Contents

Foreword VII

Preface XIX

List of Abbreviations Appearing in this Volume XXVII

List of Contributors XXXIII

- 1 An Introduction to the Quantum Theory of Atoms in Molecules 1**
Chérif F. Matta and Russell J. Boyd
- 1.1 Introduction 1
- 1.2 The Topology of the Electron Density 1
- 1.3 The Topology of the Electron Density Dictates the Form of Atoms in Molecules 5
- 1.4 The Bond and Virial Paths, and the Molecular and Virial Graphs 8
- 1.5 The Atomic Partitioning of Molecular Properties 9
- 1.6 The Nodal Surface in the Laplacian as the Reactive Surface of a Molecule 10
- 1.7 Bond Properties 10
- 1.7.1 The Electron Density at the BCP (ρ_b) 11
- 1.7.2 The Bonded Radius of an Atom (r_b), and the Bond Path Length 11
- 1.7.3 The Laplacian of the Electron Density at the BCP ($\nabla^2\rho_b$) 11
- 1.7.4 The Bond Ellipticity (ϵ) 12
- 1.7.5 Energy Densities at the BCP 12
- 1.7.6 Electron Delocalization between Bonded Atoms: A Direct Measure of Bond Order 13
- 1.8 Atomic Properties 15
- 1.8.1 Atomic Electron Population [$N(\Omega)$] and Charge [$q(\Omega)$] 16
- 1.8.2 Atomic Volume [$\text{Vol.}(\Omega)$] 16
- 1.8.3 Kinetic Energy [$T(\Omega)$] 17
- 1.8.4 Laplacian [$L(\Omega)$] 17
- 1.8.5 Total Atomic Energy [$E_e(\Omega)$] 18

1.8.6	Atomic Dipolar Polarization [$\mu(\Omega)$]	20
1.8.7	Atomic Quadrupolar Polarization [$Q(\Omega)$]	24
1.9	“Practical” Uses and Utility of QTAIM Bond and Atomic Properties	25
1.9.1	The Use of QTAIM Bond Critical Point Properties	25
1.9.2	The Use of QTAIM Atomic Properties	26
1.10	Steps of a Typical QTAIM Calculation	27
	<i>References</i>	30

Part I Advances in Theory 35

2 The Lagrangian Approach to Chemistry 37

Richard F. W. Bader

2.1	Introduction	37
2.1.1	From Observation, to Physics, to QTAIM	37
2.2	The Lagrangian Approach	38
2.2.1	What is The Lagrangian Approach and What Does it Do?	38
2.2.2	The Lagrangian and the Action Principle – A Return to the Beginnings	39
2.2.3	Minimization of the Action	40
2.2.4	Steps in Minimizing the Action	41
2.3	The Action Principle in Quantum Mechanics	42
2.3.1	Schrödinger’s Appeal to the Action	42
2.3.2	Schrödinger’s Minimization	42
2.3.2.1	Two Ways of Expressing the Kinetic Energy	43
2.3.3	Obtaining an Atom from Schrödinger’s Variation	44
2.3.3.1	The Role of Laplacian in the Definition of an Atom	45
2.3.4	Getting Chemistry from $\delta G(\psi, \nabla\psi; \Omega)$	46
2.4	From Schrödinger to Schwinger	48
2.4.1	From Dirac to Feynman and Schwinger	48
2.4.2	From Schwinger to an Atom in a Molecule	49
2.5	Molecular Structure and Structural Stability	52
2.5.1	Definition of Molecular Structure	52
2.5.2	Prediction of Structural Stability	53
2.6	Reflections and the Future	53
2.6.1	Reflections	53
2.6.2	The Future	55
	<i>References</i>	57

3 Atomic Response Properties 61

Todd A. Keith

3.1	Introduction	61
3.2	Apparent Origin-dependence of Some Atomic Response Properties	62
3.3	Bond Contributions to “Null” Molecular Properties	64

