8.1	The Laffer curve	145

Acknowledgements

A number of people have helped me in the production of this book. I have benefited greatly from conversations with John Holmwood. I doubt whether I have met all his criticisms, but through our discussions the text has been improved immensely. Henry Drucker and Malcolm Anderson also deserve special thanks as they both read through the entire manuscript and made many useful comments.

I am grateful to several other colleagues for reading and commenting upon various portions of the manuscript. They include Nigel Bowles, Alice Brown, Jerry Goldman, Robert Goodin, Richard Parry and Jeremy Waldron. My thanks also to Steven Kennedy for his patience and encouragement with this book.

The author wishes to thank Pergamon Press for kindly giving permission for the use of copyright material for an abridged form of Table 3.1, reprinted with permission from Anthony Heath, Roger Jowell and John Curtice (1985) *How Britain Votes*.
