</b>	1
<b>2 Structure–functioning relationships</b>	9
Types of mycorrhizae and their distribution	9
Structure of the fungal symbiont	12
Structure of the plant symbiont	20
Structure and functioning in the field	22
<b>3 Evolution</b>	26
Paleobiology and the evolution of mycorrhizae	27
Mycorrhizae and habitats of extant plants	30
Molecular biology and the evolution of mycorrhizae	35
Simulation models of mutualism and mycorrhizal relationships	39
General conclusion	42
<b>4 Physiological and population biology</b>	43
Genetic attributes of the symbionts	44
Physiological ecology of the plant symbiont	45
Fitness of the plant symbiont	56
Physiological ecology of the fungal symbiont	59
Fitness of the fungal symbiont	63
Dispersal and establishment of mycorrhizal fungi into new habitats	66
Fitness and establishing new mycorrhizal associations	68
General summary	71
<b>5 Community ecology</b>	72
Fungal community interactions	74
Plant community interactions	85
Animal community interactions	95

<b>6 Ecosystem dynamics</b>	102
Distribution of mycorrhizae in different biomes	104
Mycorrhizae and carbon dynamics	108
Mycorrhizae and nitrogen cycling	112
Mycorrhizae and phosphorus cycling	116
Mycorrhizae and other resources	120
Mycorrhizae and patch dynamics	122
General conclusion	126
<b>7 Mycorrhizae and succession</b>	127
Mycorrhizae of different seres	127
Mycorrhizae and patterns of successional initiation	132
Mycorrhizae and succession in a semi-arid shrub-steppe	135
Nudation and survival of residuals	135
Dispersal	136
Ecesis and reaction: seral stages	137
Ecesis and reaction: patch structure	138
General summary	139
<b>8 Future directions for mycorrhizal research</b>	141
What determines a mycorrhiza?	141
Tracking mycorrhizal fungi	143
Mycorrhizae and the landscape	144
Mechanism of VA mycorrhizal action	147
Restoration of mycorrhizae on disturbed lands	148
Mycorrhizae and air pollution	149
Mycorrhizae and global ecology	151
Conclusion	153
<i>References</i>	154
<i>Index</i>	181