3.4	Bond Contributions to Atomic Charges in Neutral Molecules	70
3.5	Atomic Contributions to Electric Dipole Moments of Neutral Molecules	71
3.6	Atomic Contributions to Electric Polarizabilities	73
3.7	Atomic Contributions to Vibrational Infrared Absorption Intensities	78
3.8	Atomic Nuclear Virial Energies	82
3.9	Atomic Contributions to Induced Electronic Magnetic Dipole Moments	88
3.10	Atomic Contributions to Magnetizabilities of Closed-Shell Molecules	90
	<i>References</i>	94
4	QTAIM Analysis of Raman Scattering Intensities: Insights into the Relationship Between Molecular Structure and Electronic Charge Flow	95
	<i>Kathleen M. Gough, Richard Dawes, Jason R. Dwyer, and Tammy L. Welshman</i>	
4.1	Introduction	95
4.2	Background to the Problem	96
4.2.1	Conceptual Approach to a Solution	97
4.2.1.1	Experimental Measurement of Raman Scattering Intensities	97
4.2.1.2	Theoretical Modeling of Raman Scattering Intensities: What We Did and Why	99
4.3	Methodology	100
4.3.1	Modeling α and $\partial\alpha/\partial r$	101
4.3.2	Recouping α From the Wavefunction, With QTAIM	102
4.3.3	Recovering $\partial\alpha/\partial r$ From QTAIM	103
4.4	Specific Examples of the Use of AIM2000 Software to Analyze Raman Intensities	103
4.4.1	Modeling α in H_2	104
4.4.1.1	Modeling $\Delta\bar{\alpha}/\Delta r$ in H_2	106
4.4.2	Modeling α and $\Delta\bar{\alpha}/\Delta r$ in CH_4	106
4.4.3	Additional Exercises for the Interested Reader	108
4.5	Patterns in α That Are Discovered Through QTAIM	109
4.6	Patterns in $\partial\alpha/\partial r_{CH}$ That Apply Across Different Structures, Conformations, Molecular Types: What is Transferable?	111
4.6.1	Patterns in $\Delta\bar{\alpha}/\Delta r_{CH}$ Revealed by QTAIM	111
4.6.1.1	QTAIM Analysis of $\Delta\bar{\alpha}/\Delta r_{CH}$ in Small Alkanes	111
4.6.1.2	What Did We Learn From QTAIM That Can be Transferred to the Other Molecules?	113
4.7	What Can We Deduce From Simple Inspection of $\partial\bar{\alpha}/\partial r_{CH}$ and $\partial\bar{\alpha}/\partial r_{CC}$ From Gaussian?	114
4.7.1	Variations in $\partial\bar{\alpha}/\partial r_{CH}$ Among the Alkanes	114
4.7.2	$\Delta\bar{\alpha}/\Delta r_{CH}$ in Cycloalkanes, Bicycloalkanes, and Hedranes	116
4.7.3	Patterns That Emerge in $\Delta\bar{\alpha}/\Delta r_{CC}$ of Alkanes	116

