Corrections

In and before Equation (30) of the paper

The rheological behaviour of suspensions of fat particles in oil interpreted in terms of a transient-network model

by H. Kamphuis and R. J. J. Jongschaap

appeared in Colloid & Polymer Science 263:1008–1024 (1985), the phrase

$$\frac{n_o(1)}{n_o} \lim_{\omega \to 0} G'(\omega)$$

should be replaced by

$$\frac{n_o(1)}{n_o} \lim_{\omega \to \infty} G'(\omega).$$

Moreover the text in Figure 4 has been omitted. The flattest curve corresponds with the "single chain".
