<b>1 Introduction</b>	<b>1</b>
<b>2 Travel demand</b>	<b>4</b>
2.1 Aggregate tabulations and models 5	
2.1.1 <i>Aggregate demand models</i> 6	
2.1.2 <i>Cross-sectional studies of metropolitan areas</i> 8	
2.1.3 <i>Cross-sectional studies within a metropolitan area</i> 9	
2.1.4 <i>Studies using time-series data</i> 10	
2.1.5 <i>Summary of key results of aggregate studies</i> 11	
2.1.6 <i>Transportation and land use</i> 12	
2.2 Disaggregate models: methods 15	
2.2.1 <i>Basic discrete-choice models</i> 15	
2.2.2 <i>Estimation</i> 17	
2.2.3 <i>Interpreting coefficient estimates</i> 19	
2.2.4 <i>Data</i> 21	
2.2.5 <i>Randomness, scale of utility, and measures of benefit</i> 23	
2.2.6 <i>Aggregation and forecasting</i> 25	
2.2.7 <i>Specification</i> 26	
2.2.8 <i>Ordered and rank-ordered models</i> 27	
2.3 Disaggregate models: examples 28	
2.3.1 <i>Mode choice</i> 28	
2.3.2 <i>Trip-scheduling choice</i> 29	
2.3.3 <i>Choice of free or express lanes</i> 31	
2.4 Advanced discrete-choice modeling 33	
2.4.1 <i>Generalized extreme value models</i> 33	
2.4.2 <i>Combined discrete and continuous choice</i> 36	
2.4.3 <i>Disaggregate panel data</i> 38	
2.4.4 <i>Random parameters and mixed logit</i> 39	
2.4.5 <i>Endogenous prices</i> 41	

2.5	Activity patterns and trip chaining	43
2.6	Value of time and reliability	44
2.6.1	<i>Value of time: basic theory</i>	45
2.6.2	<i>Empirical specifications</i>	46
2.6.3	<i>Extensions</i>	47
2.6.4	<i>Value of reliability: theory</i>	49
2.6.5	<i>Empirical results</i>	52
2.7	Conclusions	54
<b>3</b>	<b>Costs</b>	<b>56</b>
3.1	The nature of cost functions	56
3.2	Cost functions for public transit	61
3.2.1	<i>Accounting cost studies</i>	62
3.2.2	<i>Engineering cost studies</i>	64
3.2.3	<i>Statistical cost studies</i>	65
3.2.4	<i>Cost functions including user inputs</i>	67
3.3	Highway travel: congestion technology	69
3.3.1	<i>Fundamentals of congestion</i>	69
3.3.2	<i>Empirical speed-flow relationships</i>	72
3.3.3	<i>Dynamic congestion models</i>	78
3.3.4	<i>Congestion modeling: a conclusion</i>	83
3.4	Highway travel: short-run cost functions and equilibrium	83
3.4.1	<i>Stationary-state congestion on a homogeneous road</i>	84
3.4.2	<i>Time-averaged models</i>	86
3.4.3	<i>Dynamic models with endogenous scheduling</i>	88
3.4.4	<i>Network equilibrium</i>	93
3.4.5	<i>Parking search</i>	96
3.4.6	<i>Empirical evidence on short-run variable costs</i>	97
3.5	Highway travel: long-run cost functions	105
3.5.1	<i>Analytic long-run cost functions</i>	106
3.5.2	<i>The role of information technology</i>	109
3.5.3	<i>Empirical evidence on capital costs</i>	111
3.5.4	<i>Is highway travel subsidized?</i>	114
3.6	Intermodal cost comparisons	115
3.7	Conclusions	117
<b>4</b>	<b>Pricing</b>	<b>119</b>
4.1	First-best congestion pricing of highways	120
4.1.1	<i>Static congestion</i>	121
4.1.2	<i>Dynamic congestion</i>	127
4.2	Second-best pricing	137
4.2.1	<i>Network aspects</i>	139
4.2.2	<i>Time-of-day aspects</i>	143
4.2.3	<i>User heterogeneity</i>	145
4.2.4	<i>Stochastic congestion and information</i>	146

4.2.5	<i>Interactions with other distorted markets</i>	146
4.2.6	<i>Second-best pricing: a conclusion</i>	147
4.3	Congestion pricing in practice	148
4.3.1	<i>Singapore</i>	148
4.3.2	<i>Norwegian toll rings</i>	149
4.3.3	<i>Value pricing in the US</i>	149
4.3.4	<i>London congestion charging</i>	150
4.3.5	<i>Other applications</i>	151
4.3.6	<i>Technology of road pricing</i>	151
4.4	Pricing of parking	153
4.5	Pricing of public transit	155
4.5.1	<i>Fare level</i>	155
4.5.2	<i>Fare structure</i>	159
4.5.3	<i>Incentive effects of subsidies</i>	159
4.5.4	<i>Political considerations</i>	160
4.6	Conclusions	161
<b>5</b>	<b>Investment</b>	<b>163</b>
5.1	Capacity choice for highways	163
5.1.1	<i>Basic results: capacity choice with first-best pricing and static congestion</i>	164
5.1.2	<i>Self-financing in more complex settings</i>	167
5.1.3	<i>Second-best highway capacity</i>	172
5.1.4	<i>Naïve investment rules</i>	178
5.2	Cost–benefit analysis	181
5.2.1	<i>Willingness to pay</i>	181
5.2.2	<i>Demand and cost forecasts</i>	184
5.2.3	<i>Discounting future costs and benefits</i>	185
5.2.4	<i>Shifting of costs and benefits</i>	187
5.2.5	<i>External benefits and network effects</i>	187
5.2.6	<i>Conclusion: the use and misuse of cost–benefit analysis</i>	189
5.3	Conclusions	189
<b>6</b>	<b>Industrial organization of transportation providers</b>	<b>191</b>
6.1	Private highways	192
6.1.1	<i>Single road with static congestion</i>	192
6.1.2	<i>Single road with dynamic congestion</i>	194
6.1.3	<i>Heterogeneous users</i>	196
6.1.4	<i>Private toll lanes: the two-route problem revisited</i>	196
6.1.5	<i>Competition in networks</i>	198
6.2	Regulation and franchising of private roads	201
6.3	Privately provided transit services	203
6.3.1	<i>Forms of privatization</i>	204

6.3.2	<i>Market structure and competitive practices</i>	205
6.3.3	<i>Efficiency of public and private providers</i>	208
6.3.4	<i>Experience with privatization and deregulation</i>	209
6.3.5	<i>Paratransit</i>	212
6.3.6	<i>Conventional taxi service</i>	213
6.4	Conclusions	214
7	<b>Conclusion</b>	<b>215</b>
7.1	Emerging themes	215
7.2	Implications for transportation research	219