4.7.4	Unsaturated Hydrocarbons and the Silanes: C–H, C=C, and Si–Si Derivatives	117
4.8	Conclusion	118
	<i>References</i>	119
5	Topological Atom–Atom Partitioning of Molecular Exchange Energy and its Multipolar Convergence	121
	<i>Michel Rafat and Paul L. A. Popelier</i>	
5.1	Introduction	121
5.2	Theoretical Background	123
5.3	Details of Calculations	128
5.4	Results and Discussion	130
5.4.1	Convergence of the Exchange Energy	130
5.4.2	Convergence of the Exchange Force	136
5.4.3	Diagonalization of a Matrix of Exchange Moments	136
5.5	Conclusion	139
	<i>References</i>	139
6	The ELF Topological Analysis Contribution to Conceptual Chemistry and Phenomenological Models	141
	<i>Bernard Silvi and Ronald J. Gillespie</i>	
6.1	Introduction	141
6.2	Why ELF and What is ELF?	142
6.3	Concepts from the ELF Topology	144
6.3.1	The Synaptic Order	145
6.3.2	The Localization Domains	145
6.3.3	ELF Population Analysis	147
6.4	VSEPR Electron Domains and the Volume of ELF Basins	149
6.5	Examples of the Correspondence Between ELF Basins and the Domains of the VSEPR Model	153
6.5.1	Octet Molecules	153
6.5.1.1	Hydrides (CH ₄ , NH ₃ , H ₂ O)	153
6.5.1.2	AX ₄ (CH ₄ , CF ₄ , SiCl ₄)	154
6.5.1.3	AX ₃ E and AX ₂ E ₂ (NCl ₃ , OCl ₂)	154
6.5.2	Hypervalent Molecules	155
6.5.2.1	PCl ₅ and SF ₆	155
6.5.2.2	SF ₄ and ClF ₃	155
6.5.2.3	AX ₇ and AX ₆ E Molecules	155
6.5.3	Multiple Bonds	156
6.5.3.1	C ₂ H ₄ and C ₂ H ₂	156
6.5.3.2	Si ₂ Me ₄ and Si ₂ Me ₂	157
6.6	Conclusions	158
	<i>References</i>	159

Part II Solid State and Surfaces 163**7 Solid State Applications of QTAIM and the Source Function – Molecular Crystals, Surfaces, Host–Guest Systems and Molecular Complexes 165***Carlo Gatti*

7.1 Introduction 165

7.2 QTAIM Applied to Solids – the TOPOND Package 166

7.2.1 QTAIM Applied to Experimental Densities: TOPXD and XD Packages 168

7.3 QTAIM Applied to Molecular Crystals 170

7.3.1 Urea 171

7.3.1.1 Urea: Packing Effects 172

7.4 QTAIM Applied to Surfaces 179

7.4.1 Si(111)(1 × 1) Clean and Hydrogen-covered Surfaces 180

7.4.2 Si(111)(2 × 1) Reconstructed Surface 184

7.5 QTAIM Applied to Host–Guest Systems 186

7.5.1 Type I Inorganic Clathrates $A_8Ga_{16}Ge_{30}$ (A = Sr, Ba) 186

7.5.2 Sodium Electrosodalite 190

7.6 The Source Function: Theory 192

7.6.1 The Source Function and Chemical Transferability 194

7.6.2 Chemical Information from the Source Function: Long and Short-range Bonding Effects in Molecular Complexes 196

7.6.3 The Source Function: Latest Developments 201

*References 202***8 Topology and Properties of the Electron Density in Solids 207***Victor Luaña, Miguel A. Blanco, Aurora Costales, Paula Mori-Sánchez, and Angel Martín Pendás*

8.1 Introduction 207

8.2 The Electron Density Topology and the Atomic Basin Shape 209

8.3 Crystalline Isostructural Families and Topological Polymorphism 213

8.4 Topological Classification of Crystals 215

8.5 Bond Properties – Continuity from the Molecular to the Crystalline Regime 217

8.6 Basin Partition of the Thermodynamic Properties 219

8.7 Obtaining the Electron Density of Crystals 222

*References 227***9 Atoms in Molecules Theory for Exploring the Nature of the Active Sites on Surfaces 231***Yosslen Aray, Jesus Rodriguez, and David Vega*

9.1 Introduction 231

9.2 Implementing the Determination of the Topological Properties of $\rho(\tau)$ from a Three-dimensional Grid 231

9.3	An Application to Nanocatalysts – Exploring the Structure of the Hydrodesulfurization MoS ₂ Catalysts	236
9.3.1	Catalyst Models	237
9.3.2	The Full $\rho(\mathbf{r})$ Topology of the MoS ₂ Bulk	241
9.3.3	The $\rho(\mathbf{r})$ Topology of the MoS ₂ Edges	245
