Contents

Preface—Historical Background	ix
References	xiii
Chapter 1. Introduction to Moire Metrology	1
1.1 Optical Metrology and Light	1
1.2 Light Waves and Interferometry	2
1.3 The Moire Effect	4
1.4 Analysis of the Moire Pattern by the Indicical Equation Formalism	5
1.5 Line Shape Analysis of Moire Fringes	10
1.6 Moire Pattern Response to Grating's Deformations	13
References	17
Symbols	17
Chapter 2. Techniques Used in Moire Metrology	19
2.1 Fringe Quality Improvement and Readout Techniques	19
2.1.1. Grating's stripes multiplication and addition	19
2.1.2. Spatial filtering	20
2.1.3. Phase shift fringe readout method	21
2.1.4. Electronic heterodyne readout technique	21
2.1.5. Other gratings	22
2.2 Information Extraction from Distorted Gratings	24
2.2.1. Mapping $f(x, y)$	25
2.2.2. Mapping of differences	27
2.2.3. Mapping the sum	28
2.2.4. Multiplication by a factor	29
2.2.5. Weighted sums and differences	30

2.2.6.	Partial derivatives	30
2.2.7.	Self-healing	34
2.2.8.	Grating and fringe pattern phase	35
2.2.9.	Spatial correlation of two moire patterns	36
2.2.10.	Radial and circular gratings	36
	References	37
	Symbols	38
Chapter 3. Limitations on Accuracy Due to the Use of Light		39
3.1	Introduction	39
3.2	Properties of Light	40
3.3	Light Coherence and Radiation Modes	43
3.4	Limitations on Spatial Resolution—The Uncertainty Principle	46
3.5	Mode Statistics as a Means to Improve the Optical Resolution	48
3.6	Summary	51
	References	51
	Symbols	51
Chapter 4. Holographic vs. Moire Contouring of Three-Dimensional Diffusive Objects		53
4.1	Introduction to the Metrology of Diffusive Objects	53
4.2	Holography and Holographic Interferometry	54
4.2.1.	Holography: Introduction	54
4.2.2.	Recording process	55
4.2.3.	Reconstruction	56
4.2.4.	Holographic interferometry	57
4.2.5.	Double exposure, contouring, and sandwich holography	59
4.3	Shadow Moire and the Grating Hologram	61
4.4	Deferred Analysis in Shadow Moire	64
4.5	Slope Direction Determination in Shadow Moire	66
4.5.1.	Infinite fringe shadow moire	66
4.5.2.	Finite fringe shadow moire	66

4.6	Noise Reduction in Moire Contouring by Double Exposure	67
4.7	Slope Contouring by Shearing Shadow Moire Techniques	70
4.8	Vibration Analysis	72
4.9	Summary	72
	References	73
	Symbols	74
Chapter 5.	Moire Analysis of Strain	75
5.1	Background on Stress and Strain	75
5.2	Strain Measurements	77
5.3	Mapping Shear Strain	80
5.4	Analysis of Strain by Moire Interferometry	81
5.5	Analysis of Strain by Moire Deflectometry	84
	References	86
	Symbols	87
Chapter 6.	Moire Deflectometry	89
6.1	Introduction	89
6.2	Geometrical Analysis of Moire Deflectometry	90
6.3	Ray Deflection vs. Phase Retardation	93
6.4	Sensitivity of Moire Deflectometry	102
6.5	Diffraction by a Grating—Talbot Effect	102
6.6	Diffraction by a Finite Aperture	103
6.7	The Effect of Beam Quality	104
6.8	The Effect of Grating Imperfection	107
	References	109
Chapter 7.	Applications of Moire Deflectometry	111
7.1	Introduction	111
7.2	Experimental Techniques in Moire Deflectometry	112
7.2.1.	Configurations of the moire deflectometer	112
7.2.2.	Real time vs. deferred analysis methods	117

7.3	Applications of Moire Deflectometry in Static Systems	123
7.3.1.	Beam deflecting objects	124
7.3.2.	Focal length of lenses and mirrors	127
7.3.3.	General wave front distortion	133
7.4	Applications of Moire Deflectometry in Dynamic Systems	136
7.4.1.	Flow systems	136
7.4.2.	Thermal lensing	149
7.5	Applications of Moire Deflectometry to MTF Analysis	157
7.5.1.	Experimental techniques	157
7.5.2.	Applications of MTF analysis in static systems	159
7.5.3.	Applications of MTF analysis in dynamic systems	164
7.6	Miscellaneous Applications of Moire Deflectometry	167
7.6.1.	Level based on moire deflectometry	167
7.6.2.	Dimensional changes of high surface area electrodes	169
7.6.3.	Frequency marker	169
7.6.4.	Hybrid Talbot effect	170
	References	171
Appendix.	Aberration Analysis Using Moire Deflectometry	175
A.1	Background	175
A.2	Experimental Techniques	176
A.2.1.	Defocusing	178
A.2.2.	Spherical aberrations	178
A.2.3.	Coma	181
A.2.4.	Astigmatism	183
A.3	Normalization of the Coefficients	184
	References	184
	Author Index	185
	Subject Index	187
