

Errata:

European Journal of Social Psychology, volume I, number 4, article *Guido Peeters*, 'The positive-negative asymmetry: on cognitive consistency and positivity bias.'

The first line on p. 462 has to be eliminated and should be inserted on p. 461 between the 36th and 37th line. The text then becomes:

Indeed, although the successive-scanning strategy may seem a quite reasonable way of acting, from a strictly logical point of view, it is not the most appropriate way to reach high cognitive validity. The best strategy according to logics would be the application of John Stuart Mill's 'method of difference' which is also applied in science.

Page 466, 11th line: read 'number of positive traits' instead of 'number of traits.'
