FOREWORD

This bibliography has resulted from an initial suggestion by Sargay Timofeev in the March 1990 newsletter of The Chaetognath Group, whose coordinator (Helga Kapp) further suggested that I be given the task. Both are forgiven. The eventual size of the task was unsuspected at its beginning in the fall of 1990; bibliographies are easily begun, but decisions on their limits and conclusion are difficult. I have attempted to include all major and substantive works on the Chaetognatha. The inevitable omissions are inadvertent, although a recognized deficiency of the work lies in an incomplete listing of Russian references; I have included only those available to me in translated or transliterated form.

Sources of references included personal reference lists of mine and Helga Kapp's, the separate lists of holdings in the Chaetognath Reference Library maintained at V.I.M.S., and the extensive notebooks and microfilms of the late Robert Bieri that were made available to me by Erik Thuesen. Mme. Marie-Louise Furnestin, Elvezio Ghirardelli, Helga Kapp and Vidar Øresland carefully edited sections of the bibliography. Prior to inclusion in this list, the complete works of Angeles Alvariño and Michel Duvert were provided by them to the Chaetognath Reference Library. Persistent errors are mine, not those of the above gracious Group members. Finally, I thank Elizabeth E. Keane for her editing and proofreading assistance.

Entries are arranged alphabetically by first author; the more difficult to locate second and subsequent authors are included in an index. A diskette for use in keyword title searches is located inside the back cover. Included on this diskette are copies of the bibliography in ASCII format, for use in word processing programs, and in ISO 2709 format, which can be imported into UNESCO's CDS/ISIS bibliographic software.
