| <b>About the Authors</b>                            | <b>xiii</b> |
| <b>Preface</b>                                      | <b>xv</b>   |
| <b>Acknowledgements</b>                             | <b>xix</b>  |
| <b>List of Abbreviations</b>                        | <b>xxi</b>  |
| <b>1 An Introduction to the Grid</b>                | <b>1</b>    |
| 1.1 Introduction                                    | 1           |
| 1.2 Characterization of the Grid                    | 1           |
| 1.3 Grid-Related Standards Bodies                   | 4           |
| 1.4 The Architecture of the Grid                    | 5           |
| 1.5 References                                      | 6           |
| <b>Part One System Infrastructure</b>               | <b>9</b>    |
| <b>2 OGSA and WSRF</b>                              | <b>11</b>   |
| Learning Objectives                                 | 11          |
| Chapter Outline                                     | 11          |
| 2.1 Introduction                                    | 12          |
| 2.2 Traditional Paradigms for Distributed Computing | 13          |
| 2.2.1 Socket programming                            | 14          |
| 2.2.2 RPC   | 15          |
| 2.2.3 Java RMI                                      | 16          |
| 2.2.4 DCOM  | 18          |
| 2.2.5 CORBA   | 19          |
| 2.2.6 A summary on Java RMI, DCOM and CORBA         | 20          |
| 2.3 Web Services                                    | 21          |
| 2.3.1 SOAP  | 23          |
| 2.3.2 WSDL  | 24          |
| 2.3.3 UDDI  | 26          |
| 2.3.4 WS-Inspection                                 | 27          |
| 2.3.5 WS-Inspection and UDDI                        | 28          |
| 2.3.6 Web services implementations                  | 29          |
| 2.3.7 How Web services benefit the Grid             | 33          |

|          |  |           |
|----------|--|-----------|
| 2.4      | OGSA   | 34        |
| 2.4.1    | Service instance semantics                             | 35        |
| 2.4.2    | Service data semantics                                 | 37        |
| 2.4.3    | OGSA portTypes   | 38        |
| 2.4.4    | A further discussion on OGSA                           | 40        |
| 2.5      | The Globus Toolkit 3 (GT3)                             | 40        |
| 2.5.1    | Host environment                                       | 41        |
| 2.5.2    | Web services engine                                    | 42        |
| 2.5.3    | Grid services container                                | 42        |
| 2.5.4    | GT3 core services                                      | 43        |
| 2.5.5    | GT3 base services                                      | 44        |
| 2.5.6    | The GT3 programming model                              | 50        |
| 2.6      | OGSA-DAI   | 53        |
| 2.6.1    | OGSA-DAI portTypes                                     | 54        |
| 2.6.2    | OGSA-DAI functionality                                 | 56        |
| 2.6.3    | Services interaction in the OGSA-DAI                   | 58        |
| 2.6.4    | OGSA-DAI and DAIS                                      | 59        |
| 2.7      | WSRF   | 60        |
| 2.7.1    | An introduction to WSRF                                | 60        |
| 2.7.2    | WSRF and OGSI/GT3                                      | 66        |
| 2.7.3    | WSRF and OGSA  | 69        |
| 2.7.4    | A summary of WSRF                                      | 70        |
| 2.8      | Chapter Summary  | 70        |
| 2.9      | Further Reading and Testing                            | 72        |
| 2.10     | Key Points   | 72        |
| 2.11     | References   | 73        |
